The Calendar in Revolutionary France - Sanja Perovic 2012-08-27

One of the most unusual decisions of the leaders of the French Revolution - and one that had immense practical as well as symbolic impact - was to abandon customarily-accepted ways of calculating date and time to create a Revolutionary calendar. The experiment lasted from 1793 to 1805, and prompted all sorts of questions about the nature of time, ways of measuring it and its relationship to individual, community, communication and creative life. This study traces the course of the Revolutionary Calendar, from its cultural origins to its decline and fall. Tracing the parallel stories of the calendar and the literary genius of its creator, Sylvain Maréchal, from the Enlightenment to the Napoleonic era, Sanja Perovic reconsiders the status of the French Revolution as the purported 'origin' of modernity, the modern experience of time, and the relationship between the imagination and political action.

Ninety-Three - Victor Hugo 2016-08-19

Published in 1874, "Ninety-Three" was French writer Victor Hugo's last novel published immediately subsequent to the bloody Paris Commune. It deals with the counter-revolutionary revolts in 1793 during the French Revolution, namely those in the Vendée and Chouannerie. "Ninety-Three" is split into three parts, with each part telling a different story and offering a different view of historical events. Highly recommended for those with an interest in French history and the seminal works of Victor Hugo. Victor Marie Hugo (1802 - 1885) was a French novelist, dramatist, and poet belonging to the Romantic movement. He is widely hailed as one of the most accomplished and well-known French writers, originally achieving renown for his poetical endeavours—the most notable of which are the volumes "Les Contemplations" and "La Légende des siècles". Outside of his native country, Hugo's best-known works are his novels: "Les Misérables" (1862) and "Notre-Dame de Paris" (1831). Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this book now in an affordable, high-quality, modern edition complete with a specially commissioned new biography of the author.

Translation and Conflict - Mona Baker 2018-10-25

Translation and Conflict was the first book to demonstrate that translators and interpreters participate in circulating as well as resisting the narratives that create the intellectual and moral environment for violent conflict and social tensions. Drawing on narrative theory and with numerous examples from historical and current contexts of conflict, Mona Baker provides an original and coherent model of analysis that pays equal attention to the circulation of narratives in translation and to questions of dominance and resistance. With a new preface by Sue-Ann Harding, Translation and Conflict is more than ever the essential text for any student or researcher interested in the study of translation and social movements.

The Cambridge History of French Thought - Michael Moriarty 2019-05-30

French thinkers have revolutionized European thought about knowledge, religion, politics, and society. Delivering a comprehensive history of thought in France from the Middle Ages to the present, this book follows themes and developments of thought across the centuries. It provides readers with studies of both systematic thinkers and those who operate less systematically, through essays or fragments, and places them all in their many contexts. Informed by up-to-date research, these accessible chapters are written by prominent experts in their fields who investigate key concepts in non-technical language. Chapters feature treatments of specific thinkers as individuals including Voltaire, Rousseau, Descartes and Derrida, but also more general movements and schools of thought from humanism to liberalism, via the Enlightenment, Romanticism, Marxism, and feminism. Furthermore, the influence of gender, race, empire and slavery are investigated to offer a broad and fulfilling account of French thought throughout the ages.

The Atheist's Bible: Diderot's 'Éléments de physiologie' - Caroline Warman 2020-11-16

'Love is harder to explain than hunger, for a piece of fruit does not feel the desire to be eaten': Denis Diderot's *Éléments de physiologie* presents a world in flux, turning on the relationship between man, matter and mind. In this late work, Diderot delves playfully into the relationship between bodily sensation, emotion and perception, and asks his readers what it means to be human in the absence of a soul. The Atheist's Bible challenges prevailing scholarly views on Diderot's *Éléments*, asserting its contemporary philosophical importance, and prompting its readers to inspect more closely this little-known and little-studied work. In this timely volume, Warman establishes the place of Diderot's *Éléments* in the trajectory of materialist theories of nature and the mind stretching back to Epicurus and Lucretius, and explores the fascinating reasons behind scholarly neglect of this seminal work. In turn, Warman outlines the hitherto unacknowledged dissemination and reception of Diderot's *Éléments*, demonstrating how Diderot's *Éléments* was circulated in manuscript-form as early as the 1790s, thus showing how the text came to influence the next generations of materialist thinkers. This book is accompanied by a digital edition of

Jacques-André Naigeon's Mémoires historiques et philosophiques sur la vie et les ouvrages de Denis Diderot (1823), a work which, Warman argues, represents the first publication of Diderot's *Éléments*, long before its official publication date of 1875. The *Atheist's Bible* constitutes a major contribution to the field of Diderot studies, and will be of further interest to scholars and students of materialist natural philosophy in the Age of Enlightenment and beyond.

The French Revolution - Ian Davidson 2016-08-25

The fall of the Bastille on July 14, 1789 has become the commemorative symbol of the French Revolution. But this violent and random act was unrepresentative of the real work of the early revolution, which was taking place ten miles west of Paris, in Versailles. There, the nobles, clergy and commoners of France had just declared themselves a republic, toppling a rotten system of aristocratic privilege and altering the course of history forever. The Revolution was led not by angry mobs, but by the best and brightest of France's growing bourgeoisie: young, educated, ambitious. Their aim was not to destroy, but to build a better state. In just three months they drew up a Declaration of the Rights of Man, which was to become the archetype of all subsequent Declarations worldwide, and they instituted a system of locally elected administration for France which still survives today. They were determined to create an entirely new system of government, based on rights, equality and the rule of law. In the first three years of the Revolution they went a long way toward doing so. Then came Robespierre, the Terror and unspeakable acts of barbarism. In a clear, dispassionate and fast-moving narrative, Ian Davidson shows how and why the Revolutionaries, in just five years, spiralled from the best of the Enlightenment to tyranny and the Terror. The book reminds us that the Revolution was both an inspiration of the finest principles of a new democracy and an awful warning of what can happen when idealism goes wrong.
