CPA Examination Review - Patrick R. Delancy 1983

Managing Information Technology in a Global Economy - Information Resources Management Association. International Conference 2001

Today, opportunities and challenges of available technology can be utilized as strategic and tactical resources for your organization. Conversely, failure to be current on the latest trends and issues of IT can lead to ineffective and inefficient management of IT resources. Managing Information Technology in a Global Economy is a valuable collection of papers that presents IT management perspectives from professionals around the world. The papers introduce new ideas, refine old ones and possess interesting scenarios to help the reader develop company-sensitive management strategies.

Accounting Theory - Richard G. Schroeder 1991-01-16

Based on a descriptive interpretation of the Opinions and Standards issued by the Accounting Principles Board and the Financial Accounting Standards Board, it provides students with an authoritative and thorough grounding in financial accounting theory. Provides a framework within which to operate by discussing financial accounting topics and expands on these topics by including readings directly connected with each of the chapters. In addition, it contains end-of-chapter multiple-choice and essay questions related to the material. Adapted from recent Uniform CPA Examinations, these questions provide exposure to the types of issues the Board of Examiners has stressed in recent years.

Prentice-Hall Accounting Faculty Directory - 1992

Accounting Information Systems - L. Murphy Smith 1998

This textbook provides a thorough, current presentation of accounting information systems (AIS) in a field where coverage of the most recent developments is critical. AIS is in a state of constant change and only students prepared to address these changes will be successful. Contemporary issues such as ethics, the effect of information technology on international business, and cyberspace are presented along side traditional topics such as internal control, accounting cycles, and systems development. Whether students plan to work in public accounting, industry, in the nonprofit sector, or simply need a deeper knowledge of AIS for business, this text provides the latest information in a straightforward writing style.

Business Innovation and Development in Emerging Economies - Irwan Trinugroho 2019-05-22

Business Innovation driven by the advancement of technology has dramatically changed the business landscape over recent years, not only in advanced countries but also in emerging markets. It is expected that business innovation could help achieve economic inclusion, which has been a global initiative over the last decade, creating opportunities for all people to benefit from the economic development. These proceedings provide an outlet for discussing the importance of business innovation, especially in emerging countries in helping to reach inclusive economies. The papers cover the subject areas management, accounting, finance, economics and social sciences.

Structural Equation Modeling Approaches to E-Service Adoption - Akgül, Yakup 2019-04-19

With the modernization of services offered through the internet, many traditional face-to-face services have adopted new e-service phenomena. Especially prevalent among the younger generations, this change in service has promoted many industries to rethink how to best reach their consumers using modern technology. Structural Equation Modeling Approaches to E-Service Adoption is a pivotal reference source that aims to share the latest empirical research findings within technology acceptance, information systems, information technology, human-computer interaction, and management information systems. While highlighting topics such as e-commerce, internet banking, and technology acceptance, this publication explores the understanding of today's e-services in a dynamic and complex environment, as well

as the methods within the field of information systems and information technologies. This book is ideally designed for academics, students, managers, and scholars interested in the up-and-coming research surrounding the field of information technology.

Enacting Research Methods in Information Systems: Volume 1 - Leslie P. Willcocks 2016-05-30

This edited three volume edition brings together significant papers previously published in the Journal of Information Technology (JIT) over its 30 year publication history. The three volumes of Enacting Research Methods in Information Systems celebrate the methodological pluralism used to advance our understanding of information technology's role in the world today. In addition to quantitative methods from the positivist tradition, JIT also values methodological articles from critical research perspectives, interpretive traditions, historical perspectives, grounded theory, and action research and design science approaches. Volume 1 covers Critical Research, Grounded Theory, and Historical Approaches. Volume 2 deals with Interpretive Approaches and also explores Action Research. Volume 3 focuses on Design Science Approaches and discusses Alternative Approaches including Semiotics Research, Complexity Theory and Gender in IS Research. The Journal of Information Technology (JIT) was started in 1986 by Professors Frank Land and Igor Aleksander with the aim of bringing technology and management together and bridging the 'great divide' between the two disciplines. The Journal was created with the vision of making the impact of complex interactions and developments in technology more accessible to a wider audience. Retaining this initial focus, the JIT has gone on to extend into new and innovative areas of research such as the launch of JITTC in 2010. A high impact journal, JIT shall continue to publish leading trends based on significant research in the field.

Advanced Accounting - Andrew A. Haried 1982

Provides comprehensive coverage of advanced accounting topics in a clear and readable manner. The Fifth Edition deals with the following areas: business combinations, consolidated financial statements, equity methods of reporting investments, branches, foreign currency transactions, translation of financial statements of foreign affiliates, segment reporting and interim reporting, corporate reorganization and liquidation, partnerships, fund accounting and accounting for governmental units, accounting for nongovernmental and nonbusiness organizations, estates and trusts, installment sales, and consignment transactions. Offering maximum flexibility for instructors in selection and breadth of coverage, it has been updated to reflect the most recent pronouncements of the Financial Accounting Standards Board and Governmental Accounting Standards Board. Includes numerous exercise and problem material.

Audit Sampling - Dan M. Guy 1994-01-26

Designed from the perspective of financial auditing with emphasis on the use of sampling in the audit of financial statements by external as well as internal auditors. Presents technical sampling material within the context of the auditing risk model. New to this edition: a chapter on nonstatistical sampling, coverage of sampling to test compliance with laws and regulations, SAS #55 on internal control structure and recently published articulation standards.

Financial Portion of Accounting Principles, Chapters 1-20 - Jerry J. Weygandt 1991-01-02

Management for Productivity - John R. Schermerhorn 1986

A completely self-contained treatment of management fundamentals, including text, case applications, class exercises and career perspectives - a complete course and supplemental ancillaries in a single text. Designed for a first course in principles of management, this revised and updated edition introduces the traditional management functions - planning, organizing, leading and controlling - with a strong, ongoing emphasis on productivity. Changes include new end of chapter cases, new career perspectives and four new extensive case studies.
