Residential End Uses of Water - Peter W. Mayer 1999

The American Water Works Association Research Foundation (AWWARF) and 22 municipalities, water

utilities, water purveyors, water districts and water providers funded this study. Goals of this research included: Providing specific data on the end uses of water in residential settings across the continent; Assembling data on disaggregated indoor and outdoor uses; Identifying variations in water used for each fixture or appliance according to a variety of factors; and Developing predictive models forecast residential water demand. This report represents a time and place snapshot of how water is used in single-family homes in twelve North American locations. Similarities and differences among 'end users' were tabulated for each location, analyzed and summarized. Great care was taken to create a statistically significant representative sample of customer for each of the twelve locations. However, these twelve locations are not statistically representative of all North American locations.

Chapter I presents the rationale for the study and explains the Roueche-Baker Community College Excellence Model depicting the character of MDCC. Chapter II gives a brief history of MDCC and describes the social context of the educational reform program initiated by MDCC in 1975. Chapter III outlines the reforms initiated, planned, and implemented by the MDCC staff in eight basic areas: (1) curriculum, including general education courses; (2) assessment testing; (3) basic skills support; (4) Emphasis on Excellence, an honors program; (5) standards of academic progress; (6) Academic Alert, a feedback system about academic standing; (7) the computerized Advisement and Graduation Information System; and (8) faculty and staff development. Chapter IV presents the results and outcomes of these reforms. Chapters V, VI and VII presents findings regarding the organizational climate, leadership, and teaching at MDCC. The Most Dangerous Game - Richard Connell 2020-04-21

From one of America's most popular short story writers and an Academy Award nominee: the O. Henry Award-winning tale that inspired the movie The Hunt. A subject of mysterious rumors and superstition, the deserted Caribbean Island was shrouded in an air of peril. To Sanger Rainsford, who fell off a yacht and washed up on its shores, the abandoned isle was a welcome paradise. But unknown to the big-game hunter, a predator lurked in its lush jungles—one more dangerous than any he had ever encountered: a human. First published in 1924, this suspenseful tale "has inspired serial killers, films and stirred controversy in schools. A century on, the story continues to thrill" (The Telegraph). "[A] tense, relentless story of man-against-man adventure, in which the hunter Sanger Rainsford learns, at the hands of General Zaroff, what it means to be hunted." —Criterion

Earthbag Building - Kaki Hunter 2004-11-19

The only comprehensive, illustrated, step-by-step guide to building with earthbags. Over seventy percent of Americans cannot afford to own a code-enforced, contractor-built home. This has led to widespread interest in using natural materials-straw, cob, and earth-for building homes and other buildings that are inexpensive, and that rely largely on labor rather than expensive and often environmentally-damaging outsourced materials. Earthbag Building is the first comprehensive guide to all the tools, tricks, and techniques for building with bags filled with earth-or earthbags. Having been introduced to sandbag construction by the renowned Nader Khalili in 1993, the authors developed this "Flexible Form Rammed Earth Technique" over the last decade. A reliable method for constructing homes, outbuildings, garden walls and much more, this enduring, tree-free architecture can also be used to create arched and domed structures of great beauty-in any region, and at home, in developing countries, or in emergency relief work. This profusely illustrated guide first discusses the many merits of earthbag construction, and then leads the reader through the key elements of an earthbag building: Special design considerations Foundations, walls, and floors Electrical, plumbing, and shelving Lintels, windows and door installations Roofs, arches and domes Exterior and interior plasters. With dedicated sections on costs, making your own specialized tools, and building code considerations, as well as a complete resources guide, Earthbag Building is the long-awaited, definitive guide to this uniquely pleasing construction style.
