The Challenger Customer - Brent Adamson
2015-09-08

Four years ago, the bestselling authors of *The Challenger Sale* overturned decades of conventional wisdom with a bold new approach to sales. Now their latest research reveals something even more surprising: Being a Challenger seller isn't enough. Your success or failure also depends on who you challenge. Picture your ideal customer: friendly, eager to meet, ready to coach you through the sale and champion your products and services across the organization. It turns out that's the last person you need. Most marketing and sales teams go after low-hanging fruit: buyers who are eager and have clearly articulated needs. That's simply human nature; it's much easier to build a relationship with someone who always makes time for you, engages with your content, and listens attentively. But according to brand-new CEB research—based on data from thousands of B2B marketers, sellers, and buyers around the world—the highest-performing teams focus their time on potential customers who are far more skeptical, far less interested in meeting, and ultimately agnostic as to who wins the deal. How could this be? The authors of *The Challenger Customer* reveal that high-performing B2B teams grasp something that their average-performing peers don't: Now that big, complex deals increasingly require consensus among a wide range of players across the organization, the limiting factor is rarely the salesperson's inability to get an individual stakeholder to agree to a solution. More often it's that the stakeholders inside the company can't even

agree with one another about what the problem is. It turns out only a very specific type of customer stakeholder has the credibility, persuasive skill, and will to effectively challenge his or her colleagues to pursue anything more ambitious than the status quo. These customers get deals to the finish line far more often than friendlier stakeholders who seem so receptive at first. In other words, Challenger sellers do best when they target Challenger customers. The Challenger Customer unveils research-based tools that will help you distinguish the "Talkers" from the "Mobilizers" in any organization. It also provides a blueprint for finding them, engaging them with disruptive insight, and equipping them to effectively challenge their own organization.

Treating Health Anxiety - Steven Taylor

2004-02-13

Grounded in current theory and treatment research, this highly practical book presents a comprehensive framework for assessing and treating health anxiety, including full-blown and milder (subclinical) forms of hypochondriasis. The current state of knowledge about these prevalent and costly problems is reviewed, and assessment methods and empirically supported treatments described. Clear, step-by-step recommendations are provided for engaging patients or clients, implementing carefully planned cognitive and behavioral interventions, and troubleshooting potential pitfalls. Important advances in pharmacotherapy for persons with health anxiety disorders are also discussed. Enhancing the utility of this clinician- and student-friendly resource are numerous case examples and sample dialogues, quick-reference tables and boxed material, and over 20 reproducible handouts and assessment forms. Orphan Crops for Sustainable Food and Nutrition Security - Stefano Padulosi

2021-09-22

Orphan Crops for Sustainable Food and Nutrition Security discusses the issues, challenges, needs and opportunities related to the promotion of orphan crops, known also as neglected and underutilized species (NUS). The book is structured into six parts, covering the following themes: introduction to NUS, approaches, methods and tools for the use enhancement of NUS, integrated conservation and use of minor millets, nutritional and food security roles of minor millets, stakeholders and global champions, and, building an enabling environment. Presenting a number of case studies at the regional and country levels, the chapters cover different but highly interlinked aspects along the value chains, from acquisition and characterization of genetic diversity, cultivation and harvesting to value addition, marketing, consumption and policy for mainstreaming. Cross-cutting issues like gender, capacity building and empowerment of

vulnerable groups are also addressed by authors. Representatives from communities, research for development agencies and the private sector also share their reflections on the needs for the use enhancement of NUS from their own perspectives. This book will be of great interest to students and scholars of food security, sustainable agriculture, nutrition and health and development, as well as practitioners and policymakers involved in building more resilient food and production systems.

The Fluvial System - Stanley Alfred Schumm
2003

Originally published in 1977, this is a classic of the geomorphology literature. Erosion, transport, and deposition of sediment within river catchments concern a wide range of earth scientists and profoundly affect land management. Upland soil removal engages the attention of soil conservationists, hydraulic engineers deal with fluvial sediment transport and river channel morphology, and patterns of sediment deposition in riverine and coastal lowlands affect navigability, the habitability of valley floors and the distribution of groundwater and minerals. The author argues persuasively that fluvial geomorphology, sedimentology and stratigraphy provide insights into each of these components of the river basin. "This volume, with its generous illustrations will be welcomed by earth scientists generally. It fills an important niche in the fluvial literature and its lucid style and clear exposition place it well within the range of students in any form of higher education." Nature "As a synthesis of the fluvial system and its effects on the landscape, as a primer in fluvial geomorphology and sedimentation for the planner, engineer and economic geologist, and as a stimulator of geomorphic thought, this book is most valuable." American Scientist Dr. Schumm is an internationally recognized geomorphologist who has published 150 papers and authored and edited 11 books. His primary experience has been in the investigation and analysis of fluvial systems. He has applied the concepts of geomorphology, fluvial hydraulics and geology to

analyze alluvial river form and shape, sediment transport and effects of man-induced changes on river systems throughout the United States and in numerous foreign countries. He has also been involved in the interpretation of lunar and Martian landforms. Dr. Schumm is a past Chairman of the Geomorphology Division of the Geological Society of America, has served on technical and committees of the National Research Council, the Geological Society of America, the American Geophysical Union, International Geographic Union, the National Science Foundation and NASA. He has performed research, lectured and advised government agencies around the world.

Introducción a la Lingüística Hispánica - José Ignacio Hualde 2010

Written entirely in Spanish, this is the ideal introduction to Spanish linguistics for students. Using clear explanations, it covers all the basic concepts required to study the structural aspects of the Spanish language - phonetics and phonology, morphology and syntax - as well as

the history of Spanish, its dialects and linguistic variation. This second edition incorporates new features designed to enhance its usefulness for classroom teaching: chapters have been added on the sociolinguistics of Spanish in the USA, and on semantics and pragmatics. The chapter on syntax has been considerably expanded. Numerous exercises have been added throughout the book, as well as a new glossary to help with technical terms.

Optimal Design of Water Distribution Networks - Pramod R. Bhave 2003

Design of water distribution networks is traditionally based on trial-and-approach in which the designer assumes, based on experience and judgment, sizes of different elements and successively modifies them until a network with satisfactory hydraulic performance is obtained. This text covers: Essential hydraulic, economic optimization principles. Theory is developed gradually for optimal design of simple, single-source branched networks subjected to single loading to complex, multiple-source looped networks subjected to multiple loading. Strengthening and expansion of existing networks and also reliability-based design. Several illustrative examples enabling the reader to apply them in practice- approximately 100 line drawings.

The Newbie's Guide to Cnc Routing - Prof. Henry 2018-09-07

If you've recently purchased a CNC machine for your shop, or are just wanting to learn more about using one for woodworking and other crafts before you take the plunge, this is the book for you. You'll learn the basics behind the sometimes mystifying world of these fantastic

machines, how to design your projects, which tools to use, how to painlessly convert your designs into language the CNC can understand, and pick up some tips on getting started in the shop and using your CNC safely. You'll find everything in simple non-technical language, that will move you from Newbie to Novice in easy-to-understand steps.

The Oxford Handbook of Engineering and Technology in the Classical World - John Peter Oleson 2008-01-31

Nearly every aspect of daily life in the Mediterranean world and Europe during the florescence of the Greek and Roman cultures is relevant to the topics of engineering and technology. This volume highlights both the accomplishments of the ancient societies and the remaining research problems, and stimulates further progress in the history of ancient technology. The subject matter of the book is the technological framework of the Greek and Roman cultures from ca. 800 B.C. through ca. A.D. 500 in the circum-Mediterranean world and Northern Europe. Each chapter discusses a technology or family of technologies from an analytical rather than descriptive point of view, providing a critical summation of our present knowledge of the Greek and Roman accomplishments in the technology concerned and the evolution of their technical capabilities over the chronological period. Each presentation reviews the issues and recent contributions, and defines the capacities and accomplishments of the technology in the context of the society that used it, the available "technological shelf," and the resources consumed. These studies introduce and synthesize the results of excavation or specialized studies. The chapters are organized in sections progressing from sources (written and representational) to primary (e.g., mining, metallurgy, agriculture) and secondary (e.g., woodworking, glass production, food preparation, textile production and leather-working) production, to technologies of social organization and interaction (e.g., roads, bridges, ships, harbors, warfare and fortification), and finally to studies of general social issues (e.g., writing, timekeeping, measurement, scientific instruments, attitudes toward technology and innovation) and the relevance of ethnographic methods to the study

of classical technology. The unrivalled breadth and depth of this volume make it the definitive reference work for students and academics across the spectrum of classical studies.

Analysis of Water Distribution Networks -

Pramod R. Bhawe 2006

Analysis of a Water Distribution Network may be necessary to know its behaviour under normal and deficient conditions and the design of a new network. Various methods such as Hardy Cross, Newton-Raphson, Linear Theory, and Gradient for static and time-dependent (extended period) analyses are described with small illustrative examples. The book also covers analysis considering withdrawal along links, head-dependent and performance-based analyses, calibration of existing networks, water quality modeling, analysis considering uncertainty of parameters, and reliability analysis of water distribution networks. Brief description of available computer softwares is also given.

Bill Marriott - Dale Van Atta 2019

Bill Marriott, son of J. Williard Marriott who opened a root-beer stand that grew into the Hot Shoppes Restaurant chain and evolved into the Marriott hotel company, grew up in the family business. In his more than fifty years at the company's helm, Bill Marriott was the driving force behind growing Marriott into the world's largest global hotel chain. His vision and leadership expanded the family business to more than 6,500 properties across 127 countries and territories. Bill Marriott: Success Is Never Final gives readers an intimate portrait of the life of a billionaire and business titan and shares his definition of success. Bill shares details about his very structured childhood including the private struggles with his domineering father's chronic harsh criticism; his time in the United States Navy as an officer aboard the U.S.S. Randolph; how he innovated the hotel industry with resort-like facilities; his dogged courtship with Donna, who would eventually say yes to his marriage proposal over a pay phone; and the boundless passion and energy he demonstrated for his work, family, and faith. Bill also shares spiritual experiences that allowed him to recognize God's guidance in his personal life, helping him bounce

back from a life-threatening explosion in a freak boating accident which caused severe burns over his body. Readers will learn the fascinating details about the successes and failures of Bill's business ventures and relate to his challenges of balancing roles as a CEO, a husband and father, and a man of faith. From his half-billion-dollar venture and "bet-the-farm" move to build the New York Marriott Marquis hotel, to the heartbreaking loss of an adult son whose body slowly degenerated from Mitochondrial Disease, to the billions of dollars donated to medical research, the biography of Bill Marriott tells the remarkable story of a man who had the vision to create a multi-billion dollar business, who understood the power of giving, and lived the creed that hard work will pay off but success is never final.

Futures for the Mediterranean Basin - United Nations Environment Programme.

Mediterranean Action Plan 1989

This book, sponsored by the UN Environmental Programme and carried out by the Blue Plan Regional Activity Centre, reports on the Mediterranean's economic and environmental prospects over the next forty years. The study uses scenarios to explore the implications of particular types of change and choices of action, considering the environmental impact of various economic sectors--agriculture, industry, energy, tourism, and transportation--as well as the threat posed by urbanization and development of coastal zones. Featuring a wide range of statistical material presented in tables and maps, this work is unique in making comparisons between so many different countries on a range of ecological and economic variables.

Earth Day - Melissa Ferguson 2021

Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Others organize neighborhood clean-ups, go on nature walks, or make recycled crafts. Readers will discover how a shared holiday can have multiple traditions and be celebrated in all sorts of ways.

Interpretive Master Planning - John A. Veverka 2011

Interpretive Master Planning presents - in two comprehensive volumes - a wealth of information on how to plan and design interpretive facilities and services. John Veverka's lively text uses anecdotes, case histories and interactive examples to illustrate every aspect of the interpretive process: from how to decide exactly what to interpret, and how best to do it, through to effective planning, implementation - and very much more. Interpretive Master Planning is the most comprehensive reference book on the subject - over 650 pages in two volumes - an invaluable resource for designing interpretation that really works. "Here is knowledge based on years of national and international interpretive planning projects with parks, museums, commercial attractions and a variety of other agencies. This is a classic work by an author who does interpretive planning every day." - Gary R Moore, Program Coordinator, MetroParks, Columbus and Franklin County, Ohio.

Celiac Disease and Non-Celiac Gluten Sensitivity - Luis Rodrigo 2014-11-07

Celiac disease is a systemic autoimmune process and appears in genetically predisposed individuals, with a well-known cause, consisting in a permanent intolerance to gluten, a protein contained in the flour of wheat, rye, barley and oats. Worldwide celiac disease affects to 1% of the Caucasian and there is recent evidence that the disease is increasing in USA and Finland among other regions in the world. It is considered to be the most prevalent disease with a genetic predisposition. The clinical forms of presentation are varied. The classical form consisting of diarrhea, anemia and failure to thrive is still common in children, but in the adult patients the symptoms resemble the irritable bowel syndrome. Mono-symptomatic forms with extra-intestinal manifestations are frequent. Hematological, cutaneous, articular, hepatic, bone and neurological manifestations are often described. This protean presentation and the lack of awareness explain the delay in diagnosis and suggest that screening in high-risk groups is indicated. The publication of this book written mainly by Spanish and Latin-American clinicians, researchers, and teachers, demonstrates the wide interest and the involvement of different disciplines that are necessary to understand celiac disease and gluten-related pathologies, such as non-celiac gluten-sensitivity. This has a great impact in the general public and in the industry. However, the knowledge of non-celiac gluten-related pathologies remains scarce but presently in the process of being properly defined. This book also highlights the importance of recognizing non-celiac gluten-sensitivity and briefly discusses a new definition. It also provides some perspectives to take into account when studying celiac disease in China and Central America. It describes new observations in Mexico, El Salvador and Costa Rica. The psychosocial impact as studied and reported by Argentinean investigators also adds to the value of this book. Written with a multidisciplinary team, we think that this book could be of interest to a great variety of medical specialists. Due to the systemic nature and variable presentation of celiac disease it certainly is of interest to pediatricians, gastroenterologists, hepatologists,

specialists in internal medicine, general practitioners as well as hematologists, immunologists, geneticists, pathologists, rheumatologists, dermatologists, neurologists, gynecologists, neurologists, psychiatrists, psychologists, orthopedic surgeons, specialists in rehabilitation medicine, endocrinologists. Being gluten the cause of these disorders, the food industry, dietitians and nutritionists will benefit from the valuable information presented in this book.

Planning for Ecosystem Services in Cities - Davide Geneletti 2019-01-01

This open access book presents current knowledge about ecosystem services (ES) in urban planning, and discusses various urban ES topics such as spatial distribution of urban ecosystems, population distribution, and physical infrastructure properties. The book addresses all these issues by: i) investigating to what extent ecosystem services are currently included in urban plans, and discussing what is still needed to improve planning practice; ii) illustrating how to develop ecosystem services indicators and information that can be used by urban planners to enhance plan design; iii) demonstrating the application of ES assessments to support urban planning processes through case studies; and iv) reflecting on criteria for addressing equity in urban planning through ecosystem service assessments, by exploring issues associated with the supply of, the access to and demand for ES by citizens. Through fully worked out case studies, from policy questions, to baseline analysis and indicators, and from option comparison to proposed solutions, the book offers readers detailed and accessible coverage of outstanding issues and proposed solutions to better integrate ES in city planning. The overall purpose of the book is to provide a compact reference that can be used by researchers as a key resource offering an updated perspective and overview on the field, as well as by practitioners and planners/decision makers as a source of inspiration for their activity. Additionally, the book will be a suitable resource for both undergraduate and post-graduate courses in planning and geography.

Political Discourses at the Extremes - Malin Roitman 2020-10-09

"The authors of this edited volume focus on the emergence of populist discourses, coming from movements or parties from Romance-speaking countries in Europe and in Latin America. By combining linguistics, social and political sciences in a discourse analytical approach, the sixteen papers enlighten the mechanisms behind populist discourses yielding from different socio-cultural and political contexts. The common denominator of the studies is the focus on the discursive and rhetorical characteristics of recently emerged movements of populism in both continents. Investigating expressions of these political movements is highly relevant in today's society, where the growing number of populist discourses has become a pre-eminent issue, alongside people's increasing insecurity regarding future political and environmental challenges. The primary audience of this volume are researchers working in the fields of political discourse analysis; however, this book may benefit anybody with interest in language in politics. ***** 'This volume will be a valuable contribution to the study of populist discourse at the political extremes. It hardly needs to be mentioned that this is one of the most topical issues in political discourse throughout the world today. The specifics of populist discourse are often misunderstood, so I have found this volume enlightening and helpful to increasing my own understanding.' - Rodney Williamson, University of Ottawa 'The anthology provides indeed a fine analysis of discourses connected to different socio-cultural and political contexts [...] Since it brings together researchers specialized in media and political discourse analysis, it contributes to a large extent to promote a deeper understanding of current political discourses and extremist ideologies.' - Ana Pano Alamán, University of Bologna" This work was published by Saint Philip Street Press pursuant
