2009

"The New Handbook of Second Language Acquisition" is a thoroughly revised, re-organized, and re-worked edition of Ritchie and Bhatia's 1996 handbook. Part II contains chapters on Universal Grammar, emergentism, variationism, information-processing, sociocultural, and cognitive-linguistic. Part III is devoted to overviews of SLA research on lexicon, morphosyntax, phonology, pragmatics, sentence processing, and the distinction between implicit and explicit knowledge. Part IV examines neuropsychology of SLA, another on child SLA, and the effects of age on second language acquisition and use. Part V is concerned with the contribution of the linguistic environment to SLA, including work on acquisition in different environments, through the Internet, and by deaf learners. Finally, Part VI treats social factors in SLA, including research on acquisition in contact circumstances, on social identity in SLA, on individual differences in SLA, and on the final state of SLA, bilingualism.

Developing Cross-Cultural Relational Ability in Foreign Language Learning - Gerrard Mugford 2021-07-23

By reconceptualizing successful communication in a foreign language as an enjoyable and uplifting experience, this volume moves beyond a focus on grammatical accuracy and fluency to foreground the ways in which foreign language learners can be encouraged to build on previous achievements and communicative successes in the target language and so develop confidence, commitment and cross-cultural relational ability. Building on Mugford's previous volume, *Addressing Difficult Situations in Foreign-Language Learning* (2019), this text draws on grounded qualitative data collected through questionnaires, semi-structured interviews and conversations with Spanish-speaking learners of English, to illustrate how learners' experiences and insights can be used to inform a productive pedagogy centred around language users' communicative objectives and interactional successes. Chapters highlight bilingual speakers' conscious language use, practices and choices in the target language and the reasons and implications for such deliberate communicative practices and relational behaviour. In doing so, Mugford is able to outline a critical relational pedagogy designed to better equip language learners with the confidence and pragmatic resources they require to engage in positive cross-cultural relational work. As a valuable, student-centred contribution to teaching and learning of modern foreign languages, this volume will be key reading for researchers, scholars and educators with an interest in language education, TESOL, World Language teaching and Applied Linguistics.

Form, Meaning and Function in Collocation - Haoda Feng 2020-04-03

The issue of differences between translational language and native-speaker language has become a topic of increasing interest in linguistics and Translation Studies (TS). One of the primary tasks in this research area is to employ a corpus approach and analyse collocations with authentic language data by comparing comparable corpora consisting of translated and native-speaker texts. Collocation in linguistics and TS refers to the relationship of co-occurrence between lexical items. The book shows that examining the use of collocations constitutes an integral part in assessing the naturalness of second language (L2) use, and therefore can be a valid measure to make a distinction between translational language and native-speaker language. Nevertheless, the role of collocation has not been given enough attention or discussed systematically in TS and, to date, there are hardly any translation theorists who have clarified the mechanism of collocation in TS, by which translators acquire receptive and productive knowledge of collocations in their L2. In addition, previous research in this area is largely confined to Indo-European languages, resulting in a lack of empirical evidence involving Asian languages. This book therefore attempts to bridge the gap in the literature and constitute an integral part in the research area.

Teaching Emergent Bilingual Students - C. Patrick Proctor

2016-08-05

Recent educational reform initiatives such as the Common Core State Standards (CCSS) largely fail to address the needs--or tap into the unique resources--of students who are developing literacy skills in both English and a home language. This book discusses ways to meet the challenges that current standards pose for teaching emergent bilingual students in grades K-8. Leading experts describe effective, standards-

aligned instructional approaches and programs expressly developed to promote bilingual learners' academic vocabulary, comprehension, speaking, writing, and content learning. Innovative policy

recommendations and professional development approaches are also presented.
