Netliving 101 - John Durkin 2000-09
"It is not what you know, but who you know that counts." This old cliche is as true today as it was when it was first uttered. According to a recent survey conducted by Drake Beam Morin, Inc. (a large outplacement organization), networking fills 70 percent of professional positions. Networking for a job is the best way to tap into the unpublished job market. NETLIVING 101, Networking Life's Journeyreaches beyond the job market into all aspects of life from the womb to the tomb. Hence the word networkingis replaced by my newly coined word netliving . There is currently no book, as indicated by reviewing Books in Print, that shows people how to take advantage of networking techniques used in job hunting to enhance other facets of their lives. NETLIVING 101, Networking Life's Journeyfills that gap by providing all the tools and information readers need to establish networks and have more enjoyable and successful lives. One of the reasons for choosing the title NETLIVING 101, Networking Life's Journeywas because, to the best of my

knowledge, no college or university offers a course as part of a curriculum on the subject. In earlier, simpler times when most of the world's population lived in small villages where everyone knew their neighbor, there was no need to build networks for they were already in place. The local church or pub was usually the hub of the network. With the complexity of today's society it has become necessary to make a concerted effort to establish support networks in order to be successful and happy. In this self-help book, ideas, examples and suggestions for netliving are developed through short vignettes based on the lives of real people. Names and places will be changed to protect the innocent. NETLIVING 101, Networking Life's Journey is written using the concept known as faction. Essentially, faction refers to the inclusion of certain details which, although they may not have occurred exactly as described in point of fact, give the reader a clear image of the scene in his or her imagination. Rather than telling the reader what netliving is all about, this book demonstrates through the words and actions of the characters. Chapter One introduces the two key characters that appear throughout the book. Roberta and Richard are used alternately, from chapter to chapter, to provide different perspectives. The fabric of friendships is woven through the stages of life and applied to various life experiences from overcoming the fear of public speaking to preparing for retirement. Netliving 101, Networking Life's Journey is designed for individuals who are career oriented, sophisticated, and thoughtful. Most people are concerned about their future and are taking steps to afford themselves successful, happy and prosperous "mature years."

The Fourth Industrial Revolution - Klaus Schwab 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manu-facturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individu-als. Schwab also offers bold ideas on how to

harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.
