Corporate Reporting - Geoff Everingham
2008-06-30

The realm of corporate reporting has shifted

significantly since the 7th edition of this book was published. With the world becoming an ever smaller place, the need for a set of global reporting standards has become all the more pressing. To this end two major frameworks have emerged as the flag bearers of global financial reporting standards viz International Financial Reporting Standards (IFRS) and US GAAP. The former has been mandatory for all companies listed on the JSE Securities Exchange Limited (JSE) since 2005. The differential framework ties in well with the recent amendments to the Companies Act in the form of the Corporate Laws Amendment Act (CLAA). The CLAA marks the first phase of Corporate Law reform in South Africa and aims to introduce, amongst other reforms, differential reporting for limited interest companies as defined, to ease the burden of financial reporting on entities where external use of financial information is limited. It will be followed by the new Companies Act which is currently at the Bill

stage. The CLAA has an effective date of 14 December 2007. The disclosure requirements set out in this book apply to South African enterprises. They can therefore be applied to companies, close corporations, trusts and partnerships, irrespective of differences in capital structure. Enterprises which are subsidiaries of foreign parent companies may also be required to prepare their financial statements in a format, and with disclosure, that complies with reporting standards abroad. This could lead to disclosure additional to that required in South Africa as set out in this book.
