The Devil Can Ride - Lee Klancher 2010-06-12

Authors such as Hunter Thompson, Robert Pirsig, and Mark Singer have written about the motorcycle, that icon for outlaws, rebels, thieves, and beat poets. This collection of motorcycle tales features the best of the vast collection of motorcycle writing created since old Gottlieb Daimler first bolted a crude internal-combustion engine to his wooden two-wheeled Einspur in 1876. In addition to essays from Thompson and Pirsig, *The Devil Can Ride* features works by Peter Egan, T.E. Lawrence, James Stevenson, Jamie Elvidge, John Hall, and Kevin Cameron.

Voice and Agency - Jeni Klugman 2014-09-29

Despite recent advances in important aspects of the lives of girls and women, pervasive challenges remain. These challenges reflect widespread deprivations and constraints and include epidemic levels of gender-based violence and discriminatory laws and norms that prevent women from owning property, being educated, and making meaningful decisions about their own lives--such as whether and when to marry or have children. These often violate their most basic rights and are magnified and multiplied by poverty and lack of education. This groundbreaking book distills vast data and hundreds of studies to shed new light on deprivations and constraints facing the voice and agency of women and girls worldwide, and on the associated costs for individuals, families, communities, and global development. The volume presents major new findings about the patterns of constraints and overlapping deprivations and focuses on several areas key to women's empowerment: freedom from violence, sexual and reproductive health and rights, ownership of land and housing, and voice and collective action. It highlights promising reforms and interventions from around the world and lays out an urgent agenda for governments, civil society, development agencies, and other stakeholders, including a call for greater investment in data and knowledge to benchmark progress.

Riding in the Zone - Ken Condon 2019-10-15

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. *Riding in the Zone* helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. *Riding in the Zone* takes riders to the next level in their skill set.

Terrace VI - Sarah L Johnson 2021-07-07

Welcome to the Sixth Terrace of Dante's tower of Purgatory, serving up sins of gluttony in an eternal banquet. On this carefully curated menu you'll find children stuffing themselves to death, a forgotten saviour gorging on cheeseburgers between bareknuckle rounds on the roadhouse circuit, wealthy socialites revel in an orgiastic alien feast, and the end of days as seen through an apocalyptic carnival of indulgence. Excessive consumption also manifests in darker hungers, for cruelty, for distraction, or possession. A pair of gifters bent on having it all chase a Scottish leprechaun across the English countryside, a newly deceased addict vies for the attention of Heavenly Higher Ups, degenerate poker players gamble with unforeseen currency, and when an old lady swallows a fly, it's just the beginning... Featuring nine stories of grotesque appetite and glorious excess from a gory gaggle of creators, they say too much of anything is poison, yet these condemned swallow each piece of forbidden fruit while reaching for the next, never to be sated. They can't help themselves. Can you? Stories and art by: Mike Thorn (Darkest Hours, Shelter for the Damned) Robin van Eck (Rough) Eddie Generous (Camp Summit, What Lurks Beneath, Behemoth Rising) Julie Hiner (Final Track) Konn Lavery (Mental Damnation Series, Rutherford Manor Series) Cam Hayden (Futility, Red Flag) Sarah L. Race Tech's Motorcycle Suspension Bible - Paul Thede 2010-06-19

Motorcycle Track Day Handbook - Kent Larson 2005

For years track days have been popular activities for European motorcyclists. In recent years it has become

a very popular activity in the U.S. as well. As traffic laws become increasingly draconian, roads become increasingly congested, and motorcycles become increasingly capable, more people are taking their bikes to race tracks. Currently there are a number of organizations catering to people who attend track days. But many people who want to ride on racetracks don't attend track days because they don't know how to prepare themselves or their motorcycles for the racetrack. This book will provide tell them everything they need to know to hit the racetrack: how to prepare their motorcycles, how to find organizations that sponsor track days, where to attend track days, specific information for the major racetracks in the United States, information on track schools around the country, and much, much more. About the Author Kent Larson, an accomplished racer and a control rider for NESBA, one of the country's leading track day organizations, contributed the chapter on track days to our high performance riding book Total Control. Larson lives in Woodbury, Minnesota.

Righteous Porkchop - Nicolette Hahn Niman 2010-10-19

Asked to head up Robert F. Kennedy Jr.'s environmental organization's "hog campaign," Nicolette Hahn Niman embarked upon a fascinating odyssey through the inner workings of the "factory farm" industry. What she discovered transformed her into an intrepid environmental lawyer determined to lock horns with the big business farming establishment. She even, unexpectedly, found love along the way. A searing account of an industry gone awry and one woman's passionate fight to remedy it, Righteous Porkchop chronicles Niman's investigation and her determination to organize a national reform movement to fight the shocking practices of industrial animal operations. She offers necessary alternatives, showing how livestock farming can be done in a better way—and she details both why and how to choose meat, poultry, dairy, eggs, and fish from traditionally farmed sources.

50 Risks to Take With Your Kids - Daisy Turnbull 2021-02-17

50 Risks to Take With Your Kids is a guide for parents and carers to nurture resilience and independence in kids as they learn to take their own risks. For anyone who wants to combat helicopter parenting and a bubble-wrapped generation, Daisy Turnbull offers an easy-to-use framework with simple, practical challenges for children aged up to 10 years old. In 50 Risks to Take With Your Kids, you'll find risks that build physical skills, social confidence and character development before kids enter those 'risky' teenage years. You'll also find some all-important parenting risks that will encourage you to step outside your comfort zone and think a little differently about raising children. It may sound counterintuitive to say that the more opportunities you give children to test boundaries, the better they will 'adult', but it's true. The more they are allowed to play in the mud, create games and find their own solutions to problems, the more they will thrive later in life. Peppered with Daisy's own experiences in teaching, wellbeing and parenting, this warm and funny book is not about developmental KPIs, and it's certainly not about judgement. It's about teaching kids to recognise and assess risks themselves, and readying them to take on life and all that it brings. And it's about having fun and connecting as a family along the way.

Mechanisms of antibiotic resistance - Jun Lin 2015-06-01

Antibiotics represent one of the most successful forms of therapy in medicine. But the efficiency of antibiotics is compromised by the growing number of antibiotic-resistant pathogens. Antibiotic resistance, which is implicated in elevated morbidity and mortality rates as well as in the increased treatment costs, is considered to be one of the major global public health threats (www.who.int/drugresistance/en/) and the magnitude of the problem recently prompted a number of international and national bodies to take actions to protect the public (http://ec.europa.eu/dgs/health_consumer/docs/road-map-amr_en.pdf:

http://www.who.int/drugresistance/amr_global_action_plan/en/;

http://www.whitehouse.gov/sites/default/files/docs/carb_national_strategy.pdf). Understanding the mechanisms by which bacteria successfully defend themselves against the antibiotic assault represent the main theme of this eBook published as a Research Topic in Frontiers in Microbiology, section of Antimicrobials, Resistance, and Chemotherapy. The articles in the eBook update the reader on various aspects and mechanisms of antibiotic resistance. A better understanding of these mechanisms should facilitate the development of means to potentiate the efficacy and increase the lifespan of antibiotics while

minimizing the emergence of antibiotic resistance among pathogens.
