Bulk Material Handling - Michael Rivkin Ph.D.  
2018-09-15

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to

any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

### **Addressing Challenging Moments in**

**Psychotherapy** - Jerome S. Gans 2021-09-30

"This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy,

treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--

*The New Rules of Lifting Supercharged* - Lou Schuler 2012-12-27

This supercharged new edition of The New Rules

of Lifting features all-new workouts to build maximum muscle in both men and women. Lou Schuler and Alwyn Cosgrove's *The New Rules of Lifting*, *The New Rules of Lifting for Women*, and *The New Rules of Lifting for Abs* have revolutionized how people lift weights. *The New Rules of Lifting Supercharged* is a total reboot of the weightlifting workout book that launched the series in 2006, packing even more power on every page. Featuring ten completely new workouts for both women and men, *Supercharged* emphasizes four major movements that do the most to change the way your body looks, feels, and performs: squat, deadlift, push, and pull. In addition, Cosgrove's updated total-body workout program improves core strength, mobility, flexibility, balance, endurance, and athleticism . . . all in just three hours a week of exercise. Another big change from the original *New Rules of Lifting* is a self-customized workout system. Readers can choose their own exercises from a menu for each

movement category, allowing beginner and advanced lifters to get tremendous results from the same basic plan. Each workout ends with a "finisher"—five to ten minutes of fun but high-effort drills such as complexes, intervals, and density training, with the choice of the reader's favorite exercises. The ultimate guide to total-body strengthening, this supercharged edition of *The New Rules of Lifting* will lift readers to stratospheric results.

**Blade-Mounted Trailing Edge Flap Control  
for Bvi Noise Reduction** - National  
Aeronautics and Space Administration (NASA)  
2018-07-23

Numerical procedures based on the 2-D and 3-D  
full potential equations and the 2-D Navier-  
Stokes equations were developed to study the  
effects of leading and trailing edge flap motions  
on the aerodynamics of parallel airfoil-vortex  
interactions and on the aerodynamics and  
acoustics of the more general self-generated  
rotor blade vortex interactions (BVI). For  
subcritical interactions, the 2-D results indicate  
that the trailing edge flap can be used to  
alleviate the impulsive loads experienced by the  
airfoil. For supercritical interactions, the results  
show the necessity of using a leading edge flap,  
rather than a trailing edge flap, to alleviate the  
interaction. Results for various time dependent

flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed rotor were obtained.

**Terrace VI** - Sarah L Johnson 2021-07-07

Welcome to the Sixth Terrace of Dante's tower of Purgatory, serving up sins of gluttony in an

eternal banquet. On this carefully curated menu you'll find children stuffing themselves to death, a forgotten saviour gorging on cheeseburgers between bareknuckle rounds on the roadhouse circuit, wealthy socialites revel in an orgiastic alien feast, and the end of days as seen through an apocalyptic carnival of indulgence. Excessive consumption also manifests in darker hungers, for cruelty, for distraction, or possession. A pair of grifters bent on having it all chase a Scottish leprechaun across the English countryside, a newly deceased addict vies for the attention of Heavenly Higher Ups, degenerate poker players gamble with unforeseen currency, and when an old lady swallows a fly, it's just the beginning... Featuring nine stories of grotesque appetite and glorious excess from a gory gaggle of creators, they say too much of anything is poison, yet these condemned swallow each piece of forbidden fruit while reaching for the next, never to be sated. They can't help themselves. Can you? Stories and art by: Mike Thorn (Darkest

Hours, Shelter for the Damned) Robin van Eck (Rough) Eddie Generous (Camp Summit, What Lurks Beneath, Behemoth Rising) Julie Hiner (Final Track) Konn Lavery (Mental Damnation Series, Rutherford Manor Series) Cam Hayden (Futility, Red Flag) Sarah L.
