Handbook of Second Language Assessment - Dina Tsagari
2016-03-07

Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment with chapters on the purposes of assessment, and standards and frameworks, as well as matters of scoring,

quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of 'voice' in second language assessment, and assessment literacy for teachers and other test and score users.

Assessing Young Learners of English: Global and Local Perspectives - Marianne Nikolov 2015-10-29

This volume documents international, national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate 'can do statements' and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing, self-perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English

to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.

Learning - National Research Council 1999-10-06
State education departments and school districts face an important challenge in implementing a new law that requires disadvantaged students to be held to the same standards as other students. The new requirements come from provisions of the 1994 reauthorization of Title I, the largest federal effort in precollegiate education, which provides aid to "level the field" for disadvantaged students. Testing, Teaching, and Learning is written to help states and school districts comply with the new law, offering guidance for designing and implementing assessment and accountability systems. This book examines standards-based education reform and reviews the research on student assessment, focusing on the needs of disadvantaged students covered by Title I. With examples of states and districts that have track records in new systems, the committee develops a practical "decision framework" for

education officials. The book explores how best to design assessment and accountability systems that support high levels of student learning and to work toward continuous improvement. Testing, Teaching, and Learning will be an important tool for all involved in educating disadvantaged students"state and local administrators and classroom teachers.

Functions of Written Tests in EFL Classes in Primary School - Viktoryia Schulz 2019-06-19
Seminar paper from the year 2019 in the subject English - Pedagogy, Didactics, Literature Studies, grade: 10, University of Frankfurt (Main) (Institut für England- und Amerikastudien), course: Testing, Evaluating and Assessment: Theory into Practice, language: English, abstract: The term paper focuses on written tests and their functions in EFL classes in primary school. Regarding the peculiarities of EFL classes in primary classroom, the main function of written tests will be outlined. Börner and Edelhoff

specify the functions of written tests in primary school. They point out diagnostic, (forward) guidance, comparison and (value) judgement functions. In the course of the term paper the exemplary written test is investigated regarding its diagnostic function. The subject English as a foreign language [EFL] belongs since 2005/2006 to the curriculum of primary school in whole Germany. The EU research study of 2007 on early language learning, education quality and pedagogical principles states that early foreign language acquisition is favoured over the late one, as the younger students are intrinsically motivated and have a positive attitude to EFL acquisition process. EFL acquisition in primary school usually begins in the third grade and aims to provide the first experiences with learning a foreign language. Nevertheless, these first experiences are to be assessed and the students are to be provided with feedback. This procedure demands a large

amount of effort and reflection time on the teacher's side, considering the communicative character and some other peculiarities of EFL classes in primary school.

Correspondingly, the topic challenges many teachers while teaching EFL in primary classroom. Therefore, the ways to facilitate this challenge are sought. A written test is an assessment form that manage the challenge and can be easily used in primary school.

Constructively, the exemplary test will be reviewed, if this specific function is realised. Therefore, the central question of the term paper is how far the exemplary test aids the realisation of the diagnostic function. The analysis and the following reflection of the exemplary test are grounded on the sources Brown and Abeywickrama 'Language Assessment: Principles and Classroom Practices' and of K uchler and Roters 'Embracing Everyone: Inklusiver Fremdsprachenunterricht'. *Examining Young Learners: Research and Practice in*

Emotions and English Language Teaching - Sarah Benesch 2017-02-17

Taking a critical approach that considers the role of power, and resistance to power, in teachers' affective lives, Sarah Benesch examines the relationship between English language teaching and emotions in postsecondary classrooms. The exploration takes into account implicit feeling rules that may drive institutional expectations of teacher performance and affect teachers' responses to and decisions about pedagogical matters. Based on interviews with postsecondary English language teachers, the book analyzes ways in which they negotiate tension—theorized as emotion labor—between feeling

rules and teachers' professional training and/or experience, in particularly challenging areas of teaching: high-stakes literacy testing; responding to student writing; plagiarism; and attendance. Discussion of this rich interview data offers an expanded and nuanced understanding of English language teaching, one positing teachers' emotion labor as a framework for theorizing emotions critically and as a tool of teacher agency and resistance.

examined field of diagnosis in second and foreign language reading. This volume examines the development of second and foreign language reading and how subsequent research findings, couched in this knowledge, can help facilitate a more-informed teaching approach in second and foreign language classrooms. By contextualizing the latest in classroom settings and presenting implications for future research in this developing area of linguistics, this book is an ideal resource for those studying and working in applied linguistics, second language acquisition, and language assessment and education. About the NPLA Series: Headed by two of its leading scholars, the series captures the burgeoning field of language assessment by offering comprehensive and state-of-the-art coverage of its contemporary questions, pressing issues, and technical advances. It is the only active series of its kind on the market, and will include volumes on basic and advanced topics in

language assessment, public policy and language assessment, and the interfaces of language assessment with other disciplines in applied linguistics. Each text presents key theoretical approaches and research findings, along with concrete practical implications and suggestions for readers conducting their own research or developmental studies.

Learning Foreign Languages in Primary School - María del

Pilar García Mayo 2017-06-16

This book presents research on the learning of foreign languages by children aged 6-12 years old in primary school settings. The collection provides a significant and important contribution to this often overlooked domain and aims to provide research-based evidence that might help to inform and develop pedagogical practice. Topics covered in the chapters include the influence of learner characteristics on word

retrieval; explicit second language learning and language awareness; meaning construction; narrative oral development; conversational interaction and how it relates to individual variables; first language use; feedback on written production; intercultural awareness raising and feedback on diagnostic assessment. It will be of interest to undergraduate and graduate students, researchers, teachers and stakeholders who are interested in research on how children learn a second language at primary school.
