The Climate Majority - Leo Barasi 2017-10-10
The Climate Majority is the first book to investigate climate apathy, to describe how it prevents action to stop climate change and to show how it can be beaten with an approach developed for political campaigns. Leo Barasi argues that dangerous climate change will only be prevented if the majority of people—including those who aren't environmentalists—are persuaded of the need to limit emissions. He applies his policy and campaign experience to show that politicizing climate change makes it more difficult to build consensus, particularly among people who are currently apathetic. This is one of few books to focus on public opinion and climate change and it attempts to reveal what people really think by drawing examples and evidence of from the United States, the UK, Australia, and Canada. In a time of growing nationalism in many developed countries—and right-wing negativity towards the need for meaningful action—The Climate Majority offers

a new way of understanding what can be done within the system, rather than despite it. In an era of political setbacks for sustainability, we need new hope and new tools. Anyone who cares about climate change can draw on the lessons in this book to help build a climate majority. Leo Barasi is a freelance consultant on climate change policy and campaigns. He works with charities, political candidates, and private companies to help them understand and change public opinion. He writes regularly for the New Statesman, openDemocracy, and Climate Home.

Registries for Evaluating Patient Outcomes - Agency for Healthcare Research and Quality/AHRQ 2014-04-01

This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on

registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DECIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and

external independent reviews.

The Politics of Fear - Michiel Hofman

2017-01-05

The 2014-2015 Ebola epidemic in West Africa was an unprecedented medical and political emergency that cast an unflattering light on multiple corners of government and international response. Fear, not rational planning, appeared to drive many decisions made at population and leadership levels, which in turn brought about a response that was as uneven as it was unprecedented: entire populations were decimated or destroyed, vaccine trials were fast-tracked, health staff died, untested medications were used (or not used) in controversial ways, humanitarian workers returned home to enforced isolation, and military was employed to sometimes disturbing ends. The epidemic revealed serious fault lines at all levels of theory and practice of

global public health: national governments were shown to be helpless and unprepared for calamity at this scale; the World Health Organization was roundly condemned for its ineffectiveness; the US quietly created its own African CDC a year after the epidemic began. Amid such chaos, Médecins sans Frontières was forced to act with unprecedented autonomy -- and amid great criticism -- in responding to the disease, taking unprecedented steps in deploying services and advocating for international aid. *The Politics of Fear* provides a primary documentary resource for recounting and learning from the Ebola epidemic. Comprising eleven topic-based chapters and four eyewitness vignettes from both MSF- and non-MSF-affiliated contributors (all of whom have been given access to MSF Ebola archives from Guinea, Sierra Leone, and Liberia for research), it aims to provide a politically agnostic account of the defining health event of the 21st century so far, one that will hopefully inform current

opinions and future responses.

Textbook of Global Health - Anne-Emanuelle

Birn 2017-01-24

THE CRITICAL WORK IN GLOBAL HEALTH,
NOW COMPLETELY REVISED AND UPDATED

"This book compels us to better understand the contexts in which health problems emerge and the forces that underlie and propel them." -

Archbishop Emeritus Desmond Mpilo Tutu

H1N1. Diabetes. Ebola. Zika. Each of these health problems is rooted in a confluence of

social, political, economic, and biomedical factors that together inform our understanding

of global health. The imperative for those who study global health is to understand these

factors individually and, especially,

synergistically. Fully revised and updated, this

fourth edition of Oxford's Textbook of Global

Health offers a critical examination of the array of societal factors that shape health within and

across countries, including how health inequities create consequences that must be addressed by

public health, international aid, and social and economic policymaking. The text equips students, activists, and health professionals with the building blocks for a contextualized understanding of global health, including essential threads that are combined in no other work: · historical dynamics of the field · the political economy of health and development · analysis of the current global health structure, including its actors, agencies, and activities · societal determinants of health, from global trade and investment treaties to social policies to living and working conditions · the role of health data and measuring health inequities · major causes of global illness and death, including under crises, from a political economy of health vantage point that goes beyond communicable vs. non-communicable diseases to incorporate contexts of social and economic deprivation, work, and globalization · the role of trade/investment and financial liberalization, precarious work, and environmental degradation

and contamination · principles of health systems and the politics of health financing · community, national, and transnational social justice approaches to building healthy societies and practicing global health ethically and equitably Through this approach the Textbook of Global Health encourages the reader -- be it student, professional, or advocate -- to embrace a wider view of the global health paradigm, one that draws from political economy considerations at community, national, and transnational levels. It is essential and current reading for anyone working in or around global health.

Putin's Labor Dilemma - Stephen Crowley
2021-07-15

In Putin's Labor Dilemma, Stephen Crowley investigates how the fear of labor protest has inhibited substantial economic transformation in Russia. Putin boasts he has the backing of

workers in the country's industrial heartland, but as economic growth slows in Russia, reviving the economy will require restructuring the country's industrial landscape. At the same time, doing so threatens to generate protest and instability from a key regime constituency. However, continuing to prop up Russia's Soviet-era workplaces, writes Crowley, could lead to declining wages and economic stagnation, threatening protest and instability. Crowley explores the dynamics of a Russian labor market that generally avoids mass unemployment, the potentially explosive role of Russia's monotowns, conflicts generated by massive downsizing in "Russia's Detroit" (Tol'yatti), and the rapid politicization of the truck drivers movement. Labor protests currently show little sign of threatening Putin's hold on power, but the manner in which they are being conducted point to substantial chronic problems that will be difficult to resolve. Putin's Labor Dilemma demonstrates that the Russian economy must

either find new sources of economic growth or face stagnation. Either scenario—market reforms or economic stagnation—raises the possibility, even probability, of destabilizing social unrest.

The Afghanistan Papers - Craig Whitlock
2021-08-31

A Washington Post Best Book of 2021 The #1 New York Times bestselling investigative story of how three successive presidents and their military commanders deceived the public year after year about America's longest war, foreshadowing the Taliban's recapture of Afghanistan, by Washington Post reporter and three-time Pulitzer Prize finalist Craig Whitlock. Unlike the wars in Vietnam and Iraq, the US invasion of Afghanistan in 2001 had near-unanimous public support. At first, the goals were straightforward and clear: defeat al-Qaeda and prevent a repeat of 9/11. Yet soon after the United States and its allies removed the Taliban from power, the mission veered off course and

US officials lost sight of their original objectives. Distracted by the war in Iraq, the US military become mired in an unwinnable guerrilla conflict in a country it did not understand. But no president wanted to admit failure, especially in a war that began as a just cause. Instead, the Bush, Obama, and Trump administrations sent more and more troops to Afghanistan and repeatedly said they were making progress, even though they knew there was no realistic prospect for an outright victory. Just as the Pentagon Papers changed the public's understanding of Vietnam, The Afghanistan Papers contains "fast-paced and vivid" (The New York Times Book Review) revelation after revelation from people who played a direct role in the war from leaders in the White House and the Pentagon to soldiers and aid workers on the front lines. In unvarnished language, they admit that the US government's strategies were a mess, that the nation-building project was a colossal failure, and that drugs and corruption

gained a stranglehold over their allies in the Afghan government. All told, the account is based on interviews with more than 1,000 people who knew that the US government was presenting a distorted, and sometimes entirely fabricated, version of the facts on the ground. Documents unearthed by The Washington Post reveal that President Bush didn't know the name of his Afghanistan war commander—and didn't want to meet with him. Secretary of Defense Donald Rumsfeld admitted that he had “no visibility into who the bad guys are.” His successor, Robert Gates, said: “We didn't know jack shit about al-Qaeda.” The Afghanistan Papers is a “searing indictment of the deceit, blunders, and hubris of senior military and civilian officials” (Tom Bowman, NRP Pentagon Correspondent) that will supercharge a long-overdue reckoning over what went wrong and forever change the way the conflict is remembered.

Living Wages and the Welfare State - Wilson, Shaun 2021-05-10

Are living wages an unaffordable and unwieldy aspiration or a key progressive reform? Demands for fair minimum incomes have dominated national debates amid the COVID-19 pandemic. This topical book addresses the rapidly shifting politics of minimum wages in US, the UK, New Zealand, Canada, Ireland and Australia, where workfare has compelled many to find low-income work and where neoliberal thinking about minimum wages has prevailed. Analysing minimum wage policies within a political-economy narrative, this innovative book offers an alternative to the Basic Income narrative and identifies the success of Living Wage campaigns as central to welfare state change.

Politics of the Pantry - Emily E. LB. Twarog
2017-09-15

The history of women's political involvement has focused heavily on electoral politics, but throughout the twentieth century women engaged in grassroots activism when they found it increasingly challenging to feed their families and balance their household ledgers. Politics of the Pantry examines how working- and middle-class American housewives used their identity as housewives to protest the high cost of food. In doing so, housewives' relationships with the state evolved over the course of the century. Shifting the focus away from the workplace as a

site of protest, Emily E. LB. Twarog looks to the homefront as a starting point for protest in the public sphere. With a focus on food consumption rather than production, Twarog looks closely at the ways food--specifically meat--was used by women as a political tool. Engaging in domestic politics, housewives both challenged and embraced the social and economic order as they sought to craft a unique political voice and build a consumer movement focused on the home. The book examines key moments when women used consumer actions to embrace their socially ascribed roles as housewives to demand economic stability for their families and communities. These include the Depression-era meat boycott of 1935, the consumer coalitions of the New Deal, and the wave of consumer protests between 1966 and 1973. Twarog introduces numerous labor and consumer activists and their organizations in both urban and suburban areas--Detroit, greater Chicago, Long Island, and Los Angeles.

Tex[t]-Mex - William Anthony Nericcio 2007
“Marvels! Rompecabezas! And cartoons that bite into the mind appear throughout this long-awaited book that promises to reshape and refocus how we see Mexicans in the Americas and how we are taught and seduced to mis/understand our human potentials for solidarity. This is the closest Latin@ studies has come to a revolutionary vision of how American culture works through its image machines, a vision that cuts through to the roots of the U.S. propaganda archive on Mexican, Tex-Mex, Latino, Chicano/a humanity. Nericcio exposes, deciphers, historicizes, and 'cuts-up' the postcards, movies, captions, poems, and adverts that plaster dehumanization (he calls them 'miscegenated semantic oddities') through our brains. For him, understanding the sweet and sour hallucinations is not enough. He wants the flashing waters of our critical education to

become instruments of restoration. In this book, Walter Benjamin meets Italo Calvino and they morph into Nericcio. Orale! -David Carrasco, Harvard University A rogues' gallery of Mexican bandits, bombshells, lotharios, and thieves saturates American popular culture. Remember Speedy Gonzalez? “Mexican Spitfire” Lupe Vélez? The Frito Bandito? Familiar and reassuring—at least to Anglos—these Mexican stereotypes are not a people but a text, a carefully woven, articulated, and consumer-ready commodity. In this original, provocative, and highly entertaining book, William Anthony Nericcio deconstructs Tex[t]-Mexicans in films, television, advertising, comic books, toys, literature, and even critical theory, revealing them to be less flesh-and-blood than “seductive hallucinations,” less reality than consumer products, a kind of “digital crack.” Nericcio engages in close readings of rogue/icons Rita Hayworth, Speedy Gonzalez, Lupe Vélez, and Frida Kahlo, as well as Orson Welles' film Touch

of Evil and the comic artistry of Gilbert Hernandez. He playfully yet devastatingly discloses how American cultural creators have invented and used these and other Tex[t]-Mexicans since the Mexican Revolution of 1910, thereby exposing the stereotypes, agendas, phobias, and intellectual deceits that drive American popular culture. This sophisticated, innovative history of celebrity Latina/o mannequins in the American marketplace takes a quantum leap toward a constructive and deconstructive next-generation figuration/adoration of Latinos in America.

Conspicuous Consumption in Africa - Ilana van Wyk 2019-05-01

From early department stores in Cape Town to gendered histories of sartorial success in urban Togo, contestations over expense accounts at an apartheid state enterprise, elite wealth and political corruption in Angola and Zambia, the role of popular religion in the political intransigence of Jacob Zuma, funerals of big men

in Cameroon, youth cultures of consumption in Niger and South Africa, queer consumption in Cape Town, middle-class food consumption in Durban and the consumption of luxury handcrafted beads, this collection of essays explores the ways in which conspicuous consumption is foregrounded in various African contexts and historical moments. The essays in *Conspicuous Consumption in Africa* put Thorstein Veblen's concept under robust critical scrutiny, delving into the pleasures, stresses and challenges of consuming in its religious, generational, gendered and racialised aspects, revealing conspicuous consumption as a layered set of practices, textures and relations. This volume shows how central and revealing conspicuous consumption can be to fathoming the history of Africa's projects of modernity, and their global lineages and legacies. In its grounded, up-close case studies, it is likely to feed into current public debates on the nature and future of African societies - South African

society in particular.

Pain Management and the Opioid Epidemic

- National Academies of Sciences, Engineering, and Medicine 2017-10-28

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science

on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring. Eskom - Sylvy Jaglin 2016-08-16

Africa's leading producer of electricity, Eskom Holdings SOC Ltd, is also a vertically integrated monopoly, owned by the South African state. This national champion was shaken in 2008, when it was obliged to introduce 'load shedding', or rolling blackouts, and again in late 2014. Trying to understand how and why one of the iconic pillars of South African state capitalism is now in distress, the authors of this book argue that the so-called electricity crisis is in fact a public monopoly crisis. Moving beyond technical aspects, they explore the relationship between state power and Eskom before, during and after apartheid. From this perspective, they suggest that the current technical and financial troubles of this public utility are illustrative of the weakening of its technopolitical regime, of how

national institutions have governed Eskom's technological development, and of the pursuit of political goals in the production of electrical power. Without a clear industrial strategy during the 2000s, Eskom became a powerful tool of Broad-Black Economic Empowerment as well as a neopatrimonial system which generates profits captured by the ruling party. As a result, crisis in Eskom shakes the whole political edifice. Inefficient and its finances increasingly under scrutiny, this state-owned enterprise's existence as a monopolistic public utility is regularly a subject of debate. The authors discuss the ambivalent role of Eskom in the national energy transition policy and whether solutions point in the direction of de-integrating this public monopoly and allowing its current technopolitical regime to enter a planned or natural decline.

Putin's People - Catherine Belton 2020-06-23
A New York Times and Sunday Times bestseller |
A New York Times Book Review Editors' Choice

Named a best book of the year by The Economist | Financial Times | New Statesman | The Telegraph "[Putin's People] will surely now become the definitive account of the rise of Putin and Putinism." —Anne Applebaum, The Atlantic "This riveting, immaculately researched book is arguably the best single volume written about Putin, the people around him and perhaps even about contemporary Russia itself in the past three decades." —Peter Frankopan, Financial Times Interference in American elections. The sponsorship of extremist politics in Europe. War in Ukraine. In recent years, Vladimir Putin's Russia has waged a concerted campaign to expand its influence and undermine Western institutions. But how and why did all this come about, and who has orchestrated it? In Putin's People, the investigative journalist and former Moscow correspondent Catherine Belton reveals the untold story of how Vladimir Putin and the small group of KGB men surrounding him rose to power and looted their country. Delving deep

into the workings of Putin's Kremlin, Belton accesses key inside players to reveal how Putin replaced the freewheeling tycoons of the Yeltsin era with a new generation of loyal oligarchs, who in turn subverted Russia's economy and legal system and extended the Kremlin's reach into the United States and Europe. The result is a chilling and revelatory exposé of the KGB's revanche—a story that begins in the murk of the Soviet collapse, when networks of operatives were able to siphon billions of dollars out of state enterprises and move their spoils into the West.
