The Numinous Legacy - Adair

Butchins 2002

Where is God in the universe if anywhere? Why did God make germs? Why should we be so

special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor

Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider the

First Amendment, First Principles - John F. Wirenius 2004

The First Amendment, which guarantees Americans rights of

expression, has come to epitomise the meaning of freedom in the United States. Yet as the ability to express themselves expands into boundless opportunities with the advent of electronic media in the twenty-first century, new threats of censorship arise. In *First Amendment, First Principles*, attorney John Wirenius explores the challenges to freedom of speech and examines the evolution of how the First Amendment has come to the meaning it bears today. In his bold rethinking of the concept of freedom of speech, Wirenius writes a thorough, scholarly discussion of the body of law surrounding free speech and a passionate defence of his convictions regarding the First Amendment. He reminds readers that First Amendment must be protected in order to protect them. In this revised edition, the author has added a chapter that explores liability for copycat crimes: What is the media's responsibility for violence committed in the aftermath of graphic depictions

of murder and other violent acts? wartime and cites the latest cases dealing with such subjects as pomography, hate speech and the Internet.

The Hidden Lamp - Zenshin Florence Caplow 2013-10-21

The Hidden Lamp is a collection of one hundred koans and stories of Buddhist women from the time of the Buddha to the present day. This revolutionary book brings together many teaching stories that were hidden for centuries, unknown until this volume. These stories are extraordinary expressions of freedom and fearlessness, relevant for men and women of any time or place. In these pages we meet nuns, laywomen practicing with their families, famous teachers honored by emperors, and old women selling tea on the side of the road. Each story

is accompanied by a reflection by a contemporary woman teacher--personal responses that help bring the old stories alive for readers today--and concluded by a final meditation for the reader, a question from the editors meant to spark further rumination and inquiry. These are the voices of the women ancestors of every contemporary Buddhist.

Multiple Attribute Decision Making - Gwo-Hshiong Tzeng 2011-06-22

Decision makers are often faced with several conflicting alternatives. How do they evaluate trade-offs when there are more than three criteria? To help people make optimal decisions, scholars in the discipline of multiple criteria decision making (MCDM) continue to develop new methods for structuring preferences and determining the correct relative weights for criteria. A compilation of modern decision-making techniques, Multiple Attribute Decision Making: Methods and Applications focuses on the fuzzy set approach to multiple

attribute decision making (MADM). Drawing on their experience, the authors bring together current methods and real-life applications of MADM techniques for decision analysis. They also propose a novel hybrid MADM model that combines DEMATEL and analytic network process (ANP) with VIKOR procedures. The first part of the book focuses on the theory of each method and includes examples that can be calculated without a computer, providing a complete understanding of the procedures. Methods include the analytic hierarchy process (AHP), ANP, simple additive weighting method, ELECTRE, PROMETHEE, the gray relational model, fuzzy integral technique, rough sets, and the structural model. Integrating theory and practice, the second part of the book illustrates how methods can be used to solve real-world MADM problems. Applications covered in the book include: AHP to select planning and design services for a construction project TOPSIS and VIKOR to evaluate

the best alternative-fuel vehicles for urban areas ELECTRE to solve network design problems in urban transportation planning PROMETEE to set priorities for the development of new energy systems, from solar thermal to hydrogen energy Fuzzy integrals to evaluate enterprise intranet web sites Rough sets to make decisions in insurance marketing Helping readers understand how to apply MADM techniques to their decision making, this book is suitable for undergraduate and graduate students as well as practitioners.

Public Administration in Europe - Edoardo Ongaro 2018-08-17

This book considers the ways in which public administration (PA) has been studied in Europe over the last forty years, and examines in particular the contribution of EGPA, the European Group for Public Administration, both to the growth of a truly pan-European PA, and to the future of PA in Europe. The book provides a lively reflection on the state of the art of PA both over the past forty years and over the next forty years. It reflects on the consolidation and institutionalisation of EGPA as the European community for the study of PA in Europe, and demonstrates the need for such a regional group for PA in Europe, as well as for regional groups for the study of PA in other parts of the world. The book also demonstrates the functional, cultural and institutional reasons that underpin the significance of a regional group for researching and studying PA at an 'intermediate level of governance' between the national and the global levels. The book provides rich insights

about the state of the art of PA in Europe from the leading public administration scholars.

Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include:

- types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal
