Tomorrow and Tomorrow - Tom Sweterlitsch 2014-07-10

In this "wild mash-up of Raymond Chandler, Philip K. Dick, and William S. Burroughs"*, a man who uses virtual reality to escape the horror of his dystopian world becomes obsessed with a mystery that could drive him mad. Pittsburgh is John Dominic Blaxton's home even though the city has been uninhabitable ruin and ash for the past decade. The Pittsburgh Dominic lives in is the Archive, an immersive virtual reconstruction of the city's buildings, parks, and landmarks, as well as the people who once lived there. Including Dominic's wife and unborn child. When he's not reliving every recorded moment with his wife in an endless cycle of desperation and despair, Dominic investigates mysterious deaths preserved in the Archive before Pittsburgh's destruction. His latest cold case is the apparent murder of a woman whose every appearance is deliberately being deleted from the Archive. Obsessed with uncovering this woman's identity and what happened to her, Dominic follows a trail from the virtual world into reality. But finding the truth buried deep within an illusion means risking his sanity and his very existence... "Tomorrow and Tomorrow is many things: a near-future cyberpunk thriller in the tradition of William Gibson and Bruce Sterling; a funny, gloomy meditation on technology and mental illness in the tradition of Phillip K. Dick and J.G. Ballard; a cynically outrageous mystery less in the tradition of Chandler than that of James Ellroy. A bleak, gorgeous

romp through a pornographic and political American id. If books like this are the future of fiction, I'm not afraid for books at all."—Pittsburgh Post-Gazette *Stewart O'Nan

Science, Religion, and the Search for Extraterrestrial Intelligence - David Wilkinson 2013-08-02

If the discovery of life elsewhere in the universe is just around the corner, what would be the consequences for religion? Would it represent another major conflict between science and religion, even leading to the death of faith? Some would suggest that the discovery of any suggestion of extraterrestrial life would have a greater impact than even the Copernican and Darwinian revolutions. It is now over 50 years since the first modern scientific papers were published on the search for extraterrestrial intelligence (SETI). Yet the religious implications of this search and possible discovery have never been systematically addressed in the scientific or theological arena. SETI is now entering its most important era of scientific development. New observation techniques are leading to the discovery of extra-solar planets daily, and the Kepler mission has already collected over 1000 planetary candidates. This deluge of data is transforming the scientific and popular view of the existence of extraterrestrial intelligence. Earth-like planets outside of our solar system can now be identified and searched for signs of life. Now is a crucial time to assess the scientific and

theological questions behind this search. This book sets out the scientific arguments undergirding SETI, with particular attention to the uncertainties in arguments and the strength of the data already assembled. It assesses not only the discovery of planets but other areas such as the Fermi paradox, the origin and evolution of intelligent life, and current SETI strategies. In all of this it reflects on how these questions are shaped by history and pop culture and their relationship with religion, especially Christian theology. It is argued that theologians need to take seriously SETI and to examine some central doctrines such as creation, incarnation, revelation, and salvation in the light of the possibility of extraterrestrial life.

[The Things They Carried](#) - Tim O'Brien 2009-10-13

A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

The Plague Year - Lawrence Wright 2021-06-08

From the Pulitzer Prize-winning author of *The Looming Tower*, and the pandemic novel *The End of October*: an unprecedented, momentous account of Covid-19—its origins, its wide-ranging repercussions, and the ongoing global fight to contain it "A book of panoramic breadth ... managing to surprise us about even those episodes we ... thought we knew well ... [With] lively exchanges about spike proteins and nonpharmaceutical interventions and disease waves, Wright's storytelling dexterity makes all this come alive." —The New York Times Book Review From the fateful first moments of the outbreak in China to the storming of the U.S. Capitol to the extraordinary vaccine rollout, Lawrence Wright's *The Plague Year* tells the story of Covid-19 in authoritative, galvanizing detail and with the full drama of events on both a global and intimate scale, illuminating the medical, economic, political, and social ramifications of the pandemic. Wright takes us inside the CDC, where a first round of faulty test kits lost America precious time . . . inside the halls of the White House, where Deputy National Security Adviser Matthew Pottinger's early alarm about the virus was met with confounding and drastically costly skepticism . . . into a Covid ward in a Charlottesville hospital, with an idealistic young woman doctor from the town of Little Africa, South Carolina . . . into the precincts of prediction specialists at Goldman Sachs . . . into Broadway's darkened theaters and Austin's struggling music venues . . . inside the human body, diving deep into the science of how the virus and vaccines function—with an eye-opening detour into the history of vaccination and of the modern anti-vaccination movement. And in this full accounting, Wright makes clear that the medical professionals around the country who've risked their lives to fight the virus reveal and embody an America in all its vulnerability, courage, and potential. In turns steely-eyed, sympathetic, infuriated, unexpectedly comical, and always precise, Lawrence Wright is a formidable guide, slicing through the dense fog of misinformation to give us a 360-degree portrait of the catastrophe we thought we knew.

4900 Nights - Homer Van Meter 2011-04-05

The author comes as close as humanly possible to proving reincarnation. This is a voyage of discovery in search of the origin of a man. Years of investigation and archaeological discovery, connected with historical record, provide the backdrop for the extraordinary story of the third century migration of a band of Celts from Scotland and Ireland to the coast of what is now Maine. This non-fiction narrative reads like a fine novel and a haunting love story. Take advantage of an opportunity to learn what history does not commonly teach us, and the profound impact which those omissions have on our present-day lives.

The Hidden Brain - Shankar Vedantam 2010-01-19

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

[Awakening Through Dreams](#) - Nigel Hamilton 2018-05-08

Most Western approaches to dreams are limited to a psychological paradigm. Building on Jung's work, which was heavily influenced by the transformative model of alchemy, a new multidimensional approach to the process of human transformation through dreams has been developed which recognises the interrelationship of the psychological and the spiritual, and works with the mirroring body in service of both. In the approach presented here, dreams are seen as a mixture of worldly impressions and expressions of our individual spirit, which is trying to speak to us through the metaphors and narrative of our dreams. In this way, the spiritual comes through the psychological dimension. Though it may seem to be a contradiction, our dreams hold the key to our 'awakening' and, by actively engaging with them we can unlock their potential for initiating and facilitating our own unfoldment. This book is about recognising this process when it occurs in dreams, and how to work with them in the service of our growth and self-realisation.

My Heart Is a Chainsaw - Stephen Graham Jones 2021-08-31

Winner of the Bram Stoker Award for Best Novel In her quickly gentrifying rural lake town Jade sees recent events only her encyclopedic knowledge of horror films could have prepared her for in this latest chilling novel that "will give you nightmares. The good kind, of course" (BuzzFeed) from the Jordan Peele of horror literature, Stephen Graham Jones. "Some girls just don't know how to die..." Shirley Jackson meets Friday the 13th in *My Heart Is a Chainsaw*, written by the New York Times bestselling author of *The Only Good Indians* Stephen Graham Jones, called "a literary master" by National Book Award winner Tananarive Due and "one of our most talented living writers" by Tommy Orange. Alma Katsu calls *My Heart Is a Chainsaw* "a homage to slasher films that also manages to defy and transcend genre." On the surface is a story of murder in small-town America. But beneath is its beating heart: a biting critique of American colonialism, Indigenous displacement, and gentrification, and a heartbreaking portrait of a broken young girl who uses horror movies to cope with the horror of her own life. Jade Daniels is an angry, half-Indian outcast with an abusive father, an absent mother, and an entire town that wants nothing to do with her. She lives in her own world, a world in which protection comes from an unusual source: horror movies...especially the ones where a masked killer seeks revenge on a world that wronged them. And Jade narrates the quirky history of Proofrock as if it is one of those movies. But when blood actually starts to spill into the waters of Indian Lake, she pulls us into her dizzying, encyclopedic mind of blood and masked murderers, and predicts exactly how the plot will unfold. Yet, even as Jade drags us into her dark fever dream, a surprising and intimate portrait emerges...a portrait of the scared and traumatized little girl beneath the Jason Voorhees mask: angry, yes, but also a girl who easily cries, fiercely loves, and desperately wants a home. A girl whose feelings are too big for her body. *My Heart Is a Chainsaw* is her story, her homage to horror and revenge and triumph.

Grey Aliens and the Harvesting of Souls - Nigel Kerner 2010-01-19

Exposes the agenda behind the bio-robotic grey aliens' genetic manipulation of certain human races

- Reveals the Grey's nature as sophisticated self-aware machines created by a long vanished extraterrestrial civilization
- Explains how their quest to capture human souls appears in the historical record from biblical times
- Explains how the phenomenon of racism is a by-product of their genetic tampering

In 1997 Nigel Kerner first introduced the notion of aliens known as Greys coming to Earth, explaining that Greys are sophisticated biological robots created by an extraterrestrial civilization they have long since outlived. In this new book Kerner reveals that the Greys are seeking to master death by obtaining something humans possess that they do not: souls. Through the manipulation of human DNA, these aliens hope to create their own souls and, thereby, escape the entropic grip of the material universe in favor of the timeless realm of spirit. Kerner explains that genetic manipulation by the Greys has occurred since biblical times and has led to numerous negative qualities that plague humanity, such as violence, greed, and maliciousness. Racism, he contends, was developed by the aliens to prevent their genetic experiments from being compromised by

breeding with others outside their influence. Examining historical records, Kerner shows that Jesus, who represented an uncorrupted genetic line, warned his disciples about the threat posed by these alien interlopers, while Hitler, a pure product of this alien intelligence, waged genocide in an attempt to rid Earth of all those untouched by this genetic tampering. Despite the powerful grip the Greys have on humanity, Kerner says that all hope is not lost. Greys exist wholly in the material world, so if we follow the spiritual laws of reincarnation and karma, aiming for enlightenment and rising above the material—a state the Greys are unable to reach—we can free ourselves from their grasp.

Information—Consciousness—Reality - James B. Glattfelder 2019-04-10

This open access book chronicles the rise of a new scientific paradigm offering novel insights into the age-old enigmas of existence. Over 300 years ago, the human mind discovered the machine code of reality: mathematics. By utilizing abstract thought systems, humans began to decode the workings of the cosmos. From this understanding, the current scientific paradigm emerged, ultimately discovering the gift of technology. Today, however, our island of knowledge is surrounded by ever longer shores of ignorance. Science appears to have hit a dead end when confronted with the nature of reality and consciousness. In this fascinating and accessible volume, James Glattfelder explores a radical paradigm shift uncovering the ontology of reality. It is found to be information-theoretic and participatory, yielding a computational and programmable universe.

The Anatomy of Fascism - Robert O. Paxton 2007-12-18

What is fascism? By focusing on the concrete: what the fascists did, rather than what they said, the esteemed historian Robert O. Paxton answers this question. From the first violent uniformed bands beating up "enemies of the state," through Mussolini's rise to power, to Germany's fascist radicalization in World War II, Paxton shows clearly why fascists came to power in some countries and not others, and explores whether fascism could exist outside the early-twentieth-century European setting in which it emerged. "A deeply intelligent and very readable book. . . . Historical analysis at its best." -The Economist

The Anatomy of Fascism will have a lasting impact on our understanding of modern European history, just as Paxton's classic Vichy France redefined our vision of World War II. Based on a lifetime of research, this compelling and important book transforms our knowledge of fascism—"the major political innovation of the twentieth century, and the source of much of its pain."

The Resonance of Unseen Things - Susan Lepselter 2016-03-03

The Resonance of Unseen Things offers an ethnographic meditation on the "uncanny" persistence and cultural freight of conspiracy theory. The project is a reading of conspiracy theory as an index of a certain strain of late 20th-century American despondency and malaise, especially as understood by people experiencing downward social mobility. Written by a cultural anthropologist with a literary background, this deeply interdisciplinary book focuses on the enduring American preoccupation with captivity in a rapidly transforming world. Captivity is a trope that appears in both ordinary and fantastic iterations here, and Susan Lepselter shows how multiple troubled histories—of race, class, gender, and power—become compressed into stories of uncanny memory. "We really don't have anything like this in terms of a focused, sympathetic, open-minded ethnographic study of UFO experiencers. . . . The author's semiotic approach to the paranormal is immensely productive, positive, and, above all, resonant with what actually happens in

history.” —Jeffrey J. Kripal, J. Newton Rayzor Professor of Religion, Rice University “Lepselter relates a weave of intimate alien sensibilities in out-of-the-way places which are surprisingly, profoundly, close to home. Readers can expect to share her experience of contact with complex logics of feeling, and to do so in a contemporary America they may have thought they understood.” —Debbora Battaglia, Mount Holyoke College “An original and beautifully written study of contemporary American cultural poetics. . . . The book convincingly brings into relief the anxieties of those at the margins of American economic and civic life, their perceptions of state power, and the narrative continuities that bond them to histories of violence and expansion in the American West.” —Deirdre de la Cruz, University of Michigan
