Ideology and Atheism in the Soviet Union - William van den Bercken 2019-05-01

The series Religion and Society (RS) contributes to the exploration of religions as social systems – both in Western and non-Western societies; in particular, it examines religions in their differentiation from, and intersection with, other cultural systems, such as art, economy, law and politics. Due attention is given to paradigmatic case or comparative studies that exhibit a clear theoretical orientation with the empirical and historical data of religion and such aspects of religion as ritual, the religious imagination, constructions of tradition, iconography, or media. In addition, the formation of religious communities, their construction of identity, and their relation to society and the wider public are key issues of this series.

The Thaw - Denis Kozlov 2013-01-01

The period from Stalin's death in 1953 to the end of the 1960s marked a crucial epoch in Soviet history. Though not overtly revolutionary, this era produced significant shifts in policies, ideas, language, artistic practices, daily behaviours, and material life. It was also during this time that social, cultural, and intellectual processes in the USSR began to parallel those in the West (and particularly in Europe) as never before. This volume examines in fascinating detail the various facets of Soviet life during the 1950s and 1960s, a period termed the 'Thaw.' Featuring innovative research by historical, literary, and film scholars from across the world, this book helps to answer fundamental questions about the nature and ultimate fortune of the Soviet order — both in its internal dynamics and in its long-term and global perspectives.

Choice - Richard K. Gardner 1976

The Soviet Union - Kenneth M. Currie 1985

Communism - Richard Pipes 2003-08-05

With astonishing authority and clarity, Richard Pipes has fused a

lifetime's scholarship into a single focused history of Communism, from its hopeful birth as a theory to its miserable death as a practice. At its heart, the book is a history of the Soviet Union, the most comprehensive reorganization of human society ever attempted by a nation-state. This is the story of how the agitation of Karl Marx and Friedrich Engels, two mid-nineteenth-century European thinkers and writers, led to a great and terrible world religion that brought down a mighty empire, consumed the world in conflict, and left in its wake a devastation whose full costs can only now be tabulated.

Maximalist - Stephen Sestanovich 2014-10-14

American foreign policy since World War II has long been seen primarily as a story of strong and successful alliances, domestic consensus, and continuity from one administration to the next. Why then have so many presidents left office condemned for their foreign policy record? In his fresh and compelling history of America's rise to dominance, Stephen Sestanovich makes clear that U.S. diplomacy has always stirred controversy, both at home and abroad. He shows how successive administrations have struggled to find new solutions, alternating between bold "maximalist" strategies and retrenchment efforts to downsize America's role. Almost all our presidents emerge from this vivid retelling in a sharp and unexpected light.

End of History and the Last Man - Francis Fukuyama 2006-03-01

Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Lessons and Legacies VII - Dagmar Herzog 1991

"In the courtroom and the classroom, in popular media, public policy, and scholarly pursuits, the Holocaust-its origins, its nature, and its implications-remains very much a matter of interest, debate, and controversy. Arriving at a time when a new generation must come to terms with the legacy of the Holocaust or forever lose the benefit of its historical, social, and moral lessons, this volume offers a richly varied, deeply informed perspective on the practice, interpretation, and direction of Holocaust research now and in the future. In their essays the authors-an international group including eminent senior scholars as well as those who represent the future of the field-set the agenda for Holocaust studies in the coming years, even as they give readers the means for understanding today's news and views of the Holocaust, whether in court cases involving victims and perpetrators; international, national, and corporate developments; or fictional, documentary, and historical accounts. Several of the essays-such as one on nonarmed "amidah" or resistance and others on the role of gender in the behavior of perpetrators and victims-provide innovative and potentially significant interpretive frameworks for the field of Holocaust studies. Others; for instance, the rounding up of Jews in Italy, Nazi food policy in Eastern Europe, and Nazi anti-Jewish scholarship, emphasize the importance of new sources for reconstructing the historical record. Still others, including essays on the 1964 Frankfurt trial of Auschwitz guards and on the response of the Catholic Church to the question of German guilt, bring a new depth and sophistication to highly charged, sharply politicized topics. Together these essays will inform the future of the Holocaust in scholarly research and in popular understanding."--De l'éditeur.

The Long Game - Rush Doshi 2021-06-11

For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is

fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement." Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.
