The HAZOP Leader's Handbook - Philip Eames

2022-04-29

The HAZOP Leader's Handbook is designed specifically to help HAZOP leaders plan and execute successful HAZOP studies, based on the author's many years of experience of participating in, observing and facilitating HAZOP studies, as well as observing, training, mentoring and assessing HAZOP leaders. The book assumes that the reader understands the methodology and has experienced HAZOP meetings and does not seek to explain the methodology itself. Rather, it focuses on the application of the methodology and the responsibilities and skills of the HAZOP leader in the preparation, execution and reporting of the study. Although the principal subject is HAZOP, much of the content equally applies to other facilitated hazard identification techniques such as Hazard Identification (HAZID) or Failure

Modes Effects and Criticality Analysis (FMECA). The prime purpose of this book is to provide guidance specific to HAZOP leaders to help them to maximise the effectiveness of their HAZOP studies, thereby getting the most benefit from the methodology, promoting consistency and rigour in its application and sustaining its well-earned reputation. Includes HAZOP leader's responsibilities and competence requirements and how to plan, prepare and manage a HAZOP study from its conception through to delivery of the final report Describes current best practice in the application of the HAZOP technique Explains the role of the HAZOP leader as a facilitator of study meetings using examples of facilitation techniques Discusses ways in which the leader can maximize the effectiveness of HAZOP technique in identifying and analyzing process hazards

The Handbook of Sociocultural Anthropology -

James G. Carrier 2020-06-29

The Handbook of Sociocultural Anthropology presents a state of the art overview of the subject - its methodologies, current debates, history and future. It will provide the ultimate source of authoritative, critical descriptions of all the key aspects of the discipline as well as a consideration of the general state of the discipline at a time when there is notable

uncertainty about its foundations, composition and direction. Divided into five core sections, the Handbook: examines the changing theoretical and analytical orientations that have led to new ways of carrying out research; presents an analysis of the traditional historical core and how the discipline has changed since 1980; considers the ethnographic regions where work has had the greatest impact on anthropology as a whole; outlines the people and institutions that are the context in which the discipline operates, covering topics from research funding to professional ethics. Bringing together leading international scholars, the Handbook provides a guide to the latest research in social and cultural anthropology. Presenting a systematic overview - and offering a wide range of examples, insights and analysis - it will be an invaluable resource for researchers and students in anthropology as well as cultural and social geography, cultural studies and sociology.
