SWOT analysis of Netflix - Emmy Bethmann
2020-06-08

Seminar paper from the year 2018 in the subject Business economics - Offline Marketing and Online Marketing, grade: 1,0, University of Applied Sciences Hamburg (Hochschule Macromedia), course: Lehrprojekt 1, language: English, abstract: In this project thesis a SWOT analysis will be performed on the media company Netflix, Inc. Netflix is the world's leading internet entertainment service with over 109 million members in over 190 countries. It ranks place 28 in 2017's list of the top 100 world's largest media companies. The success of Netflix has increased constantly in recent years. The reason for this is the evolution of media consumption. The new generation watches series and movies on streaming platforms like Netflix and no longer on television. People have become more independent and can decide for themselves when and where they want to follow their series and movies. Netflix's influence grew in the past but the fight about the TV has not started yet. One day in the near future it will commence, and Netflix needs to be prepared for that. In this project thesis a detailed analysis of the strengths, weaknesses, opportunities and threats of Netflix will be conducted. The special challenge for Netflix is to have a good plan as soon as the cable TV programmes try to attack. Different possibilities of offering better and

more customer-oriented content will be analysed. Will Netflix eventually replace the traditional television as we know it and become the number one provider for streaming services? This project thesis will analyse the current situation and in the end a recommendation for Netflix' future will be given.

Information and Communication

Technologies - 2002-01-01

Knowledge is a fundamental driver of increased productivity and global competition. Information and communication technologies provide a foundation for building up and applying knowledge in private and public sectors.

Countries with information infrastructures that are well developed and that use innovative information technology applications, have advantages for sustained economic growth and social development. Developing countries face opportunity costs when delaying greater access to and use of information infrastructures and technologies. As these information and communication technologies are the centre of World Bank Strategic Directions Framework priorities, increasing the climate for investment and sustainable growth at the same time as empowering and investing in poor people. Implementing a strategy to support information

and communication technologies development in client countries is high on the World Bank Group agenda.

Strategic Decision Making. Debiasing, Nudging and SWOT Analysis - 2021-06-25

Essay from the year 2020 in the subject Business economics - Business Management, Corporate Governance, grade: 1,3, University of applied sciences Frankfurt a. M., course: Strategic Management, language: English, abstract: Decision making is part of the management process. Before making decisions, certain variables are assigned to the various possible alternatives to assess their advantages. However, our decisions are far from being as rational as we think, and as classical economic theory suggests. This fact has far-reaching consequences - not only for strategic business areas such as the finance function and the management consulting function. How decisions are made, how they can be improved, and the methods involved are described in this essay. The essay is divided into two main parts. The first part includes a theoretical discussion of the process of decision making and provides an introduction to the concept of different approaches of the decision-making process in light of economic theories. The second part reflects the strategic approach to decision-making. It will be explained how neuroscience can be used and how basic management tools can be exploited; these will be explained at the

example of the swot analysis. In the end, there will be a summary with a conclusion of this scientific essay.

Building Continents of Knowledge in Oceans of Data: The Future of Co-Created EHealth - A. Ugon 2018-05-18

The domain of eHealth faces ongoing challenges to deliver 21st century healthcare. Digitalization, capacity building and user engagement with truly interdisciplinary and cross-domain collaboration are just a few of the areas which must be addressed. This book presents 190 full papers from the Medical Informatics Europe (MIE 2018) conference, held in Gothenburg, Sweden, in April 2018. The MIE conferences aim to enable close interaction and networking between an international audience of academics, health professionals, patients and industry partners. The title of this year's conference is: Building Continents of Knowledge in Oceans of Data - The Future of Co-Created eHealth, and contributions cover a broad range of topics related to the digitalization of healthcare, citizen participation, data science, and changing health systems, addressed from the perspectives of citizens, patients and their families, healthcare professionals, service providers, developers and policy makers. The second part of the title in particular has attracted a large number of papers describing strategies to create, evaluate, adjust or deliver tools and services for improvements in healthcare organizations or to enable citizens to respond to the challenges of dealing with health systems. Papers are grouped under the headings: standards and interoperability, implementation and evaluation, knowledge management, decision support, modeling and analytics, health informatics education and learning systems, and patient-centered services. Attention is also given to development for sustainable use, educational strategies and workforce development, and the book will be of interest to both developers and practitioners of healthcare services.

The SWOT Analysis - Anja B. Hm 2009-09

Seminar paper from the year 2008 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,0, University of Applied Sciences Berlin, language: English, abstract: Marketing offers numerous valuable tools to analyze a company's current situation. Though, most of them have the weakness of providing only a very isolated view that is not suitable for a long-term entrepreneurial decision. The SWOT analysis, however, pursues an integrated approach including key company and environmental variables. The objective is the confrontation of the company's internal strengths and its weaknesses as well as company-external business opportunities and risks in order to generate possible strategic options. The SWOT analysis particularly supports a combined and integrated approach of the current company situation enabling well-balanced and comprehensive decisions. One main benefit is thus the reduction of complexity through the integrated approach, leaving the key factors and strategies as analytical residue. In practice, the SWOT method is a well established tool to analyze business units in larger companies and smaller start-ups in particular during their launch. The SWOT analysis though reveals limited possibilities when analyzing all business units of large companies. For this task other, more holistic, approaches as the shareholder-value concept or the portfolio analysis are appropriate. However, this large field of tools will not be treated in this assignment. The SWOT analysis is though, despite its disadvantages, one of the most important instruments for the internal analysis of a company's situation that - in every case - delivers a pretty comprehensive and resilient foundation for further entrepreneurial decisions and strategic

planning.

Global Corporate Strategy - A Critical Analysis and Evaluation of Amazon.com -

Miriam Mennen 2010-03-19

Essay from the year 2006 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 65 % - B, University of Sunderland (Faculty of Business and Law), course: Global Corporate Strategy, language: English, abstract: In the following, the Amazon.com case study will be critically analysed and evaluated. High emphasis will be put on the company's global business policies and strategies from its foundation in 1995 till now by examining the internal and the external environment. The online retailer followed a long-term strategy in order to fulfil its vision and values, incorporating global growth, diversification in product categories and building up the world's most customer-centric company. Furthermore, Amazon.com's strategic decision-making and problem solving processes will be carefully analysed and how it responds and copes with changes and difficulties arising from the business environment. This report outlines in the last step the future tendency and the future direction of the organisation by highlighting the strategic thinking behind a long-term approach. Concluding, recommendations will be given which focus on revising their strategy and applying scenario planning.

Ryan Watkins 2009-12-21

HANDBOOK of IMPROVING PERFORMANCE IN THE WORKPLACE Volume 2: Selecting and Implementing Performance Interventions In this groundbreaking volume, leading practitioners and scholars from around the world provide an authoritative review of the most up-to-date information available on performance interventions, all presented within a holistic framework that helps ensure the accomplishment of significant results. Addressing more than 30 performance interventions, with such varied topics as Incentive Systems, e-Learning, Succession Planning and Executive Coaching, this volume guides readers through the development of

comprehensive performance improvement systems. Each chapter illustrates in practical terms how to select, plan, implement, and manage performance interventions, as well as how to evaluate their results. Through best practices research, comparative analysis, illustrative case studies from around the world, and editorial guidance on how to link together diverse interventions, the handbook is an important guide for achieving desired results in the workplace and beyond. Sponsored by International Society for Performance Improvement (ISPI), the Handbook of Improving Performance in the Workplace, three-volume reference, covers three main areas of interest including Instructional Design and Training Delivery, Selecting and Implementing Performance Interventions, and Measurement and Evaluation.

Life Skills and Career Coaching for Teens - Nikki Giant 2019-05-21

Setting out a year-long curriculum based programme for education and youth professionals, this book provides a challenging and engaging workshop-based approach to developing school engagement and ambitions in young people aged 11-18. The programme, which is informed by CBT, helps professionals to understand barriers to young people's school engagement and learning. It outlines a case for a practical, well-rounded curriculum that readies students for life post-education through eight core themes, including 'believing in me', 'money matters' and 'business basics'. The second part of the book is a photocopiable manual for use in classroom settings, making this an essential, hands-on manual for nurturing young people's life skills.

Poverty in the Philippines - Asian Development Bank 2009-12-01

Against the backdrop of the global financial crisis and rising food, fuel, and commodity prices, addressing poverty and inequality in the Philippines remains a challenge. The proportion of households living below the official poverty line has declined slowly and unevenly in the past four decades, and poverty reduction has been much slower than in neighboring countries such as the People's Republic of China, Indonesia, Thailand, and Viet Nam. Economic growth has gone through boom and bust cycles, and recent

episodes of moderate economic expansion have had limited impact on the poor. Great inequality across income brackets, regions, and sectors, as well as unmanaged population growth, are considered some of the key factors constraining poverty reduction efforts. This publication analyzes the causes of poverty and recommends ways to accelerate poverty reduction and achieve more inclusive growth. It also provides an overview of current government responses, strategies, and achievements in the fight against poverty and identifies and prioritizes future needs and interventions. The analysis is based on current literature and the latest available data, including the 2006 Family Income and Expenditure Survey.

Strengthening Forensic Science in the United States - National Research Council
2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool

for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Swot Analysis - Idea, Methodology and a Practical Approach - Nadine Pahl 2009-04

Research Paper (undergraduate) from the year 2007 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,3, University of Applied Sciences Berlin, course: Marketing, language: English, abstract: Due to strong competition and a continuous market change, most companies engage in strategic planning today to become or stay competitive in the long run. Strategy is all-embracing. Strategy has to capture internal and external aspects, that means to comprise competencies and market opportunities. Strategy has to keep in view the own company, the customers and the competitors. The challenge is to create customer values and competitive advantages to assure benefits and growth. As a result, the starting point of every strategic decision demonstrates the recognition and the analysis of the company's current situation containing a high variety of parameters. These parameters are generally defined by the company's influence into internal and external parameters. However, the understanding of the company's situation is only defined in absolute by analysing parameters and its bilateral dependencies. Therefore, the combination of the company's internal factors and the external environmental circumstances presents the basis for the strategy development and the resulting organisational marketing goals and application of the marketing instruments.

The SWOT analysis is a strategic planning tool used to evaluate the Strengths, Weaknesses, Opportunities and Threats of a company. It provides information that is helpful in matching the company's resources and capabilities to the competitive environment in which it operates. The resulting SWOT matrix contrasts the results of the internal analysis (strengths and weakness) and the external analysis (opportunities and threats) to define strategic fields of action. That application of a SWOT analysis is therefore instrumental in strategy formulation and selection.

Kodak, Fight to Revive. SWOT Analysis and Strategy Plan - Jia Pan 2016-11-10

Seminar paper from the year 2012 in the subject Business economics - Business Management, Corporate Governance, University of Southern California, language: English, abstract: In this paper, we first use SWOT Analysis and Porter's five-force analysis to fully analyze Kodak's current position in the market. In addition, we discuss financial strategy, marketing strategy and several suggestions on the changing of company culture. Globalization and shifts in technology have changed the thinking of consumers. Digital cameras and cell phones have created a shift in the way most people take pictures and retrieve their photos. Kodak failed in reinventing the company's core business model successfully during the past few years. The growth of new core business didn't make up the effects of Kodak's fast-fading film revenues. Kodak is currently in serious financial trouble: quickly going through cash, selling patents and accessing credit lines. We are facing a difficult task in what can be considered one of the hardest financial times Kodak has ever been through.

Business Model Generation - Alexander Osterwalder 2013-02-01

Business Model Generation is a handbook for visionaries, game changers, and challengers striving to defy outmoded business models and design tomorrow's enterprises. If your organization needs to adapt to harsh new realities, but you don't yet have a strategy that will get you out in front of your competitors, you need Business Model Generation. Co-created by 470 "Business Model Canvas" practitioners from 45 countries, the book features a beautiful, highly visual, 4-color design that takes powerful strategic ideas and tools, and makes them easy to implement in your organization. It explains the most common Business Model patterns, based on concepts from leading business

thinkers, and helps you reinterpret them for your own context. You will learn how to systematically understand, design, and implement a game-changing business model--or analyze and renovate an old one. Along the way, you'll understand at a much deeper level your customers, distribution channels, partners, revenue streams, costs, and your core value proposition. Business Model Generation features practical innovation techniques used today by leading consultants and companies worldwide, including 3M, Ericsson, Capgemini, Deloitte, and others. Designed for doers, it is for those ready to abandon outmoded thinking and embrace new models of value creation: for executives, consultants, entrepreneurs, and leaders of all organizations. If you're ready to change the rules, you belong to "the business model generation!"
