Kabbalah for Beginners: An Introduction to Jewish Mysticism - Theo Lalvani
2021-08-19

The Kabbalah has long languished in darkness, unknown outside the confines of Jewish Mysticism and the communities who practiced it. But today, the Kabbalah is well-known but often misunderstood. The story of Kabbalah is as old as Judaism itself, with many of the ideas present in the Hebrew Scriptures interpreted in the canon of Kabbalah. Applying Jewish theological premises and Neo-Platonist cosmology,

the Kabbalists created a systematic interpretation of familiar Creation Narrative in the Book of Genesis, which today illuminates and serves Judaism. At the same time, Kabbalistic concepts have entered mainstream consciousness with great interest expressed in mainstream Christianity and even in modern science.

Death Waits in the Dark - Mark Edward Langley
2020-08-04

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack

Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if

the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

Conducting Action Research to Evaluate Your School

Library - Judith Anne Sykes 2013-05

How should teacher librarians or instructional leaders engage in action research to improve their school library and benefit students' learning? This book provides the answers. Teacher librarians need to get directly involved with the research process in the learning commons in order to create actions and strategies that will enhance student learning—and benefit their own professional development as well as demonstrate accountability through their action research efforts. This book provides practical tips and work spaces for educators at the local, state, and national levels,

clearly modeling and explaining the process and the tools for conducting action research in a school library setting that will identify the program's strengths and weaknesses. The author coalesces current expert opinions on the topic of action research in the school library environment and highlighting what other teacher librarians in the field have identified as the pros and cons of using the process. Readers are directed to focus on mitigating the "cons" through the use of specific working pages and templates and by initially exploring "five favorite" links, thereby encouraging those who are new to action research to try what might otherwise seem a daunting process. School principals K-12 who read this book will be better equipped to support their teacher librarians and teachers in this important professional process. Supplies invaluable insights from experts and practitioners on the subject of action research Provides a clear model of the process in action Directs

readers to additional resources that facilitate effective action research and timely topics for school library research, such as time management and technology in learning Learning with Information Systems - Simon Bell
2013-02-01

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of

The Autumn of the Ace - Louis de Bernières 2020-11-05
'De Bernieres is a singular, cherishable voice' Mail on Sunday From the master of historical fiction, this book follows an unforgettable family after the Second World War. Some bonds are hard to break... Daniel Pitt was an RAF fighter in the First World War and an espionage agent for the SOE in the Second. Now the conflicts he faces are closer to home. Daniel's marriage has fractured beyond repair and Daniel's relationship with his son, Bertie, has been a failure since Bertie was a small boy. But after his brother Archie's death, Daniel is keen for new perspectives. He first travels to Peshawar to bury Archie in the place he loved best, and then finds himself in Canada, avoiding his family and friends back in England. Daniel and Bertie's different experiences of war, although devastating, also bring with them the

opportunity for the two to reconnect. If only they can find a way to move on from the past...

The Shooting at Chateau Rock - Martin Walker 2020-05-26
This installment in the delightful, internationally acclaimed series featuring Chief of Police Bruno will take all of Bruno's resolve and quick thinking to untangle a mystery that will reach its deadly denouement at the chateau of an aging rock star. But in true Bruno fashion, at least lunchtime is never in danger. It's summer in the Dordogne and the heirs of a modest sheep farmer learn that they have been disinherited. Their father's estate has been sold to an insurance company in return for a policy that will place him in a five-star retirement home for the rest of his life. But the farmer dies before he can move in. Was it a natural death? Or was there foul play? Chief of Police Bruno Courrèges is soon on the case, embarking on an investigation that will lead him to several shadowy insurance companies

Constitutional Mythologies -

Alain Marciano 2011-08-02

Our societies obviously rest on common beliefs. These "myths" are tools that help us to develop and build common identities; they form the structure around which societies function. This does not imply that these beliefs are "true," in the sense that they would be supported by empirical facts. In social matters, myths have undoubtedly important functions to play even if no empirical facts support them. On the other hand, and precisely because they are not discussed, myths may be

problematic: they may create illusions, conserve structures that are inefficient and unable to improve the situation of citizens. This is particularly true with constitutions.

Constitutions are very important for societies: a constitution is a document — even in societies based on "unwritten" constitutions — which binds citizens together, creating unity among them, and which forms the framework within which our activities take place. As Nobel Prize laureate James Buchanan used to say: constitutions contain the rules of the social game we play in our everyday life. However, constitutions are not frequently debated by citizens. This is why we end up with common beliefs about these constitutions: they are above our heads, around us. We take them, their role, function, and nature as given. The purpose of this volume to investigate and challenge common constitutional myths. Featuring contributions from prominent economists, political scientists, and legal scholars,

the chapters in this volume address such myths as “constitutions are binding social contracts,” “constitutions are economic documents” and “constitutions are legal documents.”

Illustrating their analyses with historical and contemporary examples from the United States, Canada, and Europe, the authors build a multi-layered approach to understanding constitutions and their implications for social and political influence.

Business Schools and their Contribution to Society - Mette Morsing 2011-10-18

Electronic Inspection Copy available for instructors here
Business schools are arguably some of the most influential institutions in contemporary society. The research and education they provide set the standard for how future leaders manage local and global organizations - a responsibility requiring continual discussion,

development and challenge.

This exciting book explores the role of business schools through 3 key dimensions: - How business school legitimacy has been challenged by the recent economic crisis and corporate scandals; - How schools contribute to shaping and transforming business conduct; and - How institutions, past and present, develop their identities to face the challenges presented by the ongoing globalization process. Combining global perspectives from business school Deans, scholars and stakeholders, this book presents a unique discussion of the current and future challenges facing business schools and their contributions to society.

Concepts from Tensor Analysis and Differential Geometry -

Tracy Y. Thomas 2016-06-03

Concepts from Tensor Analysis and Differential Geometry discusses coordinate manifolds, scalars, vectors, and tensors.

The book explains some interesting formal properties of a skew-symmetric tensor and the curl of a vector in a coordinate manifold of three dimensions. It also explains Riemann spaces, affinely connected spaces, normal coordinates, and the general theory of extension. The book explores differential invariants, transformation groups, Euclidean metric space, and the Frenet formulae. The text describes curves in space, surfaces in space, mixed surfaces, space tensors, including the formulae of Gauss and Weingarten. It presents the equations of two scalars K and Q which can be defined

over a regular surface S in a three dimensional Riemannian space R . In the equation, the scalar K , which is an intrinsic differential invariant of the surface S , is known as the total or Gaussian curvature and the scalar U is the mean curvature of the surface. The book also tackles families of parallel surfaces, developable surfaces, asymptotic lines, and orthogonal ennuples. The text is intended for a one-semester course for graduate students of pure mathematics, of applied mathematics covering subjects such as the theory of relativity, fluid mechanics, elasticity, and plasticity theory.

Violence and Mental Health - Jutta Lindert 2015-02-25

Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such

as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

The Ethos of the Climate Event
- Kellan Anfinson 2020-12-30
This book develops a politico-ethical response to climate change that accounts for the novelty and uncertainty that it entails. This volume explores

the ethical dimensions of climate change and posits that one must view it as a social construction intimately tied to political issues in order to understand and overcome this environmental challenge. To show how this ethos builds upon the need for new forms of responsiveness, Anfinson analyzes it in terms of four features: commitment, worldly sensitivity, political disposition, and practice. Each of these features is developed by putting four thinkers - Kierkegaard, Nietzsche, Schmitt, and Foucault respectively - in conversation with the literature on climate change. In doing so, this book shows how social habits and norms can be transformed through subjective thought and behavior in the context of a global environmental crisis. Presenting a multidisciplinary engagement with the politics, philosophy, and science of climate change, this book will be of great interest to students and scholars of climate change, environmental politics, environmental philosophy and

environmental humanities.
