Freedom from Want - George Kent
2005-06-02

There is, literally, a world of difference between the statements "Everyone should have adequate food," and "Everyone has the right to adequate food." In George Kent's view, the lofty rhetoric

of the first statement will not be fulfilled until we take the second statement seriously. Kent sees hunger as a deeply political problem. Too many people do not have adequate control over local resources and cannot create the circumstances that would allow them to do meaningful, productive work and provide for themselves. The human right to an adequate livelihood, including the human right to

adequate food, needs to be implemented worldwide in a systematic way. Freedom from Want makes it clear that feeding people will not solve the problem of hunger, for feeding programs can only be a short-term treatment of a symptom, not a cure. The real solution lies in empowering the poor. Governments, in particular, must ensure that their people face enabling conditions that allow citizens to provide for themselves. In a wider sense, Kent brings an understanding of human rights as a universal system, applicable to all nations on a global scale. If, as Kent argues, everyone has a human right to adequate food, it follows that those who can empower the poor have a duty to see that right implemented, and the obligation to be held morally and legally accountable, for seeing that that right is realized for everyone, everywhere.

Managed by the Markets -

Gerald F. Davis 2009-03-26

The current economic crisis reveals just how central

finance has become to American life. Problems with obscure securities created on Wall Street radiated outward to threaten the retirement security of pensioners in Florida and Arizona, the homes and college savings of families in Detroit and Southern California, and ultimately the global economy itself. The American government took on vast new debt to bail out the financial system, while the government-owned investment funds of Kuwait, Abu Dhabi, Malaysia, and China bought up much of what was left of Wall Street. How did we get into this mess, and what does it all mean? *Managed by the Markets* explains how finance replaced manufacturing at the center of the American economy and how its influence has seeped into daily life. From corporations operated to create shareholder value, to banks that became portals to financial markets, to governments seeking to regulate or profit from footloose capital, to households with savings, pensions, and mortgages that

rise and fall with the market, life in post-industrial America is tied to finance to an unprecedented degree. *Managed by the Markets* provides a guide to how we got here and unpacks the consequences of linking the well-being of society too closely to financial markets.

Impacts of Sex Crime Laws on the Female Partners of Convicted Offenders - Lisa Anne Zilney 2020

This work is an exploratory examination of the experiences, motivations, and coping mechanisms of women who are involved in intimate relationships with registered sexual offenders. The study focuses both on women who were involved with an offender prior to the commission of his offense and who stayed with him post-conviction, and on women who became involved with a registered offender after his sex offense conviction. Like the offender himself, these women face a variety of challenges in responding to treatment of them by friends, family, the community, and the

criminal justice system. Utilizing the results of intensive interviews, this work provides a unique look at the women who are one of the few sources of support for registered sexual offenders and assesses the effectiveness and wide-ranging implications of community notification and registration laws on public safety, policy, and practice. This work offers alternative approaches based on evidence and case studies and considers the significance of familial contact in buffering sexual recidivism. These women are the heretofore unstudied victims of sexual offending legislation. This book is essential reading for those in sociology, criminology, psychology, and social work. For undergraduate or graduate students, practitioners, researchers, or policy makers, this thought-provoking book will shed light on how to optimize the reintegration of sex offenders. It assesses the effectiveness and wide-ranging implications of sex offender legislation on public safety,

policy, and practice and considers alternative approaches to reduce sexual violence.

Equality of Opportunity for Sexual and Gender Minorities -

Clifton Cortez 2021-12-02

Despite legal and social advances in the past two decades, sexual orientation and gender identity (SOGI) people continue to face widespread discrimination and violence in many countries. This discrimination and violence lead to exclusion, which adversely impacts their lives, as well as the communities and economies in which they live. A major barrier to addressing this stigma and sexual orientation and gender identity-based exclusion is the lack of SOGI-specific data. Robust, quantitative data on differential development experiences and outcomes of sexual and gender minorities--especially those in developing countries--is extremely thin. This paucity of data jeopardizes the achievement of the Sustainable Development Goals and countries' commitment to

the principle of 'leaving no one behind' in the effort to end poverty and inequality.

'Equality of Opportunity for Sexual and Gender Minorities' assesses the unique challenges that sexual and gender minorities face in six important areas: (i) Criminalization and SOGI (ii) Access to education (iii) Access to the labor market (iv) Access to public services and social protection (v) Civil and political inclusion (vi) Protection from hate crimes.

This report covers numerous policy recommendations to prevent and eliminate discriminatory practices in all of the areas covered. It also seeks to influence legislative changes and support research on institutions and regulations that can ultimately lead to poverty reduction and shared prosperity. At the same time, it acknowledges that the mere existence of inclusive laws and regulations does not ensure that sexual and gender minorities are free from discrimination--the enforcement of those laws is crucial. This publication, the

first in a series of studies, will be expanded from the 16 countries included here to a wider set of countries for more in-depth quantitative analysis and to identify possible correlations with socioeconomic outcomes. It will seek to deepen knowledge, facilitate peer learning of good practices, and encourage reforms to increase the inclusion of sexual and gender minorities.

Practice Guideline for the Treatment of Patients with Schizophrenia - American Psychiatric Association 1997
Developed by experts on schizophrenia and exhaustively reviewed by APA members, the

"American Psychiatric Association Practice Guideline for the Treatment of Patients With Schizophrenia" provides therapists with a set of patient care strategies that will aid their clinical decision making. The guideline describes the best and most appropriate treatments available to patients with schizophrenia, including psychopharmacological treatments, ECT, and psychosocial and community interventions. It delineates the process of treatment planning and identifies areas in which research may improve our understanding and management of this condition. This guideline will also help managed care organizations develop more scientifically based and clinically sensitive criteria for the utilization and reimbursement of psychiatric services. Armed with these guidelines, clinicians can improve the care of their patients with schizophrenia and enable them to lead happier and more productive lives.

Undoing Gender - Judith Butler

2004-10-22

Undoing Gender constitutes Judith Butler's recent reflections on gender and sexuality, focusing on new kinship, psychoanalysis and the incest taboo, transgender, intersex, diagnostic categories, social violence, and the tasks of social transformation. In terms that draw from feminist and queer theory, Butler considers the norms that govern--and fail to govern--gender and sexuality as they relate to the constraints on recognizable personhood. The book constitutes a reconsideration of her earlier view on gender performativity from Gender Trouble. In this work, the critique of gender norms is clearly situated within the framework of human persistence and survival. And to "do" one's gender in certain ways sometimes implies "undoing" dominant notions of personhood. She writes about the "New Gender Politics" that has emerged in recent years, a combination of movements concerned with transgender, transsexuality, intersex, and

their complex relations to feminist and queer theory.

History and Hope - Kevin M. Cahill 2013-05-01

The International Humanitarian Affairs Reader is a compilation of the most important chapters in the ten volume series published on this topic by Fordham University Press. Each chapter selected has been edited to delete dated material; where appropriate, chapters will have a brief addendum to present current information. The Series Editor, Kevin M. Cahill M.D., will write a substantial introductory essay explaining the academic evolution of the discipline of international humanitarian assistance. It will focus on the "Fordham Experience"--its Institute of International Humanitarian Affairs (IIHA)

has developed practical programs for training field workers, especially those dealing with complex emergencies following conflicts, man-made or natural disasters. The book series has been an essential part of this effort. The new International Humanitarian Affairs Reader will be divided into seven sections, each introduced by a "link" page providing continuity for the text. There will be extensive appendices to assist in finding basic acronyms, abbreviations, important conventions, treaties and accepted standards. One appendix will also provide the full table of contents for each volume in the series, and all chapters are available for digital download. The International Humanitarian Affairs Reader, scheduled for publication in Spring 2013, should provide the growing number of people--both within and outside academia--with a better understanding of the multi-faceted demands posed by humanitarian assistance programs. At Fordham

University there are programs at both the undergraduate (Minor) and graduate (Masters) levels. Fordham's innovative, very intense, one-month residential course for experienced humanitarian workers--the International Diploma in Humanitarian Assistance (IDHA)--is recognized worldwide. The Institute now has over 2000 graduates from 133 nations. Contributors to The International Humanitarian Affairs Reader include many of the leading figures in international diplomacy, relief and refugee operations, conflict resolution and reconciliation, and transition from disaster to stability and development, from the chaos of war to peace.

Weather Station Handbook-- - Arnold I. Finklin 1990

Golden Gulag - Ruth Wilson Gilmore 2007-01-08
Since 1980, the number of

people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called "the biggest prison building project in the history of the world." Golden Gulag provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles, weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated

young people of color, and the increase in punitive justice such as the "three strikes" law—pose profound and troubling questions for the future of California, the United States, and the world. Golden Gulag provides a rich context for this complex dilemma, and at the same time challenges many cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion.

The 1.5 Billion People

Question - Harold Alderman
2017-10-12

Most of the people in low and middle-income countries covered by social protection receive assistance in the form of in-kind food. The origin of such support is rooted in countries' historical pursuit of three interconnected objectives, namely attaining self-sufficiency in food, managing domestic food prices, and providing income support to the poor. This volume sheds light on the complex, bumpy and non-linear process of how some flagship food-based social protection programs have evolved over time, and how they currently work. In particular, it lays out the broad trends in reforms, including a growing move from in-kind modalities to cash transfers, from universality to targeting, and from agriculture to social protection. Case studies from Egypt, India, Indonesia, Mexico, Sri Lanka, and United States document the specific experiences of

managing the process of reform and implementation, including enhancing our understanding of the opportunities and challenges with different social protection transfer modalities.

Freedom in the World 2009 - Arch Puddington 2009-09-30
Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 193 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World

political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

As participants, citizens assumed the standing of informants and readers."

The Beauty Myth - Naomi Wolf 2009-03-17

The bestselling classic that redefined our view of the relationship between beauty and female identity. In today's world, women have more power, legal recognition, and professional success than ever before. Alongside the evident progress of the women's movement, however, writer and journalist Naomi Wolf is troubled by a different kind of social control, which, she argues, may prove just as restrictive as the traditional image of homemaker and wife. It's the beauty myth, an obsession with physical perfection that traps the modern woman in an endless spiral of hope, self-consciousness, and self-hatred as she tries to fulfill society's impossible definition of "the flawless beauty."

Your Post Has Been Removed - Frederik Stjernfelt 2019-01-01

This open access monograph argues established democratic norms for freedom of expression should be implemented on the internet. Moderating policies of tech companies as Facebook, Twitter and Google have resulted in posts being removed on an industrial scale. While this moderation is often encouraged by governments - on the pretext that terrorism, bullying, pornography, "hate speech" and "fake news" will slowly disappear from the internet - it enables tech companies to censor our society. It is the social media companies who define what is blacklisted in their community standards. And given the dominance of social media in our information society, we run the risk of outsourcing the definition of our principles for discussion in the public domain to private companies. Instead

of leaving it to social media companies only to take action, the authors argue democratic institutions should take an active role in moderating criminal content on the internet. To make this possible, tech companies should be analyzed whether they are approaching a monopoly. Antitrust legislation should be applied to bring those monopolies within democratic governmental oversight. Despite being in different stages in their lives, Anne Mette is in the startup phase of her research career, while Frederik is one of the most prolific philosophers in Denmark, the authors found each other in their concern about Free Speech on the internet. The book was originally published in Danish as *Dit opslag er blevet fjernet - techgiganter & ytringsfrihed*. Praise for 'Your Post has been Removed' "From my perspective both as a politician and as private book collector, this is the most important non-fiction book of the 21st Century. It should be

disseminated to all European citizens. The learnings of this book and the use we make of them today are crucial for every man, woman and child on earth. Now and in the future." Jens Rohde, member of the European Parliament for the Alliance of Liberals and Democrats for Europe "This timely book compellingly presents an impressive array of information and analysis about the urgent threats the tech giants pose to the robust freedom of speech and access to information that are essential for individual liberty and democratic self-government. It constructively explores potential strategies for restoring individual control over information flows to and about us. Policymakers worldwide should take heed!" Nadine Strossen, Professor, New York Law School. Author, *HATE: Why We Should Resist It with Free Speech, Not Censorship*.
Marihuana - E.L. Abel
2013-06-29
Of all the plants men have ever grown, none has been praised

and denounced as often as marihuana (*Cannabis sativa*). Throughout the ages, marihuana has been extolled as one of man's greatest benefactors and cursed as one of his greatest scourges. Marihuana is undoubtedly a herb that has been many things to many people. Armies and navies have used it to make war, men and women to make love. Hunters and fishermen have snared the most ferocious creatures, from the tiger to the shark, in its herculean weave. Fashion designers have dressed the most elegant women in its supple knit. Hangmen have snapped the necks of thieves and murderers with its fiber. Obstetricians have eased the pain of childbirth with its leaves. Farmers have crushed its seeds and used the oil within to light their lamps. Mourners have thrown its seeds into blazing fires and have had their sorrow transformed into blissful ecstasy by the fumes that filled the air. Marihuana has been known by many names: hemp, hashish, dagga, bhang, loco

weed, grass-the list is endless. Formally christened *Cannabis sativa* in 1753 by Carl Linnaeus, marihuana is one of nature's hardiest specimens. It needs little care to thrive. One need not talk to it, sing to it, or play soothing tranquil Brahms lullabies to coax it to grow. It is as vigorous as a weed. It is ubiquitous. It flourishes under nearly every possible climatic condition.

Remediation in Medical Education -

Adina Kalet 2013-11-26

Remediation in medical education is the act of

facilitating a correction for trainees who started out on the journey toward becoming excellent physicians but have moved off course. This book offers an evidence-based and practical approach to the identification and remediation of medical trainees who are unable to perform to standards. As assessment of clinical competence and professionalism has become more sophisticated and ubiquitous, medical educators increasingly face the challenge of implementing effective and respectful means to work with trainees who do not yet meet expectations of the profession and society. Remediation in Medical Education: A Mid-Course Correction describes practical stepwise approaches to remediate struggling learners in fundamental medical competencies; discusses methods used to define competencies and the science underlying the fundamental shift in the delivery and assessment of medical education; explores themes that provide context for

remediation, including professional identity formation and moral reasoning, verbal and nonverbal learning disabilities, attention deficit disorders in high-functioning individuals, diversity, and educational and psychiatric topics; and reviews system issues involved in remediation, including policy and leadership challenges and faculty development.

THE MAN VERSUS THE STATE - Herbert Spencer 1916

Pandemic Exposures - Fassin Didier 2021-11

An illuminating, indispensable analysis of a watershed moment and its possible aftermath. For people and governments around the world, the onset of the COVID-19 pandemic seemed to place the preservation of human life at odds with the pursuit of economic and social life. Yet this naive alternative belies the complexity of the entanglements the crisis has created and revealed not just between health and wealth but also around morality, knowledge, governance, culture, and everyday subsistence. Didier Fassin and Marion Fourcade have assembled an eminent team of scholars from across the social sciences to reflect on the myriad ways SARS-CoV-2 has entered, reshaped, or

exacerbated existing trends and structures in every part of the globe. The contributors show how the disruptions caused by the pandemic have both hastened the rise of new social divisions and hardened old inequalities and dilemmas. An indispensable volume, *Pandemic Exposures* provides an illuminating analysis of this watershed moment and its possible aftermath.

Building Blocks for Liberty -

The United Nations, Peace and Security - Ramesh Thakur

2006-06-08

Preventing humanitarian atrocities is becoming as important for the United Nations as dealing with inter-state war. In this book, Ramesh Thakur examines the transformation in UN operations, analysing its changing role and structure. He asks why, when and how force may be used and argues that the growing gulf between legality and legitimacy is evidence of an eroded sense of international community. He considers the tension between

the US, with its capacity to use force and project power, and the UN, as the centre of the international law enforcement system. He asserts the central importance of the rule of law and of a rules-based order focused on the UN as the foundation of a civilised system of international relations. This book will be of interest to students of the UN and international organisations in politics, law and international relations departments, as well as policymakers in the UN and other NGOs.

Against Love - Laura Kipnis

2009-01-16

Who would dream of being against love? No one. Love is, as everyone knows, a mysterious and all-controlling force, with vast power over our thoughts and life decisions. But is there something a bit worrisome about all this uniformity of opinion? Is this the one subject about which no disagreement will be entertained, about which one truth alone is permissible? Consider that the most powerful organized religions

produce the occasional heretic; every ideology has its apostates; even sacred cows find their butchers. Except for love. Hence the necessity for a polemic against it. A polemic is designed to be the prose equivalent of a small explosive device placed under your E-Z-Boy lounge. It won't injure you (well not severely); it's just supposed to shake things up and rattle a few convictions.

The report presents the latest assessment of global trends in wildlife crime. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin

scales, live reptiles, tigers and other big cats, and European eel. The COVID-19 (coronavirus) pandemic has highlighted that wildlife crime is a threat not only to the environment and biodiversity, but also to human health, economic development and security. Zoonotic diseases - those caused by pathogens that spread from animals to humans - represent up to 75% of all emerging infectious diseases. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of infection.
