*Chemistry* - Nivaldo J. Tro  
2017-01-04

NOTE: This edition features the same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value; this format costs significantly less than a new textbook. Before purchasing, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of MyLab(tm)and Mastering(tm) platforms exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a Course ID, provided by your instructor, to register for and use MyLab and

Mastering products. For courses in two-semester general chemistry. Tells the story of chemistry in a unified and thematic way while building 21st century skills

Bestselling author Nivaldo Tro's premise is that matter is particulate - it is composed of molecules; the structure of those particles determines the properties of matter. " This core idea is the inspiration for his seminal text-Chemistry: Structure and Properties. Dr. Tro emphasizes the relationship between structure and properties, establishes a unique approach to teaching chemistry by presenting atomic and bonding theories early in the course, and stresses key concepts and themes in text, images, and interactive media. The book is organized to present chemistry as a logical, cohesive story from the microscopic to the macroscopic, so students can fully grasp the theories and framework behind the chemical facts. Each topic is carefully crafted to convey to students that the relationship between

structure and properties is the thread that weaves all of chemistry together. The 2nd Edition works seamlessly with Mastering(tm) Chemistry and new eText 2.0 to engage students in active learning and the world of chemistry. Dr. Tro helps readers build 21st century skills, engaging them through new end-of-chapter questions-Data Interpretation and Analysis questions present real data in real life situations and ask students to analyze that data, and Questions for Group Work foster collaborative learning and encourage students to work together as a team to solve problems. Dr. Tro also engages students through the power of video, animations, and real-time assessment with new and expanded interactive media. New Key Concept Videos, newly interactive Conceptual Connections and Self-Assessment Quizzes, and Interactive Worked Examples are embedded in the new eText 2.0 version of the book, enabling students to make connections that they cannot

make by simply reading a static page. Also available with Mastering Chemistry Mastering (tm) Chemistry is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students with powerful content. The enhanced eText 2.0 and Mastering Chemistry work with the book to provide seamless and tightly integrated videos and other rich media and assessment throughout the course. Instructors can assign interactive media before class to engage students and ensure they arrive ready to learn. Students further master concepts through book-specific Mastering Chemistry assignments, which provide hints and answer-specific feedback that build problem-solving skills. With Learning Catalytics(tm) instructors can expand on key concepts and encourage student engagement during lecture through questions answered individually or in pairs and groups. Mastering Chemistry now provides students with the

new General Chemistry Primer for remediation of chemistry math skills needed in the general chemistry course. Unlike many texts on this subject, it is clear and concise, punctuated with practical and familiar examples from students' personal experiences. An exceptional balance of chemical concepts

explains the quantitative aspects of chemistry, and provides deeper insight into theoretical chemical principles. It also sets itself apart by requiring students to master concepts before they can move on to the next chapter. The Seventh Edition focuses on making connections between General, Organic, and Biological Chemistry with a number of new and updated features-including all-new Mastering Reactions boxes, new and updated Chemistry in Action boxes (formerly titled Applications), new and revised chapter problems that strengthen the ties between major concepts in each chapter and practical applications, and much more. 032175011X / 9780321750112 Fundamentals of General, Organic, and Biological Chemistry with MasteringChemistry® Package consists of: 0321750837 / 9780321750839 Fundamentals of General, Organic, and Biological Chemistry 0321776461 / 9780321776464 MasteringChemistry® with Pearson eText -- Access Card --

**General Chemistry** - John E. McMurry 2013-01-02

"General Chemistry: Atoms First," Second Edition starts from the building blocks of chemistry, the atom, allowing the authors to tell a cohesive story that progresses logically through molecules and compounds to help students intuitively follow complex concepts more logically. This unified thread of ideas helps students build a better foundation and ultimately gain a deeper understanding of chemical concepts. Students can more easily understand the microscopic-to-macroscopic connections between unobservable atoms and the observable behavior of matter in daily life, and are brought immediately into real chemistry instead of being forced to memorize facts. Reflecting a true atoms first perspective, the Second Edition features experienced atoms-first authors, incorporates recommendations from a panel

of atoms-first experts, and follows historical beliefs in teaching chemistry concepts based and real experimental data first. This approach distinguishes this text in the market based whereby other authors teach theory first, followed by experimental data.

**Exam Guide** - Dawn Apgar, PhD, LSW, ACSW 2015-05-11  
“Dawn gave us the tools we needed to take the exam, and let me tell you - she was on point! Not only did she cover the content areas we needed to focus in on, but she also showed us how to read and interpret the questions on the exam.” —Ammu D. Kowolik, LMSW, McSilver Institute for Poverty Policy and Research  
Students and social workers preparing for the social work masters licensure exam will find an invaluable study resource in the Social Work ASWB® Masters Exam Guide. Written by a prominent social work leader and trainer for social work licensing exams in the United States, this guide is based on years of time-tested

exam prep workshops conducted by the author. It mirrors the ASWB Masters “Knowledge, Skills, and Abilities” upon which the exam is based and incorporates information from the DSM-5®. The guide is comprehensive yet focuses on the material most likely to be included on the exam, so readers can prioritize information as they study. A self-assessment section helps identify strengths and weaknesses before tackling the material. The author shares her extensive knowledge of the exam by providing useful test-taking strategies and tips for overcoming test anxiety. The 170-question practice test at the end of the guide (with explanations of the correct answers) mirrors the actual exam in both length and structure. Content includes human development, diversity, abuse and neglect, assessment and intervention planning, direct and indirect (micro and macro) practice, and professional values and ethics. This book will be a valuable asset for social workers

throughout the United States and Canada. Key Features:  
Developed by a highly respected educator of social work licensure candidates  
Covers all the content areas on the masters examination, including new content added in 2015  
Begins with a self-assessment section to help identify areas of strength and weakness  
Offers a wealth of test-taking tips and strategies to foster exam confidence  
Includes a practice test (with explanations of the correct answers) that mirrors the exam

**General, Organic, and Biological Chemistry** - Laura D. Frost 2016-01-20

A Concise Introduction to General, Organic, and Biological Chemistry General, Organic, and Biological Chemistry strengthens the evidenced strategy of integrating general, organic, and biological chemistry for a focused introduction to the fundamental connections between chemistry and life. The streamlined approach

offers readers a clear path through the content over a single semester. The Third Edition integrates essential topics more effectively than any text on the market, covering core concepts in each discipline in just 12 comprehensive chapters. Practical connections and applications show readers how to use their understanding of chemistry in everyday life and future health professions. With an emphasis on problem solving and critical thinking, the book promotes active and attentive learning, which now include NEW! media assets, Practicing the Concepts. Featuring coauthor Todd Deal, these 3 to 5 minute videos explore key concepts in general, organic, and biological chemistry that readers traditionally find difficult. Readers gain skills and deepen their knowledge as they watch the videos and then practice what they have learned with Pause & Predict problems and a series of follow up multiple-choice questions. The Third Edition places a greater

emphasis on matching what professors teach in the classroom by increasing the coverage of biochemical applications in each chapter. A new design was created to highlight the career content in order to increase relevancy. Also available as a Pearson eText or packaged with Mastering Chemistry Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience that can be adopted on its own as the main course material. It lets students highlight, take notes, and review key vocabulary all in one place, even when offline. Seamlessly integrated videos and other rich media engage students and give them access to the help they need, when they need it. Educators can easily share their own notes with students so they see the connection between their eText and what they learn in class - motivating them to keep reading, and keep learning. Mastering combines trusted author content with digital tools and a flexible platform to personalize the learning

experience and improve results for each student. Built for, and directly tied to the text, Mastering Chemistry enables an extension of learning, allowing students a platform to practice, learn, and apply outside of the classroom. Note: You are purchasing a standalone book; Pearson eText and Mastering Chemistry do not come packaged with this content. Students, ask your instructor for the correct package ISBN and Course ID. Practical Classroom Management, Loose-Leaf Version with Video-Enhanced Pearson Etext -- Access Card Package - Vern Jones

2014-01-06

This title is only available as a loose-leaf version with Pearson eText, or an electronic book. Succinct, Practical, Interactive, Real. Practical Classroom Management focuses on providing clear and concise descriptions of research-validated best practices. It describes and demonstrates how to effectively apply those practices and includes tools like action plans, forms, and checklists that can be used in real classrooms. Case studies and embedded classroom management simulations

provide opportunities to practice concepts and strategies discussed in the text, making for a powerful learning experience that students can transfer to the classroom. From reviews of the book: "The writing is on level and easy to comprehend. . . . The key strengths of the project include research-based text as it relates to 'practical classroom management,' supported by examples from real classrooms. . . . The author provides the information in a logical sequence that is fitting for any classroom management course." --John Barbato, University of South Florida "[The text] has examples and forms that I encourage my students to keep....Using this text, preservice teachers are exposed to strategies that are practiced in classrooms and problems associated with the dynamics of implementation." -- Antwuan Stinson, Alabama State University Video-Enhanced Pearson eText. Included in this package is access to the new Video-Enhanced eText for exclusively

from Pearson. The Video-Enhanced Pearson eText is: Engaging. What's best for you depends on how much time you have to study and how comfortable you are with the subject matter. Our test prep for CLEP® Natural Sciences and the free online tools that come with it, will allow you to create a personalized CLEP® study plan that can be customized to fit you: your schedule, your learning style, and your current level of knowledge. Here's how it works: Diagnostic exam at the

REA Study Center focuses your study Our online diagnostic exam pinpoints your strengths and shows you exactly where you need to focus your study. Armed with this information, you can personalize your prep and review where you need it the most. Most complete subject review for CLEP® Natural Sciences Written by a science teacher, our CLEP® Natural Sciences test prep features an in-depth review of Biological Science and Physical Science. It covers all the topics found on the official CLEP® exam that you need to know: origin and evolution of life; cell organization; structure, function, and development in organisms; population biology; atomic and nuclear structure and properties; heat, thermodynamics, and states of matter; electricity and magnetism; the universe, and more. The review also includes a glossary of must-know terms. Two full-length practice exams The online REA Study Center gives you two full-length practice tests and the most powerful scoring analysis and

diagnostic tools available today. Instant score reports help you zero in on the CLEP® Natural Sciences topics that give you trouble now and show you how to arrive at the correct answer-so you'll be prepared on test day. Our CLEP® test preps are perfect for adults returning to college (or attending for the first time), military service members, high-school graduates looking to earn college credit, or home-schooled students with knowledge that can translate into college credit. **The Content of Science** -

Peter J. Fensham 1994

This book is a result of a workshop where 14 science educators were invited to draft chapters on the implications that the research studies in a specific content area of science have for its teaching. The relations between social forces and perceptions of purpose and content lay behind discussions in the workshop, and influenced the emergence of three major issues concerning science content: its variety; its complexity; and the relation between content and action. Chapters include: (1) "Science Content and Constructivist Views of Learning and Teaching" (Peter Fensham; Richard Gunstone; and Richard White) and "Constructivism: Some History" ((David Hawkins); (2) "Beginning to Teach Chemistry" (Peter Fensham); (3) "Generative

Science Teaching" (Merlin Wittrock); (4) "Constructivism, Re-constructivism, and Task-oriented Problem-solving" (Mike Watts); (5) "Structures, Force, and Stability. Design a Playground" (Cliff Malcolm); (6) "Pupils Understanding Magnetism in a Practical Assessment Context: The Relationship Between Content, Process and Progression" (Galen Erickson); (7) "Primary Science in an Integrated Curriculum" (Maureen Duke; Wendy Jobling; Telsa Rudd; and Kate Brass); (8) "Digging into Science-A Unit Developed for a Year 5 Class" (Kate Brass and Wendy Jobling); (9) "Year 3: Research into Science" (Kate Brass and Telsa Rudd); (10) "The Importance of Specific Science Content in the Enhancement of Metacognition" (Richard Gunstone); (11) "The Constructivist Paradigm and Some Implications for Science Content and Pedagogy" (Malcolm Carr; Miles Barker; Beverly Bell; Fred Biddulph; Alister Jones; Valda Kirkwood; John Pearson; and David

Symington); (12) "Making High-tech Micrographs Meaningful to the Biology Student" (James Wandersee); (13) "Year 9 Bodies" (Anne Symons; Kate Brass; and Susan Odgers); (14) "Learning and Teaching Energy" (Reinders Duit and Peter Haeussler); (15) "Working from Children's Ideas: Planning and Teaching a Chemistry Topic from a Constructivist Perspective" (Philip Scott; Hilary Asoko; Rosalind Driver; and Jonathan Emberton); (16) "States of Matter-Pedagogical Sequence and Teaching Strategies Based on Cognitive Research" (Ruth Stavy); (17) "Pedagogical Outcomes of Research in Science Education: Examples in Mechanics and Thermodynamics" (Laurence Viennot and S. Edu.net - Stephen J. Ball  
2017-04-07

Edu.net builds upon, and extends, a series of research studies of education policy networks and global policy mobilities. It draws on comprehensive data resulting from a Leverhulme Trust research study focused on Africa, and a study funded by the British Academy focused on India, which explored the way in which global actors and organisations bring policy ideas to bear and are joined up in a global education policy network. This timely and cutting-edge new work develops concepts, analyses and methods deployed in Education Plc (2008), Networks, New Governance and Education (2012) and Global Education Inc. (2012). The research is framed by an elaboration of Network Ethnography, an innovative method of policy research. Edu.net presents the substantive findings of the authors' research by focusing on various kinds of policy movement - people, ideas,

practices, methods, money. The book is about both global education policy and ways of researching policy in a global setting. It is an essential read for policy analysts, educational academic researchers and postgraduate education students alike.
