The Emergence of Subjectivity in the Ancient and Medieval World - Jon Stewart

2020-03-24

The Emergence of Subjectivity in the Ancient and Medieval World: An Interpretation of Western Civilization represents a combination of different genres: cultural history, philosophical anthropology, and textbook. It follows a handful of different but interrelated themes through more than a dozen texts that were written over a period of several millennia and, by means of an analysis of these texts, presents a theory of the development of Western civilization from antiquity to the Middle Ages. The main line of argument traces the various self-conceptions of different cultures as they developed historically, reflecting different views of what it is to be human. The thesis of the volume is that through examination of these changes we can discern the gradual emergence of what we today call inwardness, subjectivity, and individual freedom. As human civilization took its first tenuous steps, it had a very limited conception of the individual. Instead, the dominant principle was that of the wider group: the family, clan, or people. Only in the course of history did the idea of what we now know as individuality begin to emerge, and it took millennia for this idea to be fully recognized and developed. The conception of human beings as having a sphere of inwardness and subjectivity subsequently had a sweeping impact on all aspects of culture, including philosophy, religion, law, and art: indeed, this notion largely constitutes what is today referred to as modernity. It is easy to lose sight of the fact that this modern conception of human subjectivity was not simply something given, but

rather the result of a long process of historical and cultural development.

Sustainable Human Development in the Twenty-First Century - Volume I - Ismail Sirageldin

2008-12-31

Sustainable Human Development in the Twenty-First Century is a component of Encyclopedia of Human Resources Policy, Development and Management in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty Encyclopedias. The volume of Human Development examines the state and nature of human development and identifies factors that determine its promotion for the twenty-first century. A general goal, since the ultimate goal for human development is to enhance the quality of human life. However, the concept "quality of human life" is not well defined. It is determined by a set of interrelated factors that cut across many disciplines with varied perspectives and paradigms. These include the prevailing culture, health status, economic performance, technological development, political and social conditions, the building of human capacity and capabilities, and institutional development on the local and global levels. For example, in an environment characterized by a better quality of human life, it is expected that people will be able to lead long and productive lives. They are also expected to enjoy good health, have access to knowledge and educational opportunities, and be treated by all with respect, in a socially equitable and dignified manner. In the sphere of political economy, they are expected to have the

opportunity to participate in governance decisions that affect their lives and the community in which they live; and to have the potential to earn sufficient income to supply themselves with adequate nutrition, shelter, and other material and aesthetic needs.

Furthermore, people are expected to maintain a sustainable environment and equitable social contracts across space and generations, especially in the context of the evolving global governance. The volume of "Sustainable Human Development in the Twenty-First Century" is divided into five topics which are then expanded into multiple subtopics, each as a chapter presented in two volumes. The first is "Major issues in Human Development" and provides an over view of the Topic with emphasis on the sociological foundation of human development. The second Topic, "Diversity and Historical Processes" reviews the historical and technological processes which have led to the present state of human diversity and differentiation. The third Topic, "Causes of Global Change" focuses on whether it is possible in the present global environment to enlarge people's capabilities so that economic progress may be translated into a multidimensional human happiness. The fourth Topic, "Consequences of Global Change" examines global change not in the narrow sense of short-term economic change, but rather as historical waves of long-term development. The fifth Topic on Planning Strategies reviews current practice and projects challenges in the next century. These two volumes are aimed at the following five major target audiences: University and College Students, Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers and NGOs.

The Historical Foundations of World Order - Douglas M. Johnston 2008

In *The Historical Foundations of World Order: the Tower and the Arena*, Douglas M. Johnston has drawn on a 45 year career as one of the world's most prolific academics in the development of international law and public policy and 5 years of exhaustive research to produce a comprehensive and highly nuanced examination of the historical precursors, intellectual developments, and philosophical

frameworks that have guided the progress of world order through recorded history and across the globe, from pre-classical antiquity to the present day. By illuminating the personalities and identifying the controversies behind the great advancements in international legal thought and weaving this into the context of more conventionally known history, Johnston presents a unique understanding of how peoples and nations have sought regularity, justice and order across the ages. This book will appeal to a wide spectrum of readers, from lawyers interested in the historical background of familiar concepts, to curriculum developers for law schools and history faculties, to general interest readers wanting a wider perspective on the history of civilization. Modernism in the Streets - Marshall Berman 2017-04-18

Essays tracing the intellectual life of a quintessential New York City writer and thinker Marshall Berman was one of the great urbanists and Marxist cultural critics of the twentieth and twenty-first centuries, and his brilliant, nearly sui generis book *All That Is Solid Melts Into Air* is a masterpiece of the literature on modernism. But like many New York intellectuals, the essay was his characteristic form, accommodating his multifarious interests and expressing his protean, searching exuberant mind. This collection includes early essays from and on the radical '60s, on New York City, on literary figures from Kafka to Pamuk, and late essays on rock, hip hop, and gentrification. Concluding with his last essay, completed just before his death in 2013, this book is Berman's intellectual autobiography, tracing his career as a thinker through the way he read the "signs in the street."

Understanding Catholic Christianity - Thomas Zanzig 1997

"*Understanding Catholic Christianity*" offers a comprehensive overview of Catholicism for ninth graders, to serve as a foundation for other high school religion courses and faith formation experiences they will have. With pastoral sensitivity, the course's examples, stories, quotes and reflection activities bring to life the basic of the Catholic faith for adolescent hearts

and minds.

2020-12-15

This report offers a thought-provoking, necessary alternative to paralysis in the face of alarming planetary change. Its release comes as the COVID-19 (coronavirus) pandemic simultaneously offers a glimpse of what a 'new normal' could hold and opens up the opportunity for humanity to change course. The report also sets out new metrics of human development to guide us, including a new, experimental Planet Adjusted-Human Development Index.

Feminism and Dialogics: Charlotte Perkins, Meridel Le Sueur, Mikhail M. Bakhtin - Carolina Núñez Puente 2011-11-28

Aquest llibre proposa una lectura feminista dialògica de Charlotte Perkins Gilman, Meridel Le Sueur i Mikhail Bakhtin. La primera part està dedicada al relat curt, considerat un dels aspectes oblidats per Bakhtin. El gènere sexual ('gender'), un altre dels seus oblits, és la base fonamental d'aquesta investigació. Un dels arguments que l'autora defensa és que els híbrids artístics de Gilman i Le Sueur fan impossible que se les confine dins d'un sol gènere literari o sexual. En la segona part s'estudia com la saga deconstructivista de Gilman com el bildungsroman feminista de Le Sueur serveixen per a corregir i expandir la teoria bakhtiniana. Entre altres molts aspectes, els personatges femenins estudiats encarnen el subjecte parlant femení. La tercera part avalua les comunitats de dones creades per la ficció de Le Sueur i Gilman i el seu llegat per a les teories

feministes i bakhtinianes. El treball (in)conclou proposant un avanç de la 'dialogia feminista' a una 'pràctica dialògica del feminisme', on totes les perspectives feministes apareixen com a gèneres literaris/veus en un diàleg dialògic.

The Developmental Science of Adolescence - Richard M. Lerner 2013-08-15

The Developmental Science of Adolescence: History Through Autobiography is the most authoritative account of the leading developmental scientists from around the world. Written by the scholars who shaped the history they are recounting, each chapter is an engaging and personal account of the past, present, and future direction of the field. Adventures of the Souls - Samuel W. Hale Jr.
2016-08-31

Adventures of the Souls embeds the reader into the minds and experiences of various souls. The personal thoughts, feelings, emotions, even

actions are consciously shared as each soul encounters specific incidents in their Life Experiences. And the reader is right there! The experiences of the soul are innumerable and phenomenal: • From the moment that the soul is dispatched from the Realm of the Presence of God • To the moment that it is conceived in the womb of its mother • Throughout that period of development in the womb • To the birthing experience • To the developmental periods outside the womb • To those encounters it has with itself • To those encounters with other souls • Through its own personal and internal struggles • To those interactions it has with other souls • From those personal life impacting decisions • To those resultant consequences! In all of these Adventures the soul encounters many challenging, sobering, and moments which not only affects its own future, but they also impact other souls! And the reader is right there to experience and engage in self-reflection and introspection of those soulful adventures!

Human Development in Cultural Context - A Bame Nsamenang 1992-05-26

A comprehensive, systematic account of human development which is sensitive to the needs, interests and ecologies of nonwestern cultures and individuals is provided in this unique volume. The importance and value of the sociocultural milieu in shaping the growth and development of children is emphasized, and the author asserts throughout that children do not grow and develop according to the same patterns regardless of culture. The author describes developmental psychology from the perspective of West Africa, demonstrating how the local ecology and the resulting cultural ideology lead to differing ways in which children are conceptualized and socialized, and in turn how they develop. While much of his case material is from

The Art of Achievement - Tom Morris 2013-07-30

Throughout the ages, plenty of people have written and spoken about success and excellence. But leave it to contemporary philosopher and popular business speaker Tom Morris to gather the best of it into a universal tool kit for achieving nearly any goal. From a clear CONCEPTION of what we want, to a stubborn CONSISTENCY in pursuing our vision, to a CAPACITY to enjoy the process, The Art of Achievement outlines a simple framework that will lead readers down a road of excellence.

Peppered with quotes from great thinkers and successful people, such as Plato, Aristotle, Einstein, and Churchill, *The Art of Achievement* helps readers map out new paths to better health, greater efficiency, and deeper satisfaction.

“Do Not Be Concerned Only About Yourself...” - Noemi Bravená 2019-09-13

This interdisciplinary book sets forth the goal of introducing and critically addressing a new paradigm of thought based on the concepts of transcending, transcendence, and overlap as well as defining these terms in reference to children, their personality, and socialization. For many readers the concept of transcendence is mainly identified with the fields of theology or philosophy. This book seeks to demonstrate that the concept of transcendence is intricately connected with psychology, the philosophy of education, and general pedagogy. It aims to discover unity in plurality and to define the term “transcendence” in relation to the educational process. The author raises the question whether transcendence (“not being concerned only with one’s own self”) is a concept of cross-curricular education and whether every school subject is able to develop the transcendent dimension of children, an important dimension which the author calls the competence of higher-order thinking. Here a new pedagogical paradigm is defined with the support of some Czech authors (Helus, Spilková, Patořka, Pelcová, etc.) and several quotations from the Czech curriculum; thus, a careful reflection upon this significant work will allow the reader to recognize that this new paradigm is applicable in any country of the world where the state has a primary interest in

promoting the flourishing of human values and pursuing that which is considered good by society. Religious pedagogy is embedded in the entire array of fields aimed at developing the transcendent dimension of children, and therefore it plays an equal role within the overall framework of the education of children.

Nature and the Human Soul - Bill Plotkin

2010-10-04

Addressing the pervasive longing for meaning and fulfillment in this time of crisis, *Nature and the Human Soul* introduces a visionary ecopsychology of human development that reveals how fully and creatively we can mature when soul and wild nature guide us. Depth psychologist and wilderness guide Bill Plotkin presents a model for a human life span rooted in the cycles and qualities of the natural world, a blueprint for individual development that ultimately yields a strategy for cultural transformation. If it is true, as Plotkin and others observe, that we live in a culture dominated by adolescent habits and desires, then the enduring societal changes we so desperately need won’t happen until we individually and collectively evolve into an engaged, authentic adulthood. With evocative language and personal stories, including those of elders Thomas Berry and Joanna Macy, this book defines eight stages of human life — Innocent, Explorer, Thespian, Wanderer, Soul Apprentice, Artisan, Master, and Sage — and describes the challenges and benefits of each. Plotkin offers a way of progressing from our current egocentric, aggressively competitive, consumer society to an ecocentric, soul-based one that is sustainable, cooperative, and compassionate. At once a primer on human development and a manifesto for change, *Nature and the Human Soul* fashions a template for a more mature, fulfilling, and purposeful life — and a better world.

The Greatest Adventures In Human

Development - G. Kenneth West 2021-04-15

This undergraduate psychology text acknowledges the diverse backgrounds and learning styles of students by blending Adlerian "tasks of life" with the developmental psychology of Adler, Catalano, Dreikurs, Erikson, Fowler, Fromm, Gilligan, Hoffberger, Kierkegaard, Kohlberg, Levinson, Maslow, May, Piaget, Rogers, Sekkaran and Sternberg. Each chapter examines one of life's greatest adventures and offers the wisdom and advice of psychologists and counsellors most familiar with that aspect of life. Chapters cover adventures such as birth, loss, loving, leaving, growing up, growing old, children who succeed and fail, stagnant and fulfilling careers, faith, despair and crisis and transformation. Reflection questions precede each chapter to stimulate class discussion.

Psychological Adaptive Mechanisms - Thomas P. Beresford 2012-06-21

This book provides a clinical tool for recognizing, and understanding, human adaptive responses to stress and the anxiety it causes. For use in the here-and-now, the recognition algorithm systematically delineates the observable hierarchy of psychological adaptive mechanisms, known in psychoanalytic theory as ego defenses, established in previous

longitudinal research. Based in a theoretical model, it teaches practical, systematic recognition of these mechanisms which are not only helpful to know when seeing a patient but also when observing human behavior in everyday life.
