Accelerating MATLAB with GPU Computing - Jung W. Suh 2013-11-18

Beyond simulation and algorithm development, many developers increasingly use MATLAB even for product deployment in computationally heavy fields. This often demands that MATLAB codes run faster by leveraging the distributed parallelism of Graphics Processing Units (GPUs). While MATLAB successfully provides high-level functions as a simulation tool for rapid prototyping, the underlying details and knowledge needed for utilizing GPUs make MATLAB users hesitate to step into it. Accelerating MATLAB with GPUs offers a primer on bridging this gap. Starting with the basics, setting up MATLAB for CUDA (in Windows, Linux and Mac OS X) and profiling, it then guides users through advanced topics such as CUDA libraries. The authors share their experience developing algorithms using MATLAB, C++ and GPUs for huge datasets, modifying MATLAB codes to better utilize the computational power of GPUs, and integrating them into commercial

software products. Throughout the book, they demonstrate many example codes that can be used as templates of C-MEX and CUDA codes for readers' projects. Download example codes from the publisher's website: <http://booksite.elsevier.com/9780124080805/> Shows how to accelerate MATLAB codes through the GPU for parallel processing, with minimal hardware knowledge Explains the related background on hardware, architecture and programming for ease of use Provides simple worked examples of MATLAB and CUDA C codes as well as templates that can be reused in real-world projects

Adolescents and the Media - Victor C. Strasburger 1995-03-16

"Victor C. Strasburger has given us a clear, concise summary of a massive amount of information on a very important subject. This slim volume should be read by every professional who cares for and about adolescents." --Michael B. Rothenberg, M.D., Professor Emeritus, University of Washington School of Medicine "There is much of value here. An opening chapter provides an excellent overview of how mass communication research is conducted, and subsequent chapters focus on current findings regarding the effects of televised portrayals of violence, sex, and the consumption of alcohol, tobacco, and food on adolescents. . . . Comprehensive and well-referenced bibliography. . . . *Adolescents and the Media* is recommended for a general readership and for undergraduate collections in media studies, health care, and education." --Choice Violent television programs, gory video games, print tobacco advertising, TV beer commercials, and sexually suggestive music videos. How do these and other forms of popular media affect the thinking, behavior, and health of America's teenagers? *Adolescents and the Media* provides a state-of-the-art review of research findings on the influence of such media as television, movies, video games, print advertising, rock music, and music videos on adolescents. Beginning from a theoretical and conceptual background of adolescent development, the book covers findings on violence, sexual activity, substance abuse, and eating disorders and makes a clear case that media play a role in diverse facets of at-risk behavior and adjustment. It concludes with recommended strategies for preventing adverse media effects on youths. Mental health professionals and policy makers, primary care physicians and nurses, educators, and almost anyone who works with and cares about adolescents, will find this an eye-opening work.

A Heart for the Work - Claire L. Wendland 2010-09-15

Burnout is common among doctors in the West, so one might assume that a medical career in Malawi, one of the poorest countries in the world, would place far greater strain on the idealism that drives many doctors. But, as *A Heart for the Work* makes clear, Malawian medical students learn to confront poverty creatively, experiencing fatigue and frustration but also joy and commitment on their way to becoming physicians. The first ethnography of medical training in the global South, Claire L. Wendland's book is a moving and perceptive look at medicine in a world where the transnational movement of people and ideas creates both devastation and possibility. Wendland, a physician anthropologist, conducted extensive interviews and worked in wards, clinics, and operating theaters alongside the student doctors whose stories she relates. From the relative calm of Malawi's College of Medicine to the turbulence of training at hospitals with gravely ill patients and dramatically inadequate supplies, staff, and technology, Wendland's work reveals the way these young doctors engage the contradictions of their circumstances, shedding new light on debates about the effects of medical training, the impact of traditional healing, and the purposes of medicine.

An Aid to Radiology for the MRCP - K. K. Ray 2000-04-17

Co-written by the author of the best-seller *An Aid to the MRCP Short Cases* this new, systematically organized text concentrates on examples that are frequently examined in the MRCP Part 2 written examination - saving candidates time during revision and enabling them to concentrate on weaker specialities. By including high quality images and labelling abnormal findings on the original images, the authors enable the reader to feel confident about recognizing specific radiological abnormalities, instead of guessing where the abnormality lies. In order to avoid guessing, the reader is asked to describe the radiological findings in each case. In the Question section, each page is dedicated to an X-ray and sample questions. An Answer section, with further radiographs to highlight variations and details, is given at the end of the book to provide background knowledge.

Irishness and Womanhood in Nineteenth-century British Writing -

Thomas J. Tracy 2009

Air Pollution Control Equipment Selection Guide - Kenneth C. Schiffner 2002-06-26

The selection of air pollution control apparatus can be a daunting task even for experienced pollution control professionals. The Air Pollution Control Equipment Selection Guide eases the burden by providing extensive information on the best equipment available for any air pollution control problem. Instead of endorsing one technology over another, the author provides general information so that you can decide on the proper technology to use for any given application. The book offers ample introductory information including a helpful "Air Pollution 101" chapter that reviews the basics of air pollution control. The text is divided into sections that are organized by the primary technology employed, i.e., Quenching, Cooling, Particulate Removal, Gas Absorption, etc. This structure enables you to jump from section to section and quickly compare technologies. Each section defines the type of gas

cleaning device, the basic physical forces used in it, its common sizes, and its most common uses. Many air pollution control problems are not solved with one type of device, but through using a variety of designs synergistically. To make this task easier, the author includes sections on each of these devices and notes where they are commonly used in concert with other equipment. Wherever possible, the text includes current photographs or drawings of typical equipment within that device type. Written in an easy to read style, Air Pollution Control Equipment Selection Guide serves as a technologically accurate reference that will facilitate the selection of air pollution control equipment for any operation.

My Life in Christ - Eustace Clarence Mullins 2017-09

THIS is the story of my life in Christ. Now, what does living in Christ mean? It means that one is FOR Christ, that one not only accepts Him, but that one lives in Him. Living in Christ has little relationship to the more commonly accepted situation of living as a Christian, or living a Christian life. Living AS a Christian means that one has accepted the tokens of Christianity, that one agrees in the divinity of Christ, that one is a member of a Christian congregation, in a largely Christian community, in a Christian nation. Thus, one can lead a Christian life without knowing Christ and without changing one's existence in the slightest degree. If a person leads a Christian life, and it does not transform one's existence, then one can be sure that he does not KNOW Christ. Knowing Christ is the only manner in which one can go beyond oneself, and the only manner in which one can go beyond one's world. In knowing Christ, one is immediately lifted out of the mechanical life of the human existence, one transcends the common existence. One is no longer a human machine, leading a hopeless, mechanical life, repeating the same meaningless motions like a robot throughout the years of one's

earthly existence. What was Christ's admonition? "Take up the Cross, and follow Me." But, in explication of this admonition, the New Testament contains many significant references to the condition of sleep, and Christ's exhortations to mankind to awaken. Now, what does this mean? It means that Christ did not wish to be followed by robots and sleepwalkers, He desired man to awaken, and to attain the full use of his earthly powers. Not only are mechanical men of no use to Christ, but they are quite dangerous, they present endless difficulties in the establishment of Christ's Kingdom on earth.

To My Arrogant Boss - J. S. Cooper 2021-01-01

To Mr. Tate Howard, You are quite possibly the most infuriating, annoying and grumpy man I've ever met in my life. I know you think that you're God's gift to women, but I have a secret to let you in on: you're not. You're God's gift to yourself. Get over your wanna-be cool surfer self and grow up. I thought it was time that someone addressed your big head and told you straight to your face that you're not all that. Just because you have an Ivy league education doesn't mean you're the smartest man in the world. In fact, I'm not even sure if you would have

gotten in if you didn't have rich parents. Yes, I went there. Every woman doesn't want to sleep with you and I'm sure you're not even good in bed. And I'm someone that would know. From, Your Secret Not Admirer

A Short Guide to Risk Appetite - David Hillson 2017-03-02

How much risk should we take? A Short Guide to Risk Appetite sets out to help all those who need to decide how much risk can be taken in a particular risky and important situation. David Hillson and Ruth Murray-Webster introduce the RARA Model to explain the complementary and central roles of Risk Appetite and Risk Attitude, and along the way they show how other risk-related concepts fit in. Risk thresholds are the external expression of inherent risk appetite, and the challenge is how to set the right thresholds. By progressively deconstructing the RARA Model, the authors show that the essential control step is our ability to choose an appropriate risk attitude. The book contains practical guidance to setting risk thresholds that take proper account of the influences of organisational risk culture and the individual risk preferences of key stakeholders. Alongside this, individuals and organisations need to choose the risk attitude that will optimise their chances of achieving the desired objectives.
