Nigerian Art Music - Bode Omojola 2013-04-04

ART MUSIC IN NIGERIA is the most comprehensive book on the works of modern Nigerian composers who have been influenced by European classical music. Relying on over 500 scores, archival materials and interviews with many Nigerian composers, the author traces the historical developments of this new idiom in Nigeria and provides a critical and detailed analysis of certain works. Written in a refreshing and lucid style and amply illustrated with music examples, the book represents a milestone in musicological research in Nigeria. Although written essentially for students and scholars of African music, this interesting book will also be enjoyed by the général reader.

Pregnancy, Childbirth, Postpartum, and Newborn Care - World Health Organization 2003

This guide provides a full range of updated, evidence-based norms and standards that will enable health care providers to give high quality care during pregnancy, delivery and in the postpartum period, considering the needs of the mother and her newborn baby. All recommendations are for skilled attendants working at the primary level of health care, either at the facility or in the community. They apply to all women attending antenatal care, in delivery, postpartum or post abortion care, or who come for emergency care, and to all newborns at birth and during the first week of life (or later) for routine and emergency care. This guide is a guide for clinical decision-making. It facilitates the collection; analysis, classification and use of relevant information by suggesting key questions, essential observations and/or examinations, and recommending appropriate research-based interventions. It promotes the early detection of complications and the initiation of early and appropriate treatment, including time referral, if necessary. Correct use of this guide should help reduce high maternal and perinatal mortality and morbidity rates prevalent in many parts of the developing world, thereby making pregnancy and childbirth safer.

*Unexpected Joy at Dawn* - Alex Agyei-Agyiri 2003

Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country'. This story of migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of 'alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - 'home'. The novel thus touches on concerns of deeper relevance to the politics of race and migration of the twenty first century.

Everyday Sports Injuries - DK 2010-10-18

More people than ever before are regularly taking part in recreational sports, often gaining enormous health benefits from their chosen activity. But sports also carry the risk of injury, and each year there are millions of injuries as a result of physical activity in the US alone. Sports Injuries is a practical guide to recognizing, treating, and preventing injury, with

the goal of getting the sportsperson back in action as soon as possible. Sports Injuries starts with tips and advice on preparing for sports to reduce the risk of injury. Many of the most popular sports-from snowboarding and surfing to soccer and tennis-are highlighted in a directory that pinpoints areas of the body most at risk of injury, and how to minimize the risks. The injuries section is a practical guide to the recognition, prevention, and treatment of sports injuries. Organized anatomically, each injury is described along with the causes and symptoms. There is instant advice on first aid, along with practical recovery programs for each injury. Clear cross-references take the reader to a step-by-step exercise section at the end of the book. This section details 150 routines that will help people return to their sporting activity as soon as possible.

*Faceless* - Amma Darko 2003

Street life in the slums of Accra is realistically portrayed in this socially-committed, subtle novel about four educated women who are inspired by the plight of a 14-year old girl, Fofu. As the main characters convert their library center into a practical street initiative, the novel invokes the squalor, health risks, and vicious cycles of poverty and violence that drive children to the streets and women to prostitution; and, from which, ultimately, no one in the society is free.

Countering the Problem of Falsified and Substandard Drugs - Institute of Medicine 2013-06-20

The adulteration and fraudulent manufacture of medicines is an old problem, vastly aggravated by modern manufacturing and trade. In the last decade, impotent antimicrobial drugs have compromised the treatment of many deadly diseases in poor countries. More recently, negligent production at a Massachusetts compounding pharmacy sickened hundreds of Americans. While the national drugs regulatory authority (hereafter, the regulatory authority) is responsible for the safety of a country's drug supply, no single country can entirely guarantee this today. The once common use of the term counterfeit to describe any drug that is not what it claims to be is at the heart of the argument. In a narrow, legal sense a counterfeit drug is one that infringes on a registered trademark. The lay meaning is much broader, including any drug made with intentional deceit. Some generic drug companies and civil society groups object to calling bad medicines counterfeit, seeing it as the deliberate conflation of public health and intellectual property concerns. Countering the Problem of Falsified and Substandard Drugs accepts the narrow meaning of counterfeit, and, because the nuances of trademark infringement must be dealt with by courts, case by case, the report does not discuss the problem of counterfeit medicines.

**Social Conflict within and between Groups** - Carsten K. W. De Dreu 2014-05-09

Intergroup competition and conflict create pervasive problems in human society, giving rise to such phenomena as prejudice, terrorism, ethnic cleansing, and interstate war. Citizens, policy makers, social workers, schoolteachers, and politicians wrestle with these problems, and with difficult questions these issues pose: What causes conflict to escalate? How should we manage conflict within communities, and also in society at large? Is conflict always bad, or does it have other more beneficial consequences? Social Conflict within and between Groups provides an overview of contemporary research from the social sciences on these questions. It brings together the research output of a number of leading researchers in psychology, management and economics, sociology and political science, and draws on the outcomes of ten prominent research programs conducted over the past five years. The chapters cover a range of fascinating topics, including prejudice and discrimination in multi-ethnic societies, and conflict and negotiation in the field of industrial relations. The authors also consider the possibilities for intervention at the interpersonal, intergroup and societal level. This is the first volume to provide an interdisciplinary overview of the various scientific approaches to studying the origins and consequences of social conflict. It will be of great interest to researchers, graduates and upper-level undergraduate students from across the social and behavioural sciences.

Basic Principles of Curriculum and Instruction - Ralph W. Tyler 2013-08-09

In 1949, a small book had a big impact on education. In just over one hundred pages, Ralph W. Tyler presented the concept that curriculum should be dynamic, a program under constant evaluation and revision. Curriculum had always been thought of as a static, set program, and in an era preoccupied with student testing, he offered the innovative idea that teachers and administrators should spend as much time evaluating their plans as they do assessing their students. Since then, Basic Principles of Curriculum and Instruction has been a standard reference for anyone working with curriculum development. Although not a strict how-to guide, the book shows how educators can critically approach curriculum planning, studying progress and retooling when needed. Its four sections focus on setting objectives, selecting learning experiences, organizing instruction, and evaluating progress. Readers will come away with a firm understanding of how to formulate educational objectives and how to analyze and adjust their plans so that students meet the objectives. Tyler also explains that curriculum planning is a continuous, cyclical process, an instrument of education that needs to be fine-tuned.

This emphasis on thoughtful evaluation has kept Basic Principles of Curriculum and Instruction a relevant, trusted companion for over sixty years. And with school districts across the nation working feverishly to align their curriculum with Common Core standards, Tyler's straightforward recommendations are sound and effective tools for educators working to create a curriculum that integrates national objectives with their students' needs.

**Lonely Days** - Bayo Adebawale 2006

**Healthful School Environment** - Joint Committee on Health Problems in Education 1969

**Crime and Criminal Behavior** - William J. Chambliss 2011-05-03

Crime and Criminal Behavior delves into such hotly debated topics as age of consent, euthanasia and assisted suicide, gambling, guns, internet pornography, marijuana and other drug laws, religious convictions, and terrorism and extremism. From using a faking I.D. to assaulting one's domestic partner to driving drunk, a vast array of behaviors fit into the definition of criminal. The authors of these 20 chapters examine the historical contexts of each topic and offer arguments both for and against the ways in which legislators and courts have defined and responded to criminal behaviors, addressing the sometimes complex policy considerations involved. Sensitive subjects such as hate crimes are addressed, as are crimes carried out by large groups or states, including war crime and corporate crime. This volume also considers crimes that are difficult to prosecute, such as Internet crime and intellectual property crime, and crimes about which there is disagreement as to whether the behavior harms society or the individual involved (gun control and euthanasia, for example). The Series The five brief, issues-based books in SAGE Reference's Key Issues in Crime & Punishment Series offer examinations of controversial programs, practices, problems or issues from varied perspectives. Volumes correspond to the five central subfields in the Criminal Justice curriculum: Crime & Criminal Behavior, Policing, The Courts, Corrections, and Juvenile Justice. Each volume consists of approximately 20 chapters offering succinct pro/con examinations, and Recommended Readings conclude each chapter, highlighting different approaches to or perspectives on the issue at hand. As a set, these volumes provide perfect reference support for students writing position papers in undergraduate courses spanning the Criminal Justice curriculum. Each title is approximately 350 pages in length.

Curriculum Landscapes and Trends - Jan van den Akker 2013-06-29

Curriculum problems are everywhere: alert observers with a practiced eye and educated mind will find it almost impossible to read a newspaper without discovering curricular issues. The media often report about educational reforms or even about curriculum wars with opposing parties fiercely debating the aims, content and organization of learning. Few people analyze these trends and discussions from a curricular conceptual framework. In addition, people sometimes think that their curriculum approaches and problems are unique and context-specific. However, international experience shows us that we can learn a lot from curriculum issues elsewhere. This book aims to sharpen the eyes and minds of a broader audience in identifying, understanding, addressing and reflecting upon curriculum problems. It also aims to contribute to

the increased exchange, discussion and reflection on all the current curriculum problems that form such a crucial part of learning worldwide.

Educating the Student Body - Committee on Physical Activity and Physical Education in the School Environment 2013-11-13

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of

instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.
