Blind Chart Analysis - Guru Rajesh Kotekal 2018-03-16

'Blind Chart Analysis' is a procedure in which an astrologer predicts the past events and present condition of a native only by looking into the horoscope, without having a prior knowledge about the native. Astrologers practice this method for many reasons: for birth-time rectification, to bring faith in the client about the efficacy of astrology, to test the astrological techniques, to find out which method suits best for the given case, and to demonstrate his/her predictive abilities. To do blind chart analysis successfully an astrologer should have very sound knowledge of the subject, vast experience, good intuition and a bit of luck also. This book presents 100 cases of Blind Chart Analysis of people who approached the author for astrological consultation. This is a book, first of its kind, where the author demonstrates the method of Blind Chart Analysis by explaining the astrological reasons for the queries he asked the natives and for the responses he got. This work impresses the reader about the power and utility of Jyotisha in general and Nandi Naadi methods in particular. A must for anyone who wishes to gain command over the art of prediction.
