Reference Manual for Telecommunications Engineering - Roger L. Freeman 1994

Contains a compendium of the most frequently used data in day-to-day telecommunications engineering work: tables, graphs, figures, formulae, nomograms, performance curves, standards highlights, constants and statistics. Designed for easy and rapid access.

Comprehensive reference for designing, building, purchasing, using or maintaining all kinds of telecommunications systems. Central source of information on transmission, switching, traffic engineering, numbering, signaling, noise, modulation and forward error correction.

Industrial Photography - 1980

Backpacker - 1980-08

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the

gold standard against which all other outdoor-industry awards are measured.

Dictionary of Video and Television

Technology - Keith Jack 2002-09-11

Radio-electronics - 1991

Byte - 1983

PostScript Language Reference Manual - 1990

Broadcast Engineering - 1984

Flash! - Kate Flint 2017-11-28

Flash! presents a fascinating cultural history of flash photography, from its mid-nineteenth century beginnings to the present day. All photography requires light, but the light of flash photography is quite distinctive: artificial, sudden, shocking, intrusive, and extraordinarily bright. Associated with revelation and wonder, it has been linked to the sublimity of lightning. Yet it has also been reviled: it's inseparable from anxieties about intrusion and violence, it creates a visual disturbance, and its effects are often harsh and create exaggerated contrasts. Flash! explores flash's power to reveal shocking social conditions, its impact on the representation of race, its illumination of what would otherwise remain hidden in darkness, and its capacity to put on display the most mundane corners of everyday life. It looks at flash's distinct aesthetics, examines how paparazzi chase celebrities, how flash is intimately linked to crime, how flash has been used to light up - and interrupt - countless family gatherings, how flash can 'stop time' allowing one to photograph rapidly moving objects or freeze in a strobe, and it considers the biggest flash of all, the atomic bomb. Examining the work of professionals and amateurs, news hounds and art photographers, photographers of crime and of wildlife, the volume builds a picture of flash's place in popular culture, and its role in literature and film. Generously illustrated throughout, Flash! brings out the central role of this medium to the history of photography and challenges some commonly held ideas about the nature of photography itself.

Index of Patents Issued from the United States Patent Office - United States. Patent Office 1972

The Apple II Circuit Description - Winston Gayler 1983

The ARRL Extra Class License Manual - Larry D. Wolfgang 2000

Paratus - 1982

Subject to Change - Deirdre Boyle 1997

This is a history of "guerilla television", a form of TV which was part of an alternative media tide sweeping the United States in the 1960s. Inspired by the fracturing issues of the decade and the theories and writings of various exponents, guerilla television put forth "utopian" programming.
