Thioredoxin and Glutaredoxin Systems - Jean-Pierre Jacquot 2019-05-10

This Special Issue features recent data concerning thioredoxins and glutaredoxins from various biological systems, including bacteria, mammals, and plants. Four of the sixteen articles are review papers that deal with the regulation of development of the effect of hydrogen peroxide and the interactions between oxidants and reductants, the description of methionine sulfoxide reductases, detoxification enzymes that require thioredoxin or glutaredoxin, and the response of plants to cold stress, respectively. This is followed by eleven research articles that focus on a reductant of thioredoxin in bacteria, a thioredoxin reductase, and a variety of plant and bacterial thioredoxins, including the m, f, o, and h isoforms and their targets. Various parameters are studied, including genetic, structural, and physiological properties of these systems. The redox regulation of monodehydroascorbate reductase, aminolevulinic acid dehydratase, and cytosolic isocitrate dehydrogenase could have very important consequences in plant metabolism. Also, the properties of the mitochondrial o-type thioredoxins and their unexpected capacity to bind iron-sulfur center (ISC) structures open new developments concerning the redox mitochondrial function and possibly ISC assembly in mitochondria. The final paper discusses interesting biotechnological applications of thioredoxin for breadmaking.

Preaching from the Old Testament - Walter Brueggemann 2019-05-07

In this new volume, prolific scholar Walter Brueggemann seeks to show Christian preachers how to consider the faith witnessed in several Old Testament traditions and to help them discover rich and suggestive connections to our contemporary faith challenges. The author also assumes that a wholesale sustained engagement with the Old Testament is worth the effort for the preacher. He recognizes what he calls the "sorry state" of Old Testament texts in the Revised Common Lectionary,

which he claims often constitute a major disservice for the church and its preachers. The lectionary gerrymanders the Old Testament to make it serve other claims, most of the time not allowing it to have its own evangelical say. Brueggemann hopes that his exposition in this volume will evoke and energize fresh homiletical attention to the Old Testament, precisely because he believes the urgent work of the gospel in our society requires attentive listening to these ancient voices of bold insistent faith.

Written in a fun and accessible manner, *The Fund Spy* offers Kinnel's unique insight as a 14-year Morningstar fund analyst. He speaks plainly about the conflicts that can go against investors' interests, explaining how to avoid traps and push out the slick sales pitches facing today's investors. He also offers several "10 lists," which provide quick answers to investors' most common questions (e.g., the Top 10 Funds to Recommend to Relatives, the 10 Best Contrarian Managers, the 10 Most Overrated Managers).

Nutrition and Eye Health - John Lawrenson 2020-01-03

Blindness and visual impairment impact significantly on an individual's physical and mental well-being. Loss of vision is a global health problem, with approximately 250 million of the world's population currently living with vision loss, of which 36 million are classified as blind. Visual impairment is more frequent in the elderly, with cataract and age-related macular degeneration (AMD) accounting for over 50% of cases globally. Oxidative stress has been strongly implicated in the pathogenesis of both conditions, and consequently the role of nutritional factors, in particular carotenoids and micronutrient antioxidants, have been investigated as possible preventative or therapeutic strategies. Dry eye syndrome (DES) is one of the most common ophthalmic conditions in the world. DES occurs where the eye does not produce enough tears and/or the tears evaporate too quickly leading to discomfort and varying degrees of visual disturbance. There has recently been a great deal of interest in the potential for oral or topical supplementation with essential fatty acids (EFAs), specifically omega-3 and omega-6 fatty acids, as an adjunct to conventional treatments for DES. The objective of this Special Issue on 'Nutrition and Eye Health' is to publish papers describing the role of nutrition in maintaining eye health and the use of nutritional interventions to prevent or treat ocular disease. A particular (but not exclusive) emphasis will be on papers (reviews and/or clinical or experimental studies) relating to cataract, AMD and DES.
