Diseases and Pathogens of Eucalypts - PJ
Keane 2000-10-25

Over the last fifty years, there has been an
increasing recognition that eucalypts are
vulnerable to a wide range of diseases. They
have suffered destructive epidemics, particularly
of dieback caused by the cinnamon fungus in
native forests, of foliar diseases and cankers in
plantations, and of dieback of remnant trees on

agricultural and grazing land. This has stimulated intensive research into the causes and management of diseases of the eucalypts. This work represents a comprehensive review of our current knowledge of the health and diseases of eucalypts.

Canadian Books in Print - 1997
