**Here's Looking at Euclid** - Alex Bellos 2010-06-15

Too often math gets a bad rap, characterized as dry and difficult. But, Alex Bellos says, "math can be inspiring and brilliantly creative.

around the globe and has plunged into history to uncover fascinating stories of mathematical achievement, from the breakthroughs of Euclid, the greatest mathematician of all time, to the creations of the Zen master of origami, one of the hottest areas of mathematical work today. Taking us into the wilds of the Amazon, he tells the story of a tribe there who can count only to five and reports on the latest findings about the math instinct—including the revelation that ants can actually count how many steps they've taken. Journeying to the Bay of Bengal, he interviews a Hindu sage about the brilliant mathematical insights of the Buddha, while in Japan he visits the godfather of Sudoku and introduces the brainteasing delights of mathematical games. Exploring the mysteries of randomness, he explains why it is impossible for our iPods to truly randomly select songs. In probing the many intrigues of that most beloved of numbers, pi, he visits with two brothers so

obsessed with the elusive number that they built a supercomputer in their Manhattan apartment to study it. Throughout, the journey is enhanced with a wealth of intriguing illustrations, such as of the clever puzzles known as tangrams and the crochet creation of an American math professor who suddenly realized one day that she could knit a representation of higher dimensional space that no one had been able to visualize. Whether writing about how algebra solved Swedish traffic problems, visiting the Mental Calculation World Cup to disclose the secrets of lightning calculation, or exploring the links between pineapples and beautiful teeth, Bellos is a wonderfully engaging guide who never fails to delight even as he edifies. Here's Looking at Euclid is a rare gem that brings the beauty of math to life.

But it's all in a days work, as Lefkowitz reveals in *A Funny Thing Happened on the Way to Stockholm*, which is filled to the brim with anecdotes and energy, and gives us a glimpse into the life of one of today's leading scientists.

*No-Man's Lands* - Scott Huler  
2008-03-11  
When NPR contributor Scott

Huler made one more attempt to get through James Joyce's *Ulysses*, he had no idea it would launch an obsession with the book's inspiration: the ancient Greek epic *The Odyssey* and the lonely homebound journey of its Everyman hero, Odysseus. *No-Man's Lands* is Huler's funny and touching exploration of the life lessons embedded within *The Odyssey*, a legendary tale of wandering and longing that could be read as a veritable guidebook for middle-aged men everywhere. At age forty-four, with his first child on the way, Huler felt an instant bond with Odysseus, who fought for some twenty years against formidable difficulties to return home to his beloved wife and son. In reading *The Odyssey*, Huler saw the chance to experience a great vicarious adventure as well as the opportunity to assess the man he had become and embrace the imminent arrival of both middle age and parenthood. But Huler realized that it wasn't enough to simply read the words on the page—he

needed to live Odysseus's odyssey, to visit the exotic destinations that make Homer's story so timeless. And so an ambitious pilgrimage was born . . . traveling the entire length of Odysseus's two-decade journey. In six months, Huler doggedly retraced Odysseus's every step, from the ancient ruins of Troy to his ultimate destination in Ithaca. On the way, he discovers the Cyclops's Sicilian cave, visits the land of the dead in Italy, ponders the lotus from a Tunisian resort, and paddles a rented kayak between Scylla and Charybdis and lives to tell the tale. He writes of how and why the lessons of The Odyssey—the perils of ambition, the emptiness of glory, the value of love and family—continue to resonate so deeply with readers thousands of years later. And as he finally closes in on Odysseus's final destination, he learns to fully appreciate what Homer has been saying all along: the greatest adventures of all are the ones that bring us home to those we love. Part travelogue,

part memoir, and part critical reading of the greatest adventure epic ever written, No-Man's Lands is an extraordinary description of two journeys—one ancient, one contemporary—and reveals what The Odyssey can teach us about being better bosses, better teachers, better parents, and better people.

**Looking Up** - Matthew Cappucci 2022-08-02  
An energetic and electrifying narrative about all things weather—by one of today's rising meteorological stars. Get in—we're going storm-chasing! Imagine a very cool weather nerd has just pulled up to you and yelled this out the window of his custom-built armored storm-chasing truck. The wind is whipping around, he's munching on Wawa, it's all very chaotic—yet as you look into his grinning face, you feel the greatest surge of adrenaline you have ever felt in your life. Hallelujah: your cavalry is here! Welcome to the brilliance of *Looking Up*, the lively new book from rising meteorology star Matthew Cappucci. He's a meteorologist for *The Washington Post*, and you might think of him as Doogie Howser meets Bill Paxton from *Twister*, with a

dash of Leonardo DiCaprio from Catch Me If You Can. A self-proclaimed weather nerd, at the age of fourteen he talked his way into delivering a presentation on waterspouts at the American Meteorological Society's annual broadcast conference by fudging his age on the application and created his own major on weather science while an undergrad at Harvard. Combining reportage and accessible science with personal storytelling and infectious enthusiasm, Looking Up is a riveting ride through the state of our weather and a touching story about parents and mentors helping a budding scientist achieve his improbable dreams.

Throughout, readers get a tutorial on the basics of weather science and the impact of the climate. As our country's leaders sound the alarm on climate change, few people have as close a view to how serious the situation actually is than those whose job is to follow the weather, which is the daily dose of climate we interact with and

experience every day. The weather affects every aspect of our lives (even our art) as well as our future. The way we think about it requires a whole-life overhaul. Rain or shine, tropical storm or twister, Cappucci is here to help us begin the process. So get in his storm-chasing truck already, will ya?

**Atomic Adventures: Secret Islands, Forgotten N-Rays, and Isotopic Murder: A Journey into the Wild World of Nuclear Science** - James Mahaffey 2017-06-06

The latest investigation from acclaimed nuclear engineer and author James Mahaffey unearths forgotten nuclear endeavors throughout history that were sometimes hair-brained, often risky, and always fascinating. Whether you are a scientist or a poet, pro-nuclear energy or staunch opponent, conspiracy theorist or pragmatist, James Mahaffey's books have served to open up the world of nuclear science like never before. With clear explanations of some of the most complex scientific

endeavors in history, Mahaffey's new book looks back at the atom's wild, secretive past and then toward its potentially bright future. Mahaffey unearths lost reactors on far flung Pacific islands and trees that were exposed to active fission that changed gender or bloomed in the dead of winter. He explains why we have nuclear submarines but not nuclear aircraft and why cold fusion doesn't exist. And who knew that radiation counting was once a fashionable trend? Though parts of the nuclear history might seem like a fiction mash-up, where cowboys somehow got a hold of a reactor, Mahaffey's vivid prose holds the reader in thrall of the infectious energy of scientific curiosity and ingenuity that may one day hold the key to solving our energy crisis or sending us to Mars.

#### **A Great and Glorious Adventure: A History of the Hundred Years War and the Birth of Renaissance**

**England** - Gordon Corrigan  
2014-07-15

The glory and tragedy of the Hundred Years War is revealed in a new historical narrative, bringing Henry V, the Black

Prince, and Joan of Arc to fresh and vivid life In this captivating new history of a conflict that raged for over a century, Gordon Corrigan reveals the horrors of battle and the machinations of power that have shaped a millennium of Anglo-French relations. The Hundred Years War was fought between 1337 and 1453 over English claims to both the throne of France by right of inheritance and large parts of the country that had been at one time Norman or, later, English. The fighting ebbed and flowed, but despite their superior tactics and great victories at Crécy, Poitiers, and Agincourt, the English could never hope to secure their claims in perpetuity: France was wealthier and far more populous, and while the English won the battles, they could not hope to hold forever the lands they conquered. Military historian Gordon Corrigan's gripping narrative of these epochal events is combative and refreshingly alive, and the great battles and personalities of the period -

Edward III, The Black Prince, Henry V, and Joan of Arc among them - receive the full attention and reassessment they deserve.

### **Fishing the Wild Waters -**

Conor Sullivan 2021-12-07

From the azure waters of Hawaii to the pristine streams in Alaska to the craggy New England coast, a devoted angler reveals the agony and ecstasy of fishing. Fishing the Wild Waters invites us to traverse America and visit three distant and distinct dream destinations for any serious angler—and anyone who aspires to someday become one. Sullivan's marvelous debut illuminates the often profound nature of fishing as a vehicle that connects those who practice it with reverence to a world beyond the one humans created. As we travel along with Sullivan, he reveals what goes into the pursuit of select fish in the region with humor and personal stories as well as deep knowledge. Hawaii, Alaska and New England are some of the last frontiers of

fishing in America. They are full of danger, big fish, and extraordinary adventure. To fish these places is to reach back and stand alongside the First Nations of fishermen—our ancestors who lived there for thousands of years before us—as well as those early Americans who built this country using species like cod as their currency. These cultural and fishing outposts will tell us something if we can just be quiet and listen. To hear that message requires an intrinsic respect for these ancient fishing grounds and our connection to them. This mindset is in lock-step with a growing movement of anglers who fish these wildest of waters as a way to turn down the noise of modern living and tune into their fundamental, hands-on relationship with the sea, finding not only the solace, but the sustenance the fish provides to those who take the time to learn its lessons. Plus, filling a freezer with the world's healthiest protein just feels right. By turns funny, thrilling, and lyric, Fishing the

Wild Waters celebrates the these special places where each fisherman can pull back the curtain, connect to the sea, and gaze into their own soul - the soul of a fisherman.

**Titans** - Kate O'Hearn

2020-07-28

A group of kids must stop invaders before they take over Titus—and the rest of the universe—in this first book in a brand-new series from bestselling Pegasus author Kate O'Hearn, who masterfully blends mystery and mythology together. Fifteen years ago, Olympus was destroyed and the Olympians were resettled on Titus. Since then Earth has been declared a quarantined world. Neither Titans nor Olympians are allowed to visit and under no circumstances are humans allowed on Titus. The Titans and Olympians are keeping the peace. But the deep-seated mistrust still lingers, so when a human ends up on Titus, he could be the spark that reignites the war... Astraea is a Titan, granddaughter of Hyperion, and now a reluctant student at the brand-new school, Arcadia. She just knows that it's going to be awful, and that there is no way that Titans and Olympians will ever get along! At least she's got her best friend, a winged-horse named Zephyr, to keep her company.

Then the night before the first day of school, Astraea hears her parents discussing something terrifying: a human has been spotted on Titus. But that's not possible. All routes to Earth via the Solar Stream have been closed—no one can travel between the two worlds...or can they? When Astraea and Zephyr get detention on their first day—for fighting with a centaur—they're sent to the orchards to harvest nectar. There they discover a human boy named Jake. How he got to

Titus is a mystery even to him. But Astraea and Zephyr know they have to get Jake home before anyone else discovers him. But what the trio uncovers is something much bigger than one misplaced human boy. It's a scheme to take down the rulers of this world, conquer it, and then do the same across the galaxy. Can a group of kids stop the invaders? Or is Titus, like Olympus before it, doomed?
