Sizing People Up - Robin Dreeke 2020-01-21

A former FBI agent shares his simple but powerful toolkit for assessing who you can trust--and who you can't. After two decades as a behavior analyst in the FBI, Robin Dreeke knows a thing or two about sizing people up. He's navigated complex situations that range from handling Russian spies to navigating the internal politics at the Bureau. Through that experience, he was forced to develop a knack for reading people--their intentions, their capabilities, their desires and their fears. Dreeke's first book, *It's Not All About "Me,"* has become a cult favorite with readers seeking to build quick rapport with others. His last book, *The Code of Trust*, was about how to inspire trust in others as a leader. In *Sizing People Up*, Dreeke shares his simple, six-step system that helps you predict anyone's future behavior based on their words, goals, patterns of action, and the situation at hand. Predicting the behavior of others is an urgent need for anyone whose work involves relationships with others, whether it's leading an organization, collaborating with a teammate, or closing a sale. But predictability is not as simple as good and evil, or truth and fiction. Allies might make a promise with every intention of keeping it, not realizing that they will be unable to do so due to some personal shortcoming. And those seeking to thwart your endeavor may not realize how reliable their malevolent tells have become. Dreeke's system is simple, but powerful. For instance, a colleague might have a strong moral code, but do they believe your relationship will be long-term? Even the most upstanding person can betray your trust if they don't see themselves tied to you or your desired result in the long term. How can you determine whether someone has both the skill and will to do what they've said they're going to do? Behaviors as subtle as how they take notes will reveal their reliability. Using this book as their manual, readers will be able to quickly and easily determine who they can trust and who they can't; who is likely to deliver on promises and who will disappoint; and when a person is vested in your success vs when they are actively plotting your demise. With this knowledge they can confidently embark on anything from a business venture to a romantic relationship to a covert operation without the stress of the unknown.

University Cricket and Emerging Adulthood - Harry C. R. Bowles 2018-04-10

This book provides a detailed ethnographic account of the lives and experiences of a group of male, university-based academy cricketers transitioning into (and away from) professional sport. Set in one of the six university centres of cricket excellence established by the England and Wales Cricket Board in 2000 as a pathway into professional cricket, the study examines the nature of the university cricket experience in relation to a process of occupational identity-exploration and development. Through a series of empirical insights, the author illustrates the tension between aspiration and reality players encountered in deciding whether cricket, as an occupation and future identity-commitment, was right for them. In so doing, the book reveals the questions of identity generated by players' interactions with their cricketing environment relating to their lives as student-cricketers and as young people. University Cricket and Emerging Adulthood will be of interest to students and scholars across a range of disciplines, including sociology, psychology, sport coaching, sport policy and leisure studies.

Routledge Handbook of Applied Sport Psychology - Stephanie J. Hanrahan 2010-10-18

Now available in paperback, the Routledge Handbook of Applied Sport Psychology is a definitive guide to the theory and practice of applied sport psychology. It goes further than any other book in surveying the full variety of issues that practising sport psychologists will confront in their working lives. It introduces the most important tools and skills that psychologists will need to be truly helpful to their clients, and it also adopts a holistic definition of the role of the sport psychologist, explaining how effective counseling, assessment, and therapeutic models can add important extra dimensions to professional practice. The book is divided into seven thematic sections, addressing: counseling; assessment; theoretical and therapeutic models; issues for the individual athlete, from injury and overtraining to depression; issues for teams, from conflict resolution to travel; working with special populations; mental skills, such as imagery, goal setting, and concentration. Moving beyond the traditional tracks of clinical psychology and performance enhancement, the authors in this book argue convincingly that psychologists would benefit from attempting to understand athletes' social and familial contexts, their health, happiness, and interpersonal dynamics in the broadest sense, if they are to serve their clients' best interests. With contributions from many of the world's leading sport psychologists, and with clear descriptions of best practice in each chapter, the Routledge Handbook of Applied Sport Psychology is essential reading for all serious students and practitioners of sport psychology, counseling, applied sport science, health psychology, and related fields.

The Ultimate Philadelphia Athletics Reference Book 1901-1954 - Ted Taylor 2010-02-10

Jack Coombs (1906-14) won three games in the 1910 World Series, an amazing accomplishment for any pitcher. (In three World Series he was lifetime 5-0.) That year he had gone 31-9 to pace the A's and lead the league in victories. He was 28-12 the following season and 21-10 in 1912, clearly the best years of his fourteen-year-career. He spent four years with Brooklyn and finished up with Detroit. Lifetime in 355 games Jack was 159-110. After his playing days were over he became head baseball coach at Duke University and sent a number of players to the A's during that time. Orge "Pat" Cooper (1946) a pitcher, not the comedian, who was one of those "Cup of Coffee" guys who saw action in one game, one inning and was never seen or heard from again in the majors. In the minors he pitched, played the outfield and first base and got into 622 games over ten years batting, of all things, .318. As a minor-league pitcher, he was 24-16. Arthur "Bunny" Corcoran (1915) was a member of the '15 A's. He was 0-4 in his one game at third base. Played just two minor-league campaigns (1920 at Norfolk and 1921 at Rocky Mount), played in 238 games and batted .230. Ensign "Dick" Cottrell (1913) spent small parts of five different years in the majors—and every one of them with a different team. With the A's he was 1-0, with the rest of them, combined, he was 0-2. In four minor-league seasons, he won 34, lost 26. Why would someone give their kid a military rank as a first name? Stan Coveleski (1912) Hall of Famer, a native of Shamokin, PA, Stan started his fourteen-year career with the A's in 1912 and, somehow, they let him get away after he went 2-1. In fact he spent four years in the minors and was twenty-seven before he was back in the majors to stay, mostly with Cleveland (1916-24). He also saw service with Washington and the Yankees. Lifetime in 450 games, Coveleski won 215, lost 142 with an ERA of 2.88. He was the brother of Harry Coveleski a very good southpaw major-league pitcher who appeared with the Phillies, Reds, and Tigers over nine years (1907-18). Ironically the two brothers never faced each other on the mound. The correct spelling of his last name was Coveleskie, but he never corrected anyone and, as a consequence, his Hall of Famer The Ultimate Philadelphia Athletics Reference Book 1901-1954 93 plaque has his last name spelled incorrectly. (The original spelling of his name was Kowalewski, he and his brother changed it legally). Stan Coveleskie shared the same name (and they spelled it right, too) not the same talents as the well-known Hall of Famer. Stan played in the minors for six seasons (1944-51), five of them in the Phillies farm system, one in the A's organization. A catcher by trade, Coveleskie appeared in 346 games and batted .261. Homer Cox was signed as a

catcher by the A's in 1938 and spent the majority of his ten-year minor-league career in their organization. He played in 578 games and had a .301 lifetime batting average, but never really got out of the low minors. He batted .367 for Lexington in 1945 in eighty-four games, his best season. Martin "Toots" Coyne (1914) went zero for two in his one game for the A's. No other pro record exists. Born and died in St. Louis. Jim Roy Crabb (1912) in seven games for the A's he was 2-4, in two games with the White Sox to start the season, he was 0-1. Lifetime, one year, nine games. Spent seven seasons in the minors, winning seventy-six, losing seventy-one. Once lost twenty games playing for three different teams in 1914. George Craig (1907) no decisions in two appearances. He was a left hander. Was 6-5 in his one minor-league season. Roger "Doc" Cramer (1929-35) who belongs in the Hall of Fame and will never get there despite his twenty-year-career and lifetime batting average of .296. His best A's year was 1935 when he batted .332 in 149 games. Cramer appeared in 2,239 games, had 2,705 hits and batted over .300 eight times
