Together We Will Go - J. Michael Straczynski 2022-02-22

The Breakfast Club meets The Silver Linings Playbook in this powerful, provocative, and heartfelt novel about twelve strangers who come together to make the most of their final days, from New York Times bestselling and award-winning author J. Michael Straczynski. Mark Antonelli, a failed young writer looking down the barrel at thirty, is planning a cross-country road trip. He buys a beat-up old tour bus. He hires a young army vet to drive it. He puts out an ad for others to join him along the way. But this will be a road trip like no other: His passengers are all fellow disheartened souls who have decided that this will be their final journey—upon arrival in San Francisco, they will find a cliff with an amazing view of the ocean at sunset, hit the gas, and drive out of this world. The unlikely companions include a young woman with a chronic pain sensory disorder and another who was relentlessly bullied at school for her size; a bipolar, party-loving neo-hippie; a gentle coder with a literal hole in his heart and blue skin; and a poet dreaming of a better world beyond this one. We get to know them through access to their texts, emails, voicemails, and the daily journal entries they write as the price of admission for this trip. By turns tragic, funny, quirky, charming, and deeply moving, Together We Will Go explores the decisions that brings these characters together, and the relationships that grow between them, with some discovering love and affection for the first time. But as they cross state lines and complications to the initial plan arise, it becomes clear that this is a novel as much about the will to live as it is the choice to end it. The final, unforgettable moments as they hurtle toward the outcomes awaiting them will be remembered for a lifetime.

The Happy Traveler - Jaime Kurtz 2017-05-01

Travel is one of the most sought-after experiences in life. It has the singular ability to capture our imaginations, serving as a canvas onto which we project our deepest desires and needs: escape, relaxation, transcendence, interpersonal connection, cultural education, and more. Few things hold such a privileged place, yet until now, there has been no instruction manual for how to make the most of travelling, be it to an exotic country or to the local beach. In The Happy Traveler: Unpacking the Secrets of Better Vacations, psychology professor Jaime Kurtz applies the large and ever-growing body of research on happiness and decision-making to enhance the experience of travel. An avid explorer, study abroad instructor, teacher,

and happiness researcher, Dr. Kurtz shows how anyone who has a vacation in his or her future can create the most meaningful, fulfilling, and joyful experiences possible. When the price of travel is daunting, getting the most "bang for your buck", both financially and emotionally, is essential to an ideal travel experience. With a sense of humor and adventure, Dr. Kurtz provides guidance on how to craft your perfect trip, boost your excitement before your trip even begins, and actively immerse yourself in a new culture while unplugging from your technological ties to home. She also explains how to best cherish and share travel moments, how to ease back into your daily life upon returning, and how to carry the secrets of happy travel into every day. This is a must-have guide if you are looking to make the most of your precious vacation days.

Russian-Soviet Unconventional Wars in the Caucasus, Central Asia, and Afghanistan [Illustrated Edition] - Dr. Robert F. Baumann 2015-11-06

[Includes 12 maps and 4 tables] In recent years, the U.S. Army has paid increasing attention to the conduct of unconventional warfare. However, the base of historical experience available for study has been largely American and overwhelmingly Western. In *Russian-Soviet Unconventional Wars in the Caucasus, Central Asia, and Afghanistan*, Dr. Robert F. Baumann makes a significant contribution to the expansion of that base with a well-researched analysis of four important episodes from the Russian-Soviet experience with unconventional wars. Primarily employing Russian sources, including important archival documents only recently declassified and made available to Western scholars, Dr. Baumann provides an insightful look at the Russian conquest of the Caucasian mountaineers (1801-59), the subjugation of Central Asia (1839-81), the reconquest of Central Asia by the Red Army (1918-33), and the Soviet war in Afghanistan (1979-89). The history of these wars—especially as it relates to the battle tactics, force structure, and strategy employed in them—offers important new perspectives on elements of continuity and change in combat over two centuries. This is the first study to provide an in-depth examination of the evolution of the Russian and Soviet unconventional experience on the predominantly Muslim southern periphery of the former empire. There, the Russians encountered fierce resistance by peoples whose cultures and views of war differed sharply from their own. Consequently, this *Leavenworth Paper* addresses not only issues germane to combat but to a wide spectrum of civic and propaganda operations as well.

Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth Through Age 8, Fourth Edition (Fully Revised and Updated) - NAEYC 2021-08

The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that

promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.

Aerotropolis - John D. Kasarda 2011-03-01

This brilliant and eye-opening look at the new phenomenon called the aerotropolis gives us a glimpse of the way we will live in the near future—and the way we will do business too. Not so long ago, airports were built near cities, and roads connected the one to the other. This pattern—the city in the center, the airport on the periphery—shaped life in the twentieth century, from the central city to exurban sprawl. Today, the ubiquity of jet travel, round-the-clock workdays, overnight shipping, and global business networks has turned the pattern inside out. Soon the airport will be at the center and the city will be built around it, the better to keep workers, suppliers, executives, and goods in touch with the global market. This is the aerotropolis: a combination of giant airport, planned city, shipping facility, and business hub. The aerotropolis approach to urban living is now reshaping life in Seoul and Amsterdam, in China and India, in Dallas and Washington, D.C. The aerotropolis is the frontier of the next phase of globalization, whether we like it or not. John D. Kasarda defined the term "aerotropolis," and he is now sought after worldwide as an adviser. Working with Kasarda's ideas and research, the gifted journalist Greg Lindsay gives us a vivid, at times disquieting look at these instant cities in the making, the challenges they present to our environment and our usual ways of life, and the opportunities they offer to those who can exploit them creatively. Aerotropolis is news from the near future—news we urgently need if we are to understand the changing world and our place in it.
