Ford 429/460 Engines - Jim Smart 2021-12-20

Learn to make incredible horsepower from Ford's most powerful big-block engine design. For years, Ford relied on the venerable FE big-block engine design to power its passenger cars, trucks, and even muscle cars—and why not? The design was rugged, reliable, amortized, and a proven race winner at Le Mans and drag strips across the country. However, as is always the case with technology, time marches on, and Ford had a new design with many improvements in mind. Enter the 385 family of engines (also known as the "Lima" big-block). Produced from 1968-1998, the 385-series engines were used in multiple applications from industrial trucks to muscle cars and luxury cruisers. In *Ford 429/460 Engines: How to Build Max Performance*, which was written by Ford expert Jim Smart, all aspects of performance building are covered, including engine history and design, induction systems, cylinder heads, the valvetrain, camshaft selection, the engine block, and rotating assemblies. The best options, optimal parts matching, aftermarket versus factory parts, budget levels, and build levels are also examined. The 429/460 engines are a good platform for stroking, so that is covered here as well. Whether you want to build a torque-monster engine for your off-road F-150, a better-performing version of a 1970s-era smog motor for your luxury Lincoln, or an all-out high-horsepower mill for your muscle

car, this book is a welcome addition to your performance library.

The Negro Motorist Green Book - Victor H. Green

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels,

whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

1967 Mustang Reconstructive Surgery - Steve Gray 2015-02-11

This book chronicles the reconstruction of a 1967 Mustang Coupe. The Coupe started as a plain, low value coupe. Time, gravity, weather, and use eventually caught up with the Coupe and it needed a serious make-over. The Coupe was converted from its existing 289 cubic inch, carbureted motor to a 5.0 fuel injected engine. At the same time, it was converted from an automatic to manual transmission (T-5) with overdrive. The reconstruction took 7 years (working on a part-time basis). Information is provided for reference only.
