The Cairo Diary - Maxim Chattam 2013-12-31
British-occupied Cairo, 1928: Several young children have disappeared and were then found, horribly mutilated, in the tombs just outside the city. Panic is spreading among the locals after a cloaked giant is sighted. Has a ghoul from One Thousand and One Nights been brought to life? British inspector Jeremy Matheson

follows the trail of the monster, which takes him into the depths of underground Cairo, as well as deep into his own tortured past. Mont-Saint-Michel, 2005: Marion has taken refuge in the wind-swept and remote monastery located on a spit of land on the west coast of France. In the wake of a scandal, caused by her own revelations, that is now reverberating through the

French capital, she has been spirited away from Paris and brought here by the French Secret Service for her own protection. When she finds a diary dating from 1928 in the monastery library, penned by Jeremy Matheson and hidden inside the jacket of an Edgar Allan Poe book, she is inexorably pulled into the past as she follows his investigation. Soon she feels she is being watched, and taunting notes and riddles urge her to give back what is not hers. Could one of the brothers or sisters at the monastery be behind this? And who is the old man Marion befriends? The two stories intertwine and culminate in an absolutely baffling climax in this cinematic bestselling thriller from France.

Meticulously researched and fast-paced, Maxim Chattam's *The Cairo Diary* is a stunning mystery.

The Courage of Truth - Michel Foucault 2012-05-08

The Courage of the Truth is the last course that Michel Foucault delivered in a series of lectures from 1970 to 1984 at the Collège de France. Here, Foucault continues the theme of the previous year's lectures in exploring the notion of "truth-telling" in politics to establish a number of ethically irreducible conditions based on courage and conviction. His death, on June 25th, 1984, tempts us to detect the philosophical testament in these lectures, especially in view of the prominence they

give to the themes of life and death.

Middlemarch - George Eliot
2015-05-02

Who that cares much to know

the history of man, and how the mysterious mixture behaves under the varying experiments of Time, has not dwelt, at least briefly, on the life of Saint Theresa, has not smiled with some gentleness at the thought of the little girl walking forth one morning hand-in-hand with her still smaller brother, to go and seek martyrdom in the country of the Moors? Out they toddled from rugged Avila, wide-eyed and helpless-looking as two fawns, but with human hearts, already beating to a national idea; until domestic reality met them in the shape of uncles, and turned them back from their great resolve. That child-pilgrimage was a fit beginning. Theresa's passionate, ideal nature demanded an epic life: what were many-volumed romances of chivalry and the social conquests of a brilliant girl to her? Her flame quickly burned up that light fuel; and, fed from within, soared after some illimitable satisfaction, some object which would never justify weariness, which would reconcile self-despair with the

rapturous consciousness of life beyond self. She found her epus in the reform of a religious order.

Crewel Creatures - Hazel Blomkamp 2018-04

Beautiful bird and animal designs, inspired by the African world, in crewel and Jacobean embroidery. Following the success of *Crewel Intentions* and *Crewel Twists*, which introduced embroiderers to using needle-lace and loom-weaving techniques, comes *Crewel Creatures*, the third title in this series by renowned embroiderer Hazel Blomkamp. Animals and birds are popular subjects in crewel embroidery, and here Hazel introduces needleworkers to the beautiful, exotic creatures found in the African wild. Following the Jacobean embroidery style for which Hazel is well known, and incorporating the subtle influence of the fractal designs found in zentangle art, Hazel brings beads and other three-dimensional elements into her designs, capturing the stunning and colourful art that is traditionally associated with

Africa. Those new to Hazel's work will find a useful guide to the essential crewel stitches, needle-lace and needle-weaving techniques in an easy-to-follow how-to section and stitch gallery, and all embroiderers will be impressed by the wealth of design ideas and inspiration this book has to offer. With every project, step-by-step instructions and gorgeous photographs are included, along with a template of the design. All the projects are stitched and embellished on natural coloured linen, making them not only perfect for framing for display but also wonderfully economical for embroiderers to work on.

Brian Eno's Another Green World - Geeta Dayal
2009-11-01

The serene, delicate songs on Another Green World sound practically meditative, but the album itself was an experiment fueled by adrenaline, panic, and pure faith. It was the first Brian Eno album to be composed almost completely in the confines of a recording studio, over a scant few months in the summer of 1975. The album was a proof of concept for Eno's budding ideas of "the studio as musical instrument," and a signpost for a bold new way of thinking about music. In this book, Geeta Dayal unravels Another Green World's abundant mysteries, venturing into its dense thickets of sound. How was an album this cohesive and refined formed in such a seemingly ad hoc way? How were electronics and layers of synthetic treatments used to create an album so

redolent of the natural world? How did a deck of cards figure into all of this? Here, through interviews and archival research, she unearths the strange story of how Another Green World formed the link to Eno's future -- foreshadowing his metamorphosis from unlikely glam rocker to sonic painter and producer.

The Moon & the Western

Imagination - Scott L.

Montgomery 1999

The Moon is at once a face with

a thousand expressions and the archetypal planet. Throughout history it has been gazed upon by people of every culture in every walk of life. From early perceptions of the Moon as an abode of divine forces, humanity has in turn accepted the mathematized Moon of the Greeks, the naturalistic lunar portrait of Jan van Eyck, and the telescopic view of Galileo. Scott Montgomery has produced a richly detailed analysis of how the Moon has been visualized in Western culture through the ages, revealing the faces it has presented to philosophers, writers, artists, and scientists for nearly three millennia. To do this, he has drawn on a wide array of sources that illustrate mankind's changing concept of the nature and significance of heavenly bodies from classical antiquity to the dawn of modern science. Montgomery especially focuses on the seventeenth century, when the Moon was first mapped and its features named. From literary explorations such as Francis Godwin's *Man in the Moone*

and Cyrano de Bergerac's *L'autre monde* to Michael Van Langren's textual lunar map and Giambattista Riccioli's *Almagestum novum*, he shows how Renaissance man was moved by the lunar orb, how he battled to claim its surface, and how he in turn elevated the Moon to a new level in human awareness. The effect on human imagination has been cumulative: our idea of the Moon, and therefore the planets, is multilayered and complex, having been enriched by associations played out in increasingly complicated harmonies over time. We have shifted the way we think about the lunar face from a "perfect" body to an earthlike one, with corresponding changes in verbal and visual expression. Ultimately, Montgomery suggests, our concept of the Moon has never wandered too far from the world we know best—the Earth itself. And when we finally establish lunar bases and take up some form of residence on the Moon's surface, we will not be conquering a New World, fresh

and mostly unknown, but a much older one, ripe with history.

Synthetic Worlds - Esther Leslie 2006-01-16

This revealing study considers the remarkable alliance between chemistry and art from the late eighteenth century to the period immediately following the Second World War. *Synthetic Worlds* offers fascinating new insights into the place of the material object and the significance of the natural, the organic, and the inorganic in Western aesthetics. Esther Leslie considers how radical innovations in chemistry confounded earlier alchemical and Romantic philosophies of science and nature while profoundly influencing the theories that developed in their wake. She also explores how advances in chemical engineering provided visual artists with new colors, surfaces, coatings, and textures, thus dramatically recasting the way painters approached their work.

Ranging from Goethe to Hegel,

Blake to the Bauhaus, Synthetic Worlds ultimately considers the astonishing affinities between chemistry and aesthetics more generally. As in science, progress in the arts is always assured, because the impulse to discover is as immutable and timeless as the drive to create.

The Body in French Queer

Thought from Wittig to

Preciado - Elliot Evans

The Body in French Queer

Thought from Wittig to

Preciado: Queer Permeability

identifies a common concern in

French queer works for the

materiality of the body, arguing

for a return to the body as

fundamental to queer thought

and politics, from HIV onwards.

The emergence of queer theory

in France offers an opportunity

to re-evaluate the state of

queer thought more widely:

what matters to queer theory

today? The energy of queer

thinking in France - grounded

in activist groups and

galvanised by recent hostility

towards same-sex marriage

and gay parenting - has

reignited queer debates.

Examining Paul B. Preciado's

experimentation with theory

and pharmaceutical

testosterone; Monique Wittig's

exploration of the body through

radically innovative language;

and, finally, the surgical

performances of French artist

ORLAN's 'Art Charnel', this

book asks how we are able to

account for the material body

in philosophy, literature, and

visual image. This is an

important work for academics

and students in French studies,

in Anglophone queer studies,

gender and sexuality studies

and transgender studies, and

will have significant interest

for specialists of cultural

translation and visual art and

culture.

Dante and Islam - Jan M. Ziolkowski 2014-12-01

Dante put Muhammad in one of the lowest circles of Hell. At the same time, the medieval Christian poet placed several Islamic philosophers much more honorably in Limbo.

Furthermore, it has long been suggested that for much of the basic framework of the Divine Comedy Dante was indebted to apocryphal traditions about a "night journey" taken by Muhammad. Dante scholars have increasingly returned to the question of Islam to explore the often surprising encounters among religious traditions that the Middle Ages afforded. This collection of essays works through what was known of the Qur'an and of Islamic philosophy and science in Dante's day and explores the bases for Dante's images of Muhammad and Ali. It further

compels us to look at key instances of engagement among Muslims, Jews, and Christians.

Days of Awe and Wonder - Marcus J. Borg 2017-03-14

Showcasing some of his most enduring and insightful writings, including many previously unpublished works, a concise and illuminating introduction to Marcus J. Borg, the late spokesman for progressive Christianity and one of the most revered and influential theologians of our time. In his acclaimed books, including classics such as

Meeting Jesus Again for the First Time, The Heart of Christianity, Speaking Christian, and Convictions, Marcus J. Borg helped shape an enlightened modernist view of Christianity. A leading scholar of the historical Jesus acclaimed for his ability to speak about Christianity in the context of contemporary society, Borg offered profound wisdom and inspiration—a new way of seeing and living the Christian life—for believers, students, and lay readers. Ultimately, he taught us that by developing a deeper understanding of Jesus and the New Testament, we can discover a more authentic way of being. Yet Borg himself was always conscious of a greater truth beyond what he could explain: the wonder of God. Now, two years after the liberal theologian's death, comes *The Days of Awe and Wonder*, a selection of his writing, including many never before published works, that explores the Christian faith and what it means to be a Christian in the twenty-first century.

Provocative and uplifting, this anthology illuminates Borg's explorations of the miraculous and wonderful, his understanding of conviction and fulfillment, and his contention that we must keep an open mind and question assumptions and certainties in all our religious journeys.
