Landmarks in Earth Reinforcement - Hidetoshi Ochiai 2001

Earth reinforcing techniques are increasingly becoming a useful, powerful and economical solution to various problems encountered in geotechnical engineering practice. Expansion of the experiences and knowledge in this area has succeeded in developing new techniques and their applications to geotechnical engineering problems. In order to discuss the latest experiences and knowledge, and with the

purpose of spreading them all over the world for further development, the IS Kyushi conference series on the subject of earth reinforcement have been held in Fukuoka, Japan, every four years since 1988. This fourth symposium, entitled Landmarks in Earth Reinforcement, is a continuation of the series IS Kyushu conferences, and also aims at being one of the landmarks in the progress of modern earth reinforcement practice. The first volume contains 137 papers selected for the symposium covering almost every aspect of earth reinforcement. The second volume contains texts of the special and keynote lectures.

Duns Scotus's Doctrine of Categories and Meaning - Martin Heidegger 2022-09-06
Duns Scotus's Doctrine of Categories and Meaning is a key text for the origins of Martin Heidegger's concept of "facticity." Originally submitted as a postdoctoral thesis in 1915, it focuses on the 13th-century philosopher-theologian John Duns Scotus. Heidegger first analyzes Scotus's doctrine of categories, then offers a meticulous explanation of the *Grammatica Speculativa*, a work of medieval grammar now known to be authored by the Modist grammarian Thomas of Erfurt. Taken together, these investigations represent an early foray into Heidegger's lifelong philosophical concerns, "the question of being in the guise of the problem of categories and the question of language in the guise of the doctrine of meaning." This new and unique translation of one of Heidegger's earliest works offers an important look at his early thinking before the question of being became his central concern and will appeal to readers exploring Heidegger's philosophical development, medieval philosophy, phenomenological interpretations of the history of philosophy, and the philosophy of language.

Mathematical Analysis for Business, Economics, and the Life and Social Sciences - Jagdish C. Arya 1993

With an emphasis on techniques, this volume focuses on the applications of basic mathematics and differential and integral calculus in the field of business, economics and the life and social sciences. All mathematical theorems, proofs and concepts are described intuitively and then mathematically. Reorganized and rewritten material includes chapters on exponentials and logarithms, curve sketching and optimization, application sections of straight lines and

quadratic inequalities. A new section on difference equations and expanded coverage of differential equations is included.

Model Rules of Professional Conduct - American

Bar Association. House of Delegates 2007
The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify

proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.
