[Recent Progress in Functional Analysis](#) - Manuel Valdivia 2001

This Proceedings Volume contains 32 articles on various interesting areas of present-day functional analysis and its applications: Banach spaces and their geometry, operator ideals, Banach and operator algebras, operator and spectral theory, Frechet spaces and algebras, function and sequence spaces. The authors have taken much care with their articles and many papers present important results and methods in active fields of research. Several survey type articles (at the beginning and the end of the book) will be very useful for mathematicians who want to learn "what is going on" in some particular field of research.

A Guide to Complicated Watches - François Lecoultre 1985

Of Gods and Monsters - John T. Soister
2015-09-18

While Universal's *Dracula* and *Frankenstein* (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with *The Last Warning*, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's *The Shadow* short film series

is covered in an appendix. Many rare illustrations and movie posters are also included.

Home Sweet Home - Oberto Gili 2011

A visual feast on 'the extravagance of the bohemian', the homes in this collection are a testament to personal style that readers will find inspiring and influential. Since the 1970s, Oberto Gili has been one of the most prolific lenses in the world of editorial photography, his lush images of fashion and interiors gracing the pages of *House & Garden*, *Town & Country*, and *Vogue*. This collection of his signature interior photography spans this significant career. Gili's passion for the grand, bold, and quirky granted him access to the inner sanctums of both high society and the bohemian demimonde. The selection includes numerous homes of French and Italian nobility, lords of the European and American creative class, and the photographer's own remarkable Piedmont farmhouse. This volume of Gili's best work is a sumptuous and voyeuristic study of his most arresting interiors and emphasizes the adventurous nature of both the homes and their occupants. These homes exude in turns grandeur, whimsy, and tranquility, each interior imbued with the unique style of its occupants. The book features more than 40 homes throughout the world--from New York penthouses and artist lofts to seventeenth-century Italian villas and country homes in Morocco--each personally selected by Gili and shown in full. Each house is accompanied by a short descriptive text by Susanna Salk. Sprinkled throughout the book are 10 short texts by selected homeowners (Isabella Rossellini, Mary Randolph Carter, Muriel Brandolini, Marella Caracciolo, Paul Fortune, and Beatrice

Monti, among others) describing a personal history of the individual spaces.

The Law Weekly - Venbakkam C. Seshachariar
1917

Product Innovation Toolbox - Jacqueline H. Beckley 2012-03-07

Product Innovation Toolbox: A Field Guide to Consumer Understanding and Research brings together key thought-leaders and seasoned consumer researchers from corporate R&D, academia and marketing research companies to share their experiences, cutting edge consumer research tools and practical tips for successful and sustainable product innovation. This is an essential resource for product developers, marketers and technologists who want to implement consumer-centric innovation and are responsible for designing product-testing strategies from upfront innovation to support new product development. The scope of the book by chapter shows the steps that transform a consumer researcher to a Consumer Explorer that guides the project team to successful innovation and new product introductions. Product Innovation Toolbox is designed to appeal to broad audiences from consumer researchers, product developers, marketers and executives. With an emphasis on consumer understanding and examples that range from cheese to lipstick and printers to energy beverages, Product Innovation Toolbox offers guidelines and best practices for strategizing, planning and executing studies with confidence and high efficiency yielding faster and better insights.

Proteomics in Biomedicine and Pharmacology -
2014-07-03

Volume 95 of *Advances in Protein Chemistry and Structural Biology* focuses on advances in proteomic techniques and their application in biomedicine and pharmacology. This volume describes in detail the applications of these techniques in studying a number of diseases and specific protein modifications and profiles, including phosphoproteomics, glycoproteomics, and more. Published continuously since 1944, the *Advances in Protein Chemistry and Structural Biology* series is the essential resource for protein chemists. Each volume brings forth new information about protocols

and analysis of proteins. Each thematically organized volume is guest edited by leading experts in a broad range of protein-related topics. Describes advances in application of powerful techniques in translational research (biomedicine and pharmacology) Chapters are written by authorities in their field Targeted to a wide audience of researchers, specialists, and students The information provided in the volume is well supported by a number of high quality illustrations, figures, and tables

Optimization and Performance Analysis of High Speed Mobile Access Networks - Thushara Weerawardane 2012-01-07

The design and development of cost-effective mobile broadband wireless access networks is a key challenge for many mobile network operators. The over-dimensioning or under-dimensioning of an access network results in both additional costs and customer dissatisfaction. Thushara Weerawardane introduces new transport technologies and features for High Speed Packet Access (HSPA) and Long-Term Evolution (LTE) networks. Using advanced scientific methods, he proposes new adaptive flow control and enhanced congestion control algorithms, then defends them with highly-developed analytical models derived from Markov chains. For faster analysis, compared to long-lasting detailed simulations, these models provide optimum network performance and ensure reliable quality standards for end users during transport network congestion. Further, the author investigates and analyzes LTE transport network performance by introducing novel traffic differentiation models and buffer management techniques during intra-LTE handovers.

Pre-Schoolers with Autism - Avril Brereton
2005-01-15

The title is an effective, manualized parent education programme' - Educational Book Review This ground-breaking training programme has been developed in response to a real need for evidence-based early interventions for very young autistic children. Authoritative and extensively tried and tested, it will help both parents and carers to understand the disorder and how it affects child development. Ultimately, the programme is designed to reduce the severity of emotional/behavioural difficulties by

managing a child's particular problems and encouraging effective collaboration between professionals and parents. The programme is delivered through two accessible manuals - one for parents and one for clinicians - which provide all the information and materials you need. The Manual for Clinicians explains the purpose and content of each session and includes notes for discussion and teaching, a checklist of 'things to do', and photocopyable task sheets for distribution and discussion. The Manual for Parents features tasks, exercises and discussion points for group sessions, and complements these training materials with engaging personal accounts, an introduction to the history of autism, information about approaches to treatment, and a list of useful websites and further reading. Structured as a series of individual and small group sessions, the programme is designed to run for 20 weeks and covers key areas such as understanding and managing difficult behaviour; changing/encouraging new behaviours; communication problems in verbal and non-verbal children; social problems; and how to work and play together. Together, these manuals will provide you with all the information, support and resources you need to run this programme successfully.

Reconstructing the Native South - Melanie Benson Taylor 2012-01-15

In *Reconstructing the Native South*, Melanie Benson Taylor examines the diverse body of Native American literature in the contemporary U.S. South--literature written by the descendants of tribes who evaded Removal and have maintained ties with their southeastern homelands. In so doing Taylor advances a provocative, even counterintuitive claim: that the U.S. South and its Native American survivors have far more in common than mere geographical proximity. Both cultures have long been haunted by separate histories of loss and nostalgia, Taylor contends, and the moments when those experiences converge in explicit and startling ways have yet to be investigated by scholars. These convergences often bear the scars of protracted colonial antagonism, appropriation, and segregation, and they share preoccupations with land, sovereignty, tradition, dispossession, subjugation, purity, and violence. Taylor poses difficult questions in this work. In the aftermath of Removal and colonial devastation, what remains--for Native and non-Native southerners--to be recovered? Is it acceptable to identify an Indian "lost cause"? Is a deep sense of hybridity and intercultural affiliation the only coherent way forward, both for the New South and for its oldest inhabitants? And in these newly entangled, postcolonial environments, has global capitalism emerged as the new enemy for the twenty-first century? *Reconstructing the Native South* is a compellingly original work that contributes to conversations in Native American, southern, and transnational American studies.

One-Minute Answers to Skeptics - Charlie H. Campbell 2010-01-01

Speaking all over the United States about apologetics issues, Charlie Campbell has heard just about every question skeptics have to offer. In this concise, reader-friendly handbook, he provides brief responses to the top-40 questions that keep people from the faith, such as... What evidence do you have that God exists? How do you know the Bible is actually true? What about those who have never heard of Jesus? Will they be condemned to hell? If God is so loving, why does He allow evil and suffering? How can you say Jesus is the only way to heaven? Don't all religions basically teach the same thing? Aren't a lot of churchgoers hypocrites? With a gracious introductory note to skeptical readers and a generous sprinkling of inspiring quotes throughout, this handy resource is an enjoyable read as well as a powerful evangelistic tool.

Photographer's Guide to the Fujifilm X10 - Alexander White 2012-04

This book, a complete guide to the operation and features of the Fujifilm X10 digital camera, is a follow-up to the author's earlier guides to advanced compact digital cameras, including the Fujifilm X100 as well as models by Leica, Panasonic, Canon, and Nikon. The new book explains all operations, features, menus, and controls of the Fujifilm X10 camera in clear language, providing guidance not only about how to accomplish things with the camera, but when and why to use certain features. The book does not assume any specialized knowledge by the reader, but explains topics such as shooting modes, autofocus, manual focus, depth of field, aperture priority, shutter priority, HDR (High Dynamic Range) photography, white balance, ISO, and macro photography. The book shows how to take advantage of the camera's unique CMOS sensor with Fujifilm's EXR technology. This special sensor enables the camera to be configured for high resolution, high sensitivity in dim lighting, or high dynamic range, depending on the lighting conditions the photographer is faced with. The book also provides guidance about the many the X10's many other advanced settings, including adjustments for Color, Sharpness, Highlight Tone, Shadow Tone, and numerous others. The guide's more than 200 photographs, almost all in full color, provide

illustrations of the camera's controls and menus, and include examples of the various types of photographs that can be taken using the many creative settings of the camera, including the Film Simulation settings, which let the photographer alter the color processing and other aspects of images; various menu options such as Dynamic Range and Intelligent Digital Zoom; and the camera's strong set of features for continuous shooting. In addition, the book goes beyond everyday photography with introductions to more advanced topics such as infrared photography, astrophotography, digiscoping, street photography, and creating 3D (three-dimensional) images that can be viewed with conventional red and blue 3D glasses. The book also includes a full discussion of the video recording abilities of the Fujifilm X10, which can capture high-definition (HD) video with stereo sound and can take silent slow-motion movies to enable studies of sports and other actions. In three appendices, the book provides information about accessories available for the camera, including cases, filter adapters, and external flash units; sets forth a list of useful web sites and other resources for further information; and includes a section with helpful "quick tips" that give particular insights into how to take advantage of the camera's features in the most efficient ways possible. The book includes a detailed Table of Contents and a full Index, so the reader can quickly find needed information about any particular feature or aspect of the camera.

Problems from Philosophy - James Rachels
2008-03-21

"This [text] is an introduction to some of the main problems of philosophy—the existence of God, the nature of the mind, human freedom, the limits of knowledge, and the truth about ethics. The chapters may be read independently of one another, but when read in order, they tell a more or less continuous story. We begin with some reflections on the life of Socrates and then go on to the existence of God, which is the most basic philosophical question, because our answer to it affects everything else. This leads naturally to a discussion of death and the soul, and then to more modern ideas about the nature of persons. The later chapters are about whether we can have objective knowledge in either science or

ethics." -from the Preface Problems from Philosophy represents the final work of author and philosopher James Rachels. In it, he brings the same liveliness and clarity to the introduction of philosophy that he brings to his best-selling ethics text, *The Elements of Moral Philosophy*. This second edition has been revised by Rachels' son Stuart, who carefully has carefully refined his father's work to further strengthen its clarity and accessibility.

Big Data Integration - Xin Luna Dong
2015-02-01

The big data era is upon us: data are being generated, analyzed, and used at an unprecedented scale, and data-driven decision making is sweeping through all aspects of society. Since the value of data explodes when it can be linked and fused with other data, addressing the big data integration (BDI) challenge is critical to realizing the promise of big data. BDI differs from traditional data integration along the dimensions of volume, velocity, variety, and veracity. First, not only can data sources contain a huge volume of data, but also the number of data sources is now in the millions. Second, because of the rate at which newly collected data are made available, many of the data sources are very dynamic, and the number of data sources is also rapidly exploding. Third, data sources are extremely heterogeneous in their structure and content, exhibiting considerable variety even for substantially similar entities. Fourth, the data sources are of widely differing qualities, with significant differences in the coverage, accuracy and timeliness of data provided. This book explores the progress that has been made by the data integration community on the topics of schema alignment, record linkage and data fusion in addressing these novel challenges faced by big data integration. Each of these topics is covered in a systematic way: first starting with a quick tour of the topic in the context of traditional data integration, followed by a detailed, example-driven exposition of recent innovative techniques that have been proposed to address the BDI challenges of volume, velocity, variety, and veracity. Finally, it presents merging topics and opportunities that are specific to BDI, identifying promising directions for the data integration community.

Information Technology for Management -

Efraim Turban 2013-01-14

This text is an unbound, binder-ready edition. Information Technology for Management by Turban, Volonino Over the years, this leading IT textbook had distinguished itself with an emphasis on illustrating the use of cutting edge business technologies for achieving managerial goals and objectives. The 9th ed continues this tradition with coverage of emerging trends in Mobile Computing and Commerce, IT virtualization, Social Media, Cloud Computing and the Management and Analysis of Big Data along with advances in more established areas of Information Technology. The book prepares students for professional careers in a rapidly changing and competitive environment by demonstrating the connection between IT concepts and practice more clearly than any other textbook on the market today. Each chapter contains numerous case studies and real world examples illustrating how businesses increase productivity, improve efficiency, enhance communication and collaboration, and gain competitive advantages through the use of Information Technologies.

Refurbishment Manual -

Georg Giebeler 2012-12-10
Planning tasks involving existing structures are currently among the most common types of contract, and almost every structure makes different demands and raises individual problems. Reflecting this state of affairs, there

are a dizzying number of publications on the market, most of which are quite specialized. The Refurbishment Manual cuts through this jungle of publications. It defines terms and concepts, combines the narrowly focused perspectives of the specialists, and offers concrete approaches to this wide-ranging topic. The Refurbishment Manual closes the gap between basic constructional literature and one-sided, highly specialized technical literature. It constitutes a practical planning aid on the subject of refurbishment, providing a basic introduction to the relevant aspects of building physics, fire protection, sustainability and energy, hazardous materials, construction materials for interior and façade, historic preservation, and technical building equipment. It offers concrete tips on planning steps, methods of building analysis, and cost benchmarks, as well as clear constructional solutions with built projects as examples. A unique feature of the volume is the specially developed timeline, which allows the planner to quickly grasp, categorize, and evaluate a concrete building task and thus obtain an efficient planning overview. Planungsaufgaben im Bestand gehören derzeit zu den häufigsten Auftragsarten und nahezu jedes Bauwerk stellt andere Anforderungen und weist individuelle Probleme auf. Analog dazu gibt es auf dem Markt eine fast unüberschaubare Anzahl Publikationen in meist sehr spezialisierter Form. Der Sanierungsatlas möchte Licht in diesen Publikationsdschungel bringen: Er definiert Begrifflichkeiten, vereint die fokussierenden Betrachtungsweisen der Fachleute und vermittelt konkrete Herangehensweisen an diese weit gefächerte Thematik. Der Sanierungsatlas schließt die Lücke zwischen grundlegender Baukonstruktions- und sehr einseitig spezialisierter Fachliteratur. Das Buch stellt eine praktische Planungshilfe zum Thema Sanierung dar – und zwar in Form von relevanter Grundlagenvermittlung zu Bauphysik, Brandschutz, Nachhaltigkeits- und energetischen Aspekten, Schadstoffen, Baustoffen im Innenraum und an der Fassade, zu Aspekten der Denkmalpflege ebenso wie zur technischen Gebäudeausstattung. Er liefert konkrete Hinweise zu Planungsschritten, Methoden der Bauanalyse und

Kostenkennwerten sowie anschauliche Konstruktionslösungen am Beispiel gebauter Projekte. Einzigartig ist die speziell entwickelte Zeitschiene, mit deren Hilfe eine konkrete Bauaufgabe schnell erfasst, kategorisiert und bewertet werden kann - und die dem Planer somit einen effizienten Planungsüberblick verschafft.

North American Wildland Plants - James L. Stubbendieck 2017-05

North American Wildland Plants contains descriptions of the salient characteristics of the most important wildland plants of North America. This comprehensive reference assists individuals with limited botanical knowledge as well as natural resource professionals in identifying wildland plants. The two hundred species of wildland plants in this book were selected because of their abundance, desirability, or poisonous properties. Each illustration has been enhanced with labels pointing to key characteristics to facilitate the identification of unknown plants. Each plant description includes plant characteristics, an illustration of the plant with enlarged parts, and a general distribution map for North America. Each species description includes nomenclature; life span; origin; season of growth; inflorescence, flower or spikelet, or other reproductive parts; vegetative parts; and growth characteristics. Brief notes are included on habitat; livestock losses; and historic, food, and medicinal uses. This third edition contains additional refinements in the nomenclature, distribution, illustrations, and descriptions of plants.

El Patólogo. Parte I: Memento Mori - Max Kroennen 2021-10-06

A los doce años, Nicholas Goering sobrevivió milagrosamente a un disparo en la cabeza perpetrado por su propio padre, después de que este matara a su madre y se suicidara sin motivo aparente. Veinticinco años más tarde, ahora convertido en un referente de la Patología Forense en el prestigioso hospital de la ciudad sajona de Heimstadt, el misántropo doctor tendrá que lidiar con el caso más extraño de su carrera: el cuerpo de su padre ha aparecido en perfecto estado de conservación colgado como en el día de su muerte y le han colocado los órganos internos de distintas personas. El

recientemente ascendido y temperamental detective Matías Vandergelb, quien desprecia al patólogo, y la ambiciosa psiquiatra Angélica Grunnewald, quien, por el contrario, está obsesionada con él, serán los encargados de intentar resolver el rompecabezas humano en una carrera contrarreloj. *Memento Mori* es la primera entrega de la trilogía.

Object Design - Rebecca Wirfs-Brock 2003
Object technology pioneer Wirfs-Brock teams with expert McKean to present a thoroughly updated, modern, and proven method for the design of software. The book is packed with practical design techniques that enable the practitioner to get the job done.

Obstetrics and Gynecology on Call - Ira R. Horowitz 1993

This is the most recent of the problem-oriented On Call series and comprises a pocket-sized manual covering more than 70 urgent obstetric or gynaecological problems that resident physicians or house officers may face when on call. For each problem, the text provides a definition, immediate questions to ask, a differential diagnosis, diagnostic steps to take and treatment. Also included is information on laboratory tests, procedures, fluids and electrolytes, blood component therapy, ventilator management and commonly used medications.

Polyamines - Kazutomo Imahori 1985-12

The significance of polyamines in cell proliferation and carcinogenesis has stimulated further research interest in their biochemistry and metabolism. These papers, which update the available literature on polyamines, are grouped into four main areas: the metabolism of polyamines; the effect of polyamines on cellular metabolism; inhibitors of polyamine metabolism and their clinical relevance; application to diagnosis and prognosis. The Proceedings include contributions from a wide range of research interests with special emphasis being placed on the clinical aspects of these compounds.

Cities, Change, and Conflict - Nancy Kleniewski 2019-02-25

Cities, Change, and Conflict was one of the first texts to embrace the perspective of political economy as its main explanatory framework, and then complement it with the rich contributions

found in the human ecology perspective. Although its primary focus is on North American cities, the book contains several chapters on cities in other parts of the world, including Europe and developing nations, providing both historical and contemporary accounts on the impact of globalization on urban development. This edition features new coverage of important recent developments affecting urban life, including the implications of racial conflict in Ferguson, Missouri, and elsewhere, recent presidential urban strategies, the new waves of European refugees, the long-term impacts of the Great Recession as seen through the lens of Detroit's bankruptcy, new and emerging inequalities, and an extended look into Sampson's Great American City. Beyond examining the dynamics that shape the form and functionality of cities, the text surveys the experience of urban life among different social groups, including immigrants, African Americans, women, and members of different social classes. It illuminates the workings of the urban economy, local and federal governments, and the criminal justice system, and also addresses policy debates and decisions that affect almost every aspect of urbanization and urban life.

Programming and Scheduling Techniques -

Thomas Uher 2012-03-29

Planning is an important management function and its effective execution is crucial to ensure the success of any project. This second edition of Thomas Uher's and Adam Zantis' textbook maintains its focus on operational rather than strategic aspects of programming and scheduling of projects, providing the reader with the practical planning skills needed to be successful. Unlike most other textbooks that largely focus on the critical path method, *Programming and Scheduling Techniques* includes a comprehensive review of a range of practices used around the world. Topics covered in this thoroughly revised edition include: deterministic scheduling techniques including

the bar chart, the critical path method, the critical chain method, the multiple activity chart and the line of balance a comparison of the critical path and critical chain scheduling techniques options for computer-based scheduling stochastic scheduling techniques including the critical path method based on Monte Carlo simulation and the Program Evaluation and Review Technique (PERT) risk in scheduling work study. By covering a broad range of scheduling techniques this book is suitable for those planning projects in any industry, particularly in interdisciplinary or international contexts. Written for students studying undergraduate and postgraduate architecture, building, construction/project management, quantity surveying, property development and civil engineering programs. *Statute Law (Repeals) Bill [H.L.]* - Great Britain. Parliament. House of Lords 1993

French in Action - Adelaide Russo 1987

Since it was first published, *French in Action: A Beginning Course in Language and Culture* -- The Capretz Method has been widely recognized in the field as a model for video-based foreign-language instructional materials. This groundbreaking, critically acclaimed approach to French language learning effectively combines video, audio, and text to help students use real, unsimplified French in the dynamic context of actual communication. Designed to be used in conjunction with the celebrated PBS video series (available from the Annenberg/CPB Project), the print and audio materials, which form the complete program, include textbooks, an instructor's guide, workbooks, an extensive audio program, study guides, and a testing program. This second edition textbook is now available in two separate volumes -- parts 1 and 2 -- each covering 26 lessons of instruction. Major funding for *French in Action* was provided by the Annenberg/CPB Project. Copyright © Libri GmbH. All rights reserved.
