Automobile Insurance Subrogation in All 50 States - Second Edition - Gary L. Wickert 2014-11-01

Automobile Insurance Subrogation: In All 50 States is the most thorough, comprehensive, and ambitious anthology of subrogation-related legal information and insurance resources ever put to paper. It is the last and most anticipated of the subrogation trilogy, and a book which will serve as the "bible" for any insurance company writing personal lines or commercial auto policies. It is destined to become the standard work and reference for attorneys, insurance companies, and subrogation industry professionals. Every year there are more than 7 million auto accidents in the United States with a financial toll of more than \$300 billion. Nearly 3 million people are injured and 42,636 people are killed. In the overwhelming majority of these accidents there is at least one party at fault. For virtually every one of these accidents, a policy of automobile insurance provides some sort of claim payments or benefits. In the vast majority of those claims, one or more insurance policies and/or applicable state law grants the insurer a right of subrogation against a negligent third party whose carelessness caused the accident. This book is the bible on subrogating those claims. This book covers the nuts and bolts of auto subrogation in all 50 states, covering every topic imaginable -- including PIP, Med Pay, UM/UIM, property claims, deductible reimbursement, no-fault subrogation and more. It surveys the laws of every state and provides descriptions of every type of auto coverage imaginable, as well as the statutory, case law, and regulatory authority governing every aspect of auto subrogation. If you have subrogation responsibility involving auto claims, you need this book. It universally covers issues which are indelibly interwoven into the business of auto insurance, including a complete treatment of the laws of all 50 states and

the District of Columbia relating to: • Basic and Statutory Subrogation Rights • Mandatory vs. Optional Insurance Coverage • No-Fault Laws, PIP, Mini-Torts, and Loss Transfer Laws • Tort Limitations • Medical Payments Coverage and Subrogation • Uninsured/Underinsured Motorist Coverage and Subrogation • Collision/Property Subrogation • Release of Tortfeasor by Insured • Accord and Satisfaction: Accepting Partial Payments from Tortfeasor • Made Whole Doctrine • Common Fund Doctrine • Economic Loss Doctrine • Deductible Recovery and Reimbursement • Collateral Source Rule • Contributory Negligence/Comparative Fault • Seat Belt Laws and Defenses • Rental Cars, Loaner Vehicles, and Test Drivers • Bailment/Parking Lot Liability • Negligent Entrustment • Facing Multiple Claims In Excess of Liability Policy Limits • Conflict of Laws/Interstate Subrogation • Recovery of Attorney's Fees and Costs • Statutes of Limitations It is a complete treatment -- A to Z -- of virtually every issue which the insurance claims or subrogation professional will face in the area of automobile insurance. It is like no legal treatise ever written and promises to be the most used reference in any insurance company.

Strengthening Forensic Science in the United States - National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often

constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
