Cage Aquaculture - Food and Agriculture Organization of the United Nations 2007

This document contains nine FAO commissioned papers on cage aquaculture including a global overview, one country review for China, and seven regional reviews for Asia (excluding China), northern Europe, the Mediterranean, sub-Saharan Africa, Latin America and the Caribbean, northern America and Oceania. The content of the papers is based on the broad experience and sound knowledge of the authors with advice and help received from many experts and reviewers around the globe. The papers were presented to a distinguished audience of some 300 participants from over 25 countries during the FAO Special Session on Cage Aquaculture - Regional Reviews and Global Overview at the Asian Fisheries Society (AFS) Second International Symposium on Cage Aquaculture in Asia (CAA2), held in Hangzhou, China, from 3 to 8 July 2006.

Climate Change and Marine and Freshwater Toxins - Luis M. Botana 2020-12-16

The increasingly widespread production of toxins by marine and freshwater microalgae raises serious concerns regarding seafood and drinking water safety. This book compiles studies on the influence of climate change on the spreading of toxin-producing species in aquatic systems. The chemistry and biology of toxin production is revised and an outlook on control and prevention of the toxins' impact on human and animal health is given.

Fundamentals of Biomechanics - Duane Knudson 2013-04-17

Fundamentals of Biomechanics introduces the exciting world of how human movement is created and how it can be improved. Teachers, coaches and physical therapists all use biomechanics to help people improve movement and decrease the risk of injury. The book presents a comprehensive review of the major concepts of biomechanics and summarizes them in nine principles of biomechanics. Fundamentals of Biomechanics concludes by showing how these principles can be used by movement professionals to improve human movement. Specific case studies are presented in physical education, coaching, strength and conditioning, and sports medicine.

EBOOK: Communication Skills For Adult Nurses - Abayomi McEwen
2010-09-16

"This book is a real gem - useful not only for nurses, but for all healthcare professionals, students and educators wanting to develop their communication skills. One is reminded that it is not always about 'what' is said, but 'how' it is said. This book will be a great resource for those advocating interprofessional working, while keeping the patient's perspective in the reader's mind throughout." Dr Susanne Lindqvist, Senior Lecturer in Interprofessional Education, University of East Anglia, Norwich, UK. "This book is slim line and concise but covers a lot of vital points that all nurses and students of nursing should be aware of. It is well laid out with activities, case studies and vignettes to illustrate key issues... I thoroughly recommend this book to nursing students and those who work with people in any context." Jo Parham, third year adult nursing student at the University of the West of England. "From a Nursing Student perspective this book is excellent. It deals with every aspect of communication from the fundamental skills, through the use of technology, challenging situations, communication in teams, to the legal and ethical aspects of communication." Conor Hamilton, Nursing student. Queens University, Belfast. An essential guide for all nurses!! With an emphasis on practical application, this lively and accessible guide will help nurses to hone and develop their communication skills. Full of examples from both a patient and a nurse perspective, the book covers: Barriers to communication Communication in teams The patient's perspective Making good use of email and phone Managing difficult conversations How good communication underpins the essence of care Examples of both good and poor practice, taken from the real-life experiences of the authors, are included to encourage reflection and integration of theory and practice. The book includes common scenarios, activity points and suggestions for practice, to give nurses the tools to continue to develop and apply effective communication skills. Communication Skills for Adult Nurses will support both student nurses learning their craft and also offer a suitable handy reference for qualified nurses undertaking continuing professional development, or acting as mentors. Marine Biotoxins - Hans P. Egmond 2004

This paper provides an extensive review of different aspects of five shellfish-poisoning syndromes (paralytic, diarrhoeic, amnesic, neurologic and azapiracid), as well as one fish-poisoning syndrome (ciguatera fish poisoning), and discusses in detail the causative toxins produced by marine organisms, chemical structures and analytical methods of the toxins, habitat and occurrence of the toxin-producing organisms, case studies and existing regulations. Based on this analysis, risk assessments are carried out for each of the toxins, and recommendations are elaborated to improve the management of these risks in order to reduce

the harmful effect of these toxins on public health.

Signs for Developing Reading - Emil Holmer 2016-05-23

Reading development is supported by strong language skills, not least in deaf and hard-of-hearing (DHH) children. The work in the present thesis investigates reading development in DHH children who use sign language, attend Regional Special Needs Schools (RSNS) in Sweden and are learning to read. The primary aim of the present work was to investigate whether the reading skills of these children can be improved via computerized sign language based literacy training. Another aim was to investigate concurrent and longitudinal associations between skills in reading, sign language, and cognition in this population. The results suggest that sign language based literacy training may support development of word reading. In addition, awareness and manipulation of the sub-lexical structure of sign language seem to assist word reading, and imitation of familiar signs (i.e., vocabulary) may be associated with developing reading comprehension. The associations revealed between sign language skills and reading development support the notion that sign language skills provide a foundation for emerging reading skills in DHH signing children. In addition, the results also suggest that working memory and Theory of Mind (ToM) are related to reading comprehension in this population. Furthermore, the results indicate that sign language experience enhances the establishment of representations of manual gestures, and that progression in ToM seems to be typical, although delayed, in RSNS pupils. Working memory has a central role in integrating environmental stimuli and language-mediated representations, and thereby provides a platform for cross-modal language processing and multimodal language development.
