Down & Dirty - Tracy Wolff 2017-05-23

This hard-bodied football star is used to scoring. But he needs all the right moves to get past a fiery redhead's defenses in a steamy standalone novel from the bestselling author of Ruined. Emerson: Talk about bad first impressions. I have too much riding on this job to show up late on my first day looking like the winner of a wet T-shirt contest, all thanks to an arrogant quarterback who drives like he owns the road. Hunter Browning thinks that because he's famous, he can fix everything with a smile and a wave of his hand. He's too bronzed, buff, and beautiful for his own good. Or mine. I can't let on that I'm a fan . . . no matter how much fun we'd have in the sack. Hunter: Hitting that puddle was my best play since winning the Super Bowl with a touchdown pass. Sure, it's not my preferred way to get a girl wet, but I'll make an exception for Emerson Day. She's got a sharp tongue and a red-hot temper, even with her soaking clothes plastered to her every curve. Now I know exactly what my next play will be: hire Emerson as my personal real-estate agent, save her job—and see if I can take her off the market. Look for all of Tracy Wolff's seductive reads: The Ethan Frost series: RUINED | ADDICTED | EXPOSED | FLAWED The Sebastian Caine series: PLAY ME WILD | PLAY ME HOT | PLAY ME HARD | PLAY ME REAL | PLAY ME RIGHT | PLAY ME: THE COMPLETE STORY The Hotwired series: ACCELERATE The Lightning series: DOWN & DIRTY | HOT & HEAVY | ROUGH & READY The His Royal Hotness series: ROYAL PAIN | ROYAL TREATMENT And her standalone novels: LOVEGAME | FULL EXPOSURE | TIE ME DOWN Praise for Down & Dirty "I'm obsessed with Tracy Wolff's writing style. Bottled Lightning - Seth Fletcher 2011-05-10

Lithium batteries may hold the key to an environmentally sustainable, oil-independent future. From electric cars to a "smart" power grid that can actually store electricity, letting us harness the powers of the sun and the wind and use them when we need them, lithium—a metal half as dense as water, found primarily in some of the most uninhabitable places on earth—has the potential to set us on a path toward a low-carbon energy economy. In Bottled Lightning, the science reporter Seth Fletcher takes us on a fascinating journey, from the salt flats of Bolivia to the labs of MIT and Stanford, from the turmoil at GM to cutting-edge lithium-ion battery start-ups, introducing us to the key players and ideas in an industry with the power to reshape the world. Lithium is the thread that ties together many key stories of our time: the environmental movement; the American auto industry, staking its revival on the electrification of cars and trucks; the

struggle between first-world countries in need of natural resources and the impoverished countries where those resources are found; and the overwhelming popularity of the portable, Internet-connected gadgets that are changing the way we communicate. With nearly limitless possibilities, the promise of lithium offers new hope to a foundering American economy desperately searching for a green-tech boom to revive it.

Mustang by Design - James Dinsmore 2018-09-14

p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} Without question, the 1964-1/2 Mustang is one of the most important and influential cars in automotive history. When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and, in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang. With stinging losses from the Edsel fresh in minds at Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a herculean task to convince Henry Ford II to take a risk on a new concept of automobile, but with the help of Hal Sperlich's detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca's, if it failed. The process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is retraced in insightful detail. During the process, many fascinating experimental cars, such as the Mustang I two-seater, Mustang II prototype, Mustang Allegro, and Shorty, were built. But eventually the Mustang, based on the existing Ford Falcon, received the nod for final production. In a gala event, it was unveiled at the 1964 World's Fair in New York. The Mustang received public accolades and critical acclaim, and soon it became a runaway hit. After the initial success, Ford designers and Gale Halderman designed and developed the first fastback Mustangs to compliment the coupes. The classic Mustang muscle cars to follow, including the GT, Mach 1, and others, are profiled as well. The Mustang changed automotive history and ushered in the pony car era as a nimble, powerful, and elegantly styled sports coupe. But it could so easily have stumbled and wound up on the scrap pile of failed new projects. This is the remarkable and dramatic story of how the Mustang came to life, the demanding design and development process, and, ultimately, the triumph of the iconic American car.

Flyfisher's Guide to Colorado's Lost Lakes and Secret Places - Kephart, Mike 2014-12-12

Colorado's high elevation offers spectacular, often tremendous fishing that is more often relayed via rumor than reliable report. But in the Flyfisher's Guide to Colorado's Lost Lakes and Secret Places, veteran angler Mike Kephart gives you the scoop on which Colorado mountain and wilderness lakes and creeks fish well, how to get there, the difficulty of access, and what you can expect to catch. These largely untapped fisheries can be off the table to anglers who can't invest the time and effort required to access them only to find poor fishing. Kephart has done the leg-work - and the cast-work - to determine which lakes hold the big ones, the high populations, the hatches, and the rare species like greenback cutthroat and golden trout. The fish in these hard-to-access places can be eager to eat, so getting to the right ones is worth the effort. Beyond the lakes, Kephart covers some remote canyons and gorges, and side canyons within gorges where he's found excellent fishing. The author has done the research, sometimes fishing the lakes several times before discovering the bounty. He also covers forest fires, oil development and grazing as those topics apply to fly fishing in the area. Mike Kephart has paid his dues and yours - take advantage of this great opportunity with this new guide from Wilderness Adventures Press.

Designing Web Navigation - James Kalbach 2007-08-28

Thoroughly rewritten for today's web environment, this bestselling book offers a fresh look at a fundamental topic of web site development: navigation design. Amid all the changes to the Web in the past decade, and all the hype about Web 2.0 and various "rich" interactive technologies, the basic problems of creating a good web navigation system remain. How does your web site serve your business objectives? How does it meet a user's needs? You'll learn that navigation design touches most other aspects of web site development. This book: Provides the foundations of web navigation and offers a framework for navigation design Paints a broad picture of web navigation and basic human information behavior Demonstrates how navigation reflects brand and affects site credibility Helps you understand the problem you're trying to solve before you set out to design Thoroughly reviews the mechanisms and different types of navigation Explores "information scent" and "information shape" Explains "persuasive" architecture and other design concepts Covers special contexts, such as navigation design for web applications Includes an entire chapter on tagging While Designing Web Navigation focuses on creating navigation systems for large, information-rich sites serving a business purpose, the principles and techniques in the book also apply to small sites. Well researched and cited, this book serves as an excellent reference on the topic, as well as a superb teaching guide. Each chapter ends with suggested reading and a set of questions that offer exercises for experiencing the concepts in action.
