The Glossary of Prosthodontic Terms - Academy of Prosthodontics 1994

Ammunition and Explosives Safety Standards - 1982

Logbook - Renzo Piano 1997

Renzo Piano (Genoa, 1937) studied architecture at the Polytechnic in Milan. Since winning the competition to design the Centre Pompidou in Paris (1971) along with Richard Rogers, Piano has become a prominent figure on the international architectural scene, with more works constructed outside Italy than in his own country. Piano brings a similar approach to both the small and the large scale. He has directed projects of very varying sizes: small buildings like the travelling IBN Pavilion and the Brancusi Museum; and great megastructures like Kansai's International Airport Terminal built on a man-made island in the Bay of Tokyo, and the remodeling of Berlin's Potsdamer Platz where work is scheduled to be completed in 2002.

Clinical Practice Guidelines For Chronic Kidney Disease - 2002

Architects' Data - Ernst Neufert 1991-01-15

This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

Pre-Incident Indicators of Terrorist

Incidents - Brent L. Smith 2011-01

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents.
