Patterns of Local Autonomy in Europe - Andreas Ladner 2018-10-26
This book considers local autonomy, measured as a multidimensional concept, from a cross-country comparative perspective, and examines how variations can be explained and what their consequences are. It fills a gap in the literature by providing a comprehensive study of the different components of local autonomy across a large number of countries, over time. It offers a theoretically saturated concept to measure local autonomy and applies it to 39 countries, including all 28 EU member states together with Albania, Georgia, Iceland, Liechtenstein, Macedonia, Moldova, Norway, Serbia, Switzerland Turkey and Ukraine, over a period of 25 years (1990-2014).

**Public Policy (Albanian Languge)** - Basma I. Abdelgafar 2022-01-01
This work charts new territory in Islamic scholarship by attempting to address the field of public policy from a maqasid (higher objectives of the Shariah) perspective. Public Policy is an independent discipline from both law and politics. Thus, Public Policy in Islam is introduced here as a qualitatively different enterprise from both fiqh (Islamic jurisprudence) and siyasah shar'iyyah (Shariah-oriented politics). The book deals with a number of critical topics that include methodology, governance, human rights, ethics, political power, and reform and renewal. It highlights how the maqasid approach is indispensable to the theory and practice of public policy in Islam, how it could resolve some of the most persistent governance dilemmas throughout Muslim history, but more significantly, how it forces a re-conceptualisation of the wealth of knowledge available in Islam's primary sources to introduce Public Policy in Islam to mainstream policy studies.

*Challenges of Teaching with Technology Across the Curriculum* - Lawrence A. Tomei 2003-01-01
Teachers are looking for a text that will guide them in the selection of appropriate educational software and help them make decisions about the myriad of available Internet sites. They want to know how all this material can help their students learn better. This text integrates both theory and practice with assessment to make learning outcomes possible.
*Fundamentals of Psycholinguistics* - Eva M. Fernández 2010-12-21
Introducing the fundamental issues in psycholinguistics, this book explores the amazing story of the unconscious processes that take place when humans use language. It is an ideal text for undergraduates taking a first course in the study of language. Topics covered include the biological foundations of language; acquisition of first and second languages in children and adults; the mental lexicon; and

speech production, perception, and processing Structured as an engaging narrative that takes the reader from an idea in the mind of a speaker to its comprehension in the mind of the hearer Reflects the latest empirical developments in psycholinguistics, and is illustrated throughout with examples from bilingual as well as monolingual language processing, second language acquisition, and sign languages Student-friendly features include chapter-by-chapter study questions and discussion summaries; the appendix offers an excellent overview of experimental designs in psycholinguistics, and prepares students for their own research Written by an internationally-regarded author team, drawing on forty years of experience in teaching psycholinguistics

*Bookmarks - A manual for combating hate speech online through human rights education* - 2014-05-13
The work of the Council of Europe for democracy is strongly based on education: education in schools, and education as a lifelong learning process of practising democracy, such as in non-formal learning activities. Human rights education and education for democratic citizenship form an integral part of what we have to secure to make democracy sustainable. Hate speech is one of the most worrying forms of racism and discrimination prevailing across Europe and amplified by the Internet and social media. Hate speech online is the visible tip of the iceberg of intolerance and ethnocentrism. Young people are directly concerned as agents and victims of online abuse of human rights; Europe needs young people to care and look after human rights, the life insurance for democracy. Bookmarks is published to support the No Hate Speech Movement youth campaign of the Council of Europe for human rights online.

Bookmarks is useful for educators wanting to address hate speech online from a human rights perspective, both inside and outside the formal education system. The manual is designed for working with learners aged 13 to 18 but the activities can be adapted to other age ranges.

**Al-Shura: The Qur'anic Principle of Consultation** - Ahmad Al-Raysuni 2011-09-30
Muslims remain largely unaware of the importance and value of the Qur'anic principle of al-Shura (mutual consultation) and the significant role it can play in the advancement and reform of Muslim society. In this work, the author attempts to introduce and examine key meanings and practices of al-Shura, trace its historical evolution, and explore ways in which the principle can be introduced, institutionalized and applied in Muslim societies. There is no doubt that al-Shura has been sidelined throughout the Muslim world and the reasons for this are both historically and politically complex. According to the author, although much has been written on the subject, in reality it has been at best ineffectively applied and at worst heedlessly ignored. Even today it is a hotly contested issue. As al-Shura is increasingly associated with democratic participation in a decision-making process, debate has ignited with critics challenging the notion of equating the principle with western notions of democracy, with others claiming that the principle allows for a meaning that breaks the grip of centralized power. These and other issues are investigated with careful scholarship. Al-Raysuni concludes that al-Shura should be adopted as a way of life for all Muslims to protect their interests and as a vital tool for reconstruction and reform. In doing so he addresses the subject from some intriguing new angles, giving insight into areas hitherto little, if at all, examined.

Kalkulus dhe Gjeometri Analitike - Tanush

Shaska 2019-05-01
Ky tekst lindi nga leksionet e mia të Kalkulusit gjatë 20 viteve të fundit. Botimi i parë (2010) përmbante vetëm kapituj 1 -11, pra atë çfarë quhet Kalkulus I dhe Kalkulus II. Të rejat e këtij botimi në lidhje me botimin e parë janë se një pjesë e madhe e kalkulusit I dhe II janë rishkruar. Ky libër përmban një komponent më të madh të gjeometrisë analitike jo vetëm në krahasim me botimin e parë, por edhe me çdo libër tipik Kalkulusi. Kjo duhet të bëjë kalimin nga gjeometria analitike e shkollës së mesme tek ky libër pa asnjë vështirësi për shumicën e gjimnazistëve. Pjesa e re që është shtuar në këtë libër janë kapitujt 12-17. Kjo pjesë jep një hyrje të shkurtër mbi funksionet me shumë ndryshore, funksionet vektoriale, dhe kalkulusi vektorial. Eshtë pjesa që lidhet direkt me Fizikën dhe inxhinjeritë.

Second Language Teacher Education - Karen E. Johnson 2009-06-02
'... A beautifully written, articulate and compelling argument for a sociocultural perspective on second language teacher education . . . Essential reading for all who wish to understand this perspective.' – David Nunan, University of Hong Kong '...Significant and timely. Johnson is masterful at writing in an engaging, transparent prose about complex concepts. It's a rare scholar who can write prose like this. Throughout my reading I wanted to engage in dialogue with her – this is a sure sign of a great book." – Diane Tedick, University of Minnesota, USA This book presents a comprehensive overview of the epistemological underpinnings of a sociocultural perspective on human learning and addresses in detail what this perspective has to offer the field of second language teacher education. Captured through five changing points of view, it argues that a sociocultural perspective on human learning changes the way we think about how teachers learn to teach, how teachers think about language, how teachers teach second languages, the broader social, cultural, and historical macro-structures that are ever present and ever changing in the second language teaching profession, and what constitutes second language teacher professional development. Overall, it clearly and accessibly makes the case that a sociocultural perspective on human learning reorients how the field understands and supports the professional development of second language teachers.

## Text, Role and Context - Ann M. Johns 1997-06-13
This text explores fundamental issues relating to student literacies and instructor roles and practices within academic contexts. It offers a brief history of literacy theories and argues for "socioliterate" approaches to teaching and learning in which texts are viewed as primarily socially constructed. Central to socioliteracy, the concepts "genre" and "discourse community," are presented in detail. The author argues for roles for literacy practitioners in which they and their students conduct research and are involved in joint pedagogical endeavors. The final chapters are devoted to outlining how the views presented can be applied to a variety of classroom texts. Core curricular design principles are outlined, and three types of portfolio-based academic literacy classrooms are described.

## Recent Trends in International Migration of Doctors, Nurses and Medical Students - OECD 2019-07-25
This report describes recent trends in the international migration of doctors and nurses in OECD countries. Over the past decade, the number of doctors and nurses has increased in many OECD countries, and foreign-born and foreign-trained doctors and nurses have contributed to a significant extent. New in-depth analysis of the internationalisation of medical education shows that in some countries (e.g. Israel, Norway, Sweden and the United States) a large and growing number of foreign-trained doctors are people born in these countries who obtained their first medical degree abroad before coming back. The report includes four case studies on the internationalisation of medical education in Europe (France, Ireland,

Poland and Romania) as well as a case study on the integration of foreign-trained doctors in Canada.

Civil Engineering Applications of Ground Penetrating Radar - Andrea Benedetto 2015-04-07
This book, based on Transport and Urban Development COST Action TU1208, presents the most advanced applications of ground penetrating radar (GPR) in a civil engineering context, with documentation of instrumentation, methods and results. It explains clearly how GPR can be employed for the surveying of critical transport infrastructure, such as roads, pavements, bridges and tunnels and for the sensing and mapping of underground utilities and voids. Detailed attention is also devoted to use of GPR in the inspection of geological structures and of construction materials and structures, including reinforced concrete, steel reinforcing bars and pre/post-tensioned stressing ducts. Advanced methods for solution of electromagnetic scattering problems and new data processing techniques are also presented. Readers will come to appreciate that GPR is a safe, advanced, non destructive and noninvasive imaging technique that can be effectively used for the inspection of composite structures and the performance of diagnostics relevant to the entire life cycle of civil engineering works.

**The Miraculous Language of the Qur'an** - Musfir bin Ali al-Qahtani 2015-01-12
This study illustrates why the language of the Qur'an is miraculous, unique, and evidence of divine authority. The author compares the language of the Qur'an with the language of pre-Islamic poetry, the Prophet's words (hadith), and the language of the Arabs both past and present, to demonstrate that although the Qur'an was revealed in Arabic it was at the same time an Arabic which was entirely new. Original and early Muslim audiences viewed this as miraculous and responded to the Qur'an's words,

sounds, rhythms, etc. in a manner consistent with a deeper appreciation of its beauty and majesty which modern ears, trained by familiarity, and despite being surrounded by all manner of dictionaries and studies, are at a loss to capture. The author attempts to remove this veil and present the Qur'an to readers as if hearing it for the first time, to bring to life some of this wonder. In doing so he guides readers to appreciate the beauty of the Qur'an, to become more immersed in it, and to have a clearer understanding of its structure and flow. Devoting special attention to Surah Al Muddaththir, to underpin his analysis, Saeh thus brings the Revelation to life, to demonstrate that each surah has distinct features and characteristics that make it stand out uniquely within the design and sweep of the whole.

Bearing True Witness - Laurence B. Brown 2010-07-14
On the tail of Dr. Brown's two theological tsunamis, MisGod'ed and God'ed, comes this indispensable Islamic primer. Bearing True Witness takes its rightful place at the conclusion of this trilogy of theological works by providing essential yet practical advice on how to correctly live the chosen religion of Islam.

**Albanian: Muslim Contributions to World Civilization** - M. Basheer Ahmed, Syed A. Ahsani, & Dilnawaz A. Siddiqui 2019-01-01
Islam's brilliant contributions to science, art, and culture, are a timeless and precious heritage, which should be historically preserved for future generations. The great achievements of Muslim scholars are rarely if at all acknowledged in formal education, and today their identity, origins and impact remain largely obscure. This collection of papers aims to give readers a brief introduction to the intellectual history of Muslims and the contributions that eminent Muslim scholars have made in certain specific fields of knowledge including basic and applied physical and biological sciences, medicine, legal and political theories and practices, economic and financial concepts, models, and institutions, etc. The preservation of civilization necessitates a better understanding, sharing, and recognition of our

common human heritage. Given today's widespread negative stereotyping and falsely generated misunderstanding of Islam and Muslims, the publication of these papers on "Muslim Contributions to World Civilization" is vital to help repair the wrong that is being perpetrated and restore the historical truth, which is being distorted.

*A Geopolitics of Academic Writing* - A. Suresh Canagarajah 2002
This work acts as a critique of current scholarly publishing practices, exposing the inequalities in the way academic knowledge is constructed and legitimized. It examines three broad conventions governing academic writing: textual concerns, social customs, and publishing practices.

**The Traitor's Niche** - Ismail Kadare 2018-05-01
"Kadare is inevitably linked to Orwell and Kundera, but he is a far deeper ironist than the first, and a better storyteller than the second. He is a compellingly ironic storyteller because he so brilliantly summons details that explode with symbolic reality." —The New Yorker At the heart of the Ottoman Empire, in the main square of Constantinople, a niche is carved into ancient stone. Here, the sultan displays the severed heads of his adversaries. People flock to see the latest head and gossip about the state of the empire: the province of Albania is demanding independence again, and the niche awaits a new trophy . . . Tundj Hata, the imperial courier, is charged with transporting heads to the capital—a task he relishes and performs with fervor. As he travels through obscure and impoverished territories, he makes money from illicit side–shows, offering villagers the spectacle of death. The head of the rebellious Albanian governor would fetch a very high price indeed. The Traitor's Niche is a surreal tale of tyranny and rebellion, in a land where armies carry scarecrows, state officials ban entire languages, and the act of forgetting is more complicated than remembering. Long-listed for the 2017 Man Booker International Prize "The name of the Albanian novelist Ismail Kadare regularly comes up at Nobel Prize time, and he is still a good bet to win it one of these days . . . He is seemingly incapable of writing a book that fails to be interesting." —The New York Times

**Language of Inequality** - Nessa Wolfson 1985-01-01

CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students, researchers and practitioners in all of the social and language-related sciences carefully selected book-length publications dealing with sociolinguistic theory, methods, findings and applications. It approaches the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists, historians etc. to the development of the sociology of language.

Language Complexity as an Evolving Variable - Geoffrey Sampson 2009-02-26
This book presents a challenge to the widely-held assumption that human languages are both similar and constant in their degree of complexity. For a hundred years or more the universal equality of languages has been a tenet of faith among most anthropologists and linguists. It has been frequently advanced as a corrective to the idea that some languages are at a later stage of evolution than others. It also appears to be an inevitable outcome of one of the central axioms of generative linguistic theory: that the mental architecture of language is fixed and is thus identical in all languages and that whereas genes evolve languages do not. Language Complexity as an Evolving Variable reopens the debate. Geoffrey Sampson's introductory chapter re-examines and clarifies the notion and theoretical importance of complexity in language, linguistics, cognitive science, and evolution. Eighteen distinguished scholars from all over the world then look at evidence gleaned from their own research in order to reconsider whether languages do or do not exhibit the same degrees and kinds of complexity. They examine data from a wide range of times and places. They consider the links between linguistic structure and social complexity and relate their findings to the causes and processes of language change. Their arguments are frequently controversial and provocative; their conclusions add up to an important challenge to conventional ideas about the nature of language. The authors write readably and accessibly with no recourse to

unnecessary jargon. This fascinating book will appeal to all those interested in the interrelations between human nature, culture, and language.

**Foreign Language Learning with Digital Technology** - Michael Evans 2009-02-07
While digital technology is endlessly innovating and improving itself as a tool to support teaching and learning, the cognitive process of language learning itself remains perennially the same. However, digital technology has created new learning opportunities and introduces new elements into the cognitive process of foreign language learning. The contributors of this well-edited collection examine foreign language learning primarily from a user perspective and explore these underlying questions: How does digital technology support existing foreign language learning needs and processes? What new learning experiences does it entail for the learner? The book situates new insights into the value of digital technology for foreign language learning within the context of evidence from prior research and of educational policy-making and examines key pedagogical uses of digital technology in relation to effective foreign language learning by pupils. It provides an in-depth description of the use of a range of digital media and combines practical ideas for teaching and learning with critical analysis of evidence drawing on an analysis of technology-focused language learning across different sectors and in different anglophone contexts.

**Why Pro-Life?** - Randy C. Alcorn 2012-01-26
"No issue is more divisive or troubling than abortion. Many believe that we have to choose between helping women and helping children. This book shows how critical it is that we help both. In a concise, nonabrasive fashion, Randy Alcorn offers compassionate, factual answers to the central issues of the abortion debate."--Back cover.

Brings together expert publishing professionals to provide an authoritative insight into industry developments Details the challenges publishers face and the leading-edge processes and procedures used to meet them Discusses the range of new communication channels and business models that suit the wide variety of subject areas publishers work in

**Performatism, Or the End of Postmodernism** - Raoul Eshelman 2009
The author suggests that in this era following the postmodern we have entered a new, monist epoch in which aesthetically mediated belief replaces endless irony as the dominant force in culture. The book documents the "new monism" through an examination of popular films and novels such as American beauty, Life of Pi, and Middlesex as well as in the work of major architects and artists such as Sir Norman Foster, Andreas Gursky, and Vanessa Beecroft. --book cover.

**Digital Language Learning and Teaching** - Michael Carrier 2017-01-27

This carefully balanced set of studies and practitioner research projects carried out in various learning contexts around the world highlights cutting-edge research in the use of digital learning technologies in language classrooms and in online learning. Providing an overview of recent developments in the application of educational technology to language learning and teaching, it looks at the experience of researchers and practitioners in both formal and informal (self-study) learning contexts, bringing readers up to date with this rapidly changing field and the latest developments in research, theory, and practice at both classroom and education system levels.

## Albanian: Ijtihad and Renewal - Said Shabbar 2021-01-01

In the early centuries of Islam, the response of Muslims to problem-solving the various issues and challenges that faced their rapidly expanding community was to use intelligence and independent reasoning based on the Qur'an and Sunnah to address them. This practice is known as ijtihad. As the centuries wore on however the gates of ijtihad were generally closed in favor of following existing rulings developed by scholars by way of analogy. And as reason and intellect, now held captive to madhhabs (schools of thought) and earlier scholarly opinion stagnated, so did the Muslim world. Ijtihad and Renewal is an analysis of ijtihad and the role it can play for a positive Muslim revival in the modern world, a revival based on society-wide economic and educational reform and development. It makes the case that the grafting of solutions rooted in the past onto the complex and unique realities of our own age, in a one-size-fits-all perspective, has paralyzed the vitality of Muslim thought, and confused its sense of direction, and that to revive the Muslim world from its centuries of decline and slumber we need to revive the practice of ijtihad. Focusing attention on thinking through solutions for ourselves based on our own times and context, using the Qur'an and Sunnah, as well as the wisdom and experience of the past distilled from these, as tools in this endeavor whilst not the only solution, is certainly a viable and powerful one.
