Bicycling with Butterflies - Sara Dykman
2021-04-13

"What a wonderful idea for an adventure! Absolutely inspired, timely, and important."
—Alistair Humphreys, National Geographic Adventurer of the Year and author of *The Doorstep Mile* and *Around the World by Bike*
Outdoor educator and field researcher Sara Dykman made history when she became the first person to bicycle alongside monarch butterflies on their storied annual migration—a round-trip adventure that included three countries and more than 10,000 miles. Equally remarkable, she did it solo, on a bike cobbled together from used parts. Her panniers were recycled buckets. In *Bicycling with Butterflies*, Dykman recounts her incredible journey and the dramatic ups and downs of the nearly nine-month odyssey. We're beside her as she navigates unmapped roads in foreign countries, checks roadside milkweed for monarch eggs, and shares her passion with eager schoolchildren, skeptical bar patrons, and unimpressed border officials. We also meet some of the ardent monarch stewards who supported her efforts, from citizen scientists and researchers to farmers and high-rise city dwellers. With both humor and humility, Dykman offers a compelling story, confirming the urgency of saving the threatened monarch migration—and the other threatened systems of nature that affect the survival of us all.

A PATH TO DISCOVER - Natesan Ramalingam Iyer 2020-06-27

This is the author's second book. His first book, 'Adventures in three worlds' is a recollection of the events that happened in the author's life and the lessons he learned. This book is like a treatise on the world's reaction to the coronavirus, people are still going through. Life is just like a sea, we are moving constantly. Nothing stays with us, what remains are just the memories of some people who touched us like waves. We are loved when we are born; we may be loved or hated based on how we have

managed ourselves in between. War and peace are part of life. The world produces war-mongers as well as great souls like Mahatma Gandhi, Albert Einstein, Abraham Lincoln, and Nelson Mandela. The virus brouhaha is an awakening to change. Now everyone know Wuhan! The book briefly covers aspects of globalization, history of pandemics, biological warfare, Hindu scriptures, Covid-19 and India's lessons to the world. By applying cognizance, sobriety, intelligence and wisdom we have been creating superb technology and management systems; yet we have missed Brahminical way of living. 'A Path to Discover' may open a debate with views and counter-views. In one sentence, what lessons have we learned from the virus? The great Hindu Saint Tulsidas gave the answer in 16th century: In 'dependence' there is no happiness, even in a dream.

Philmont - Lawrence R. Murphy 2013-11-30
Here is the first comprehensive history of the Colfax County area of northeastern New Mexico. Best known today as the home of the Philmont Scout Ranch, where thousands of Boy Scouts from around the world gather every year, this beautiful country has a violent and varied past. Centering around the town of Cimarron, the region includes much of the vast Maxwell Land Grant, one of the largest pieces of land to be owned by one man in the history of the United States. Controversy over control of the land began in the sixteenth century with quarrels among rival American Indian tribes. Spanish and later American troops continued the bloodshed for centuries more. The culmination of the area's history of violence was the notorious Colfax County War between homesteaders and landowners that began in 1875 and continued until the Supreme Court acted fifteen years later. A gold and silver rush lured prospectors to the Maxwell ranch and booming Elizabethtown in the 1860s. But by 1870 the supply of precious metals was almost exhausted, and today Elizabethtown is a ghost town. "An interesting and welltold account of an important area, Philmont deserves a place on the Western book shelf."—Denver Post

Mother and Son: the Respect Effect - Emerson Eggerichs 2016-02-25

Love is important but it is respect that is the key to your son's heart. Love is important but it is respect that is the key to your son's heart. The idea of moms respecting their sons may sound alien to some, but it seems to ignite curiosity across the board. It is easy to relate to the need for all of us to feel a mother's love, but is that the same thing as respect Even for young boys, the effect of respect is nothing short of astounding when applied properly. Moms yearn to learn anything that better helps them with their sons. After all, they love their boys, but many find them more difficult to parent than their girls, especially from age four and up. What makes this all the more urgent is that moms are coaching fathers to love their daughters, but no one has said boo to moms on specific ways to show respect to their sons, at least not in a way

that is applicable and fully explained. All realize that little girls need daddy's love, but who is strongly promoting the truth that little boys (and big ones) need Mom's respect No wonder mothers feel left in the dark on this topic. Just as Emerson Eggerichs transformed millions of marital relationships with a biblical understanding of love and respect, he now turns these principles to one of the most important relationships of all, a mother and her son.

Debugging Game History - Henry Lowood 2016-06-03

Essays discuss the terminology, etymology, and history of key terms, offering a foundation for critical historical studies of games. Even as the field of game studies has flourished, critical historical studies of games have lagged behind other areas of research. Histories have generally been fact-by-fact chronicles; fundamental terms of game design and development, technology, and play have rarely been examined in the context of their historical, etymological, and conceptual underpinnings. This volume attempts to "debug" the flawed historiography of video games. It offers original essays on key concepts in game studies, arranged as in a lexicon—from "Amusement Arcade" to "Embodiment" and "Game Art" to "Simulation" and "World Building." Written by scholars and practitioners from a variety of disciplines, including game development, curatorship, media archaeology, cultural studies, and technology studies, the essays offer a series of distinctive critical "takes" on historical topics. The majority of essays look at game history from the outside in; some take deep dives into the histories of play and simulation to provide context for the development of electronic and digital games; others take on such technological components of games as code and audio. Not all essays are history or historical etymology—there is an analysis of game design, and a discussion of intellectual property—but they nonetheless raise questions for historians to consider. Taken

together, the essays offer a foundation for the emerging study of game history. Contributors Marcelo Aranda, Brooke Belisle, Caetlin Benson-Allott, Stephanie Boluk, Jennifer deWinter, J. P.
