Introduction to Controlled Vocabularies - Patricia Harpring 2010-04-13
This detailed book is a "how-to" guide to building controlled vocabulary tools, cataloging and indexing cultural materials with terms and names from controlled vocabularies, and using vocabularies in search engines and databases to enhance discovery and retrieval online. Also covered are the following: What are controlled vocabularies and why are they useful? Which vocabularies exist for cataloging art and cultural objects? How should they be integrated in a cataloging system? How should they be used for indexing and for retrieval? How should an institution construct a local authority file? The links in a controlled vocabulary ensure that relationships are defined and maintained for both cataloging and retrieval, clarifying whether a rose window and a Catherine wheel are the same thing, or how pot-metal glass is related to the more general term stained glass. The book provides organizations and individuals with a practical tool for creating and implementing vocabularies as reference tools,

sources of documentation, and powerful enhancements for online searching.

Natural Language Processing with Python - Steven Bird 2009-06-12
This book offers a highly accessible introduction to natural language processing, the field that supports a variety of language technologies, from predictive text and email filtering to automatic summarization and translation. With it, you'll learn how to write Python programs that work with large collections of unstructured text. You'll access richly annotated datasets using a comprehensive range of linguistic data structures, and you'll understand the main algorithms for analyzing the content and structure of written communication. Packed with examples and exercises, Natural Language Processing with Python will help you: Extract information from unstructured text, either to guess the topic or identify "named entities" Analyze linguistic structure in text, including parsing and semantic analysis Access popular linguistic databases, including WordNet and treebanks Integrate techniques drawn from fields as diverse as linguistics and artificial intelligence This book will help you gain practical skills in natural language processing using the Python programming language and the Natural Language Toolkit (NLTK) open source library. If you're interested in developing web applications, analyzing multilingual news sources, or documenting endangered languages -- or if you're simply curious to have a programmer's perspective on how human language works -- you'll find Natural Language Processing with Python both fascinating and immensely useful.

Quick Word Attack for Older Students -

A Cheesemonger's History of The British Isles - Ned Palmer 2019-10-24
THE TOP 10 SUNDAY TIMES BESTSELLER Shortlisted for the André Simon Food and

Drink Book Awards for 2019 'A beautifully textured tour around the cheeseboard' Simon Garfield 'Full of flavour' Sunday Times 'A delightful and informative romp' Bee Wilson, Guardian 'His encounters with modern-day practitioners fizz with infectious delight' John Walsh, Sunday Times Every cheese tells a story. Whether it's a fresh young goat's cheese or a big, beefy eighteen-month-old Cheddar, each variety holds the history of the people who first made it, from the builders of Stonehenge to medieval monks, from the Stilton-makers of the eighteenth-century to the factory cheesemakers of the Second World War. Cheesemonger Ned Palmer takes us on a delicious journey across Britain and Ireland and through time to uncover the histories of beloved old favourites like Cheddar and Wensleydale and fresh innovations like the Irish Cashel Blue or the rambunctious Renegade Monk. Along the way we learn the craft and culture of cheesemaking from the eccentric and engaging characters who have revived and reinvented farmhouse and artisan traditions. And we get to know the major cheese styles - the blues, washed rinds, semi-softs and, unique to the British Isles, the territorials - and discover how best to enjoy them, on a cheeseboard with a glass of Riesling, or as a Welsh rarebit alongside a pint of Pale Ale. This is a cheesemonger's odyssey, a celebration of history, innovation and taste - and the book all cheese and history lovers will want to devour this Christmas.

Word Search on the Flip Side - Mark Danna 2007
Search and solve—with nearly 160 puzzles here, there's plenty of brain-stimulating pleasure to be had! Each one of these entertaining word searches focuses on a particular subject, with many arranged in a shape suitable to the topic. For example, "Hitting Below the Belt" looks like a pair of shorts, and the words refer to things worn at or below the waist, like

swimming trunks and skirt. The shamrock-shaped "Greenery Scenery" goes green with mint, moss, and Kermit the Frog. And "Things to Do While Sitting" includes fly a plane and check e-mail. All the puzzles contain a word list to guide you as you look, as well as the answers if there are a few you can't find.

Building Vocabulary: Level 2 Kit - Timothy Rasinski, Nancy Padak, Rick M. Newton, and Evangeline Newton 2009-08-31 Building Vocabulary provides a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Over 90% of English words of two or more syllables are of Greek or Latin origin. Instead of learning words and definitions in isolation, students learn key roots and strategies for deciphering words and their meanings across all content areas. Building Vocabulary: Foundations for grades 1-2, empowers beginning readers to learn words by identifying word parts or word families that share common sounds.

Students will build vocabulary through the use of poetry, word endings, and simple roots. Building Vocabulary: Foundations: Level 2 kit includes: Teacher's Guide; Student Guided Practice Book (Each kit includes a single copy; additional copies may be ordered in quantities of 10 or more); Assessments to support data-driven instruction; and Digital resources including modeled lessons, 50 bonus activities, and more.

Parenting Matters - National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€"which includes all primary caregiversâ€"are at the foundation of children's well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S.

population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

American ITalk - Doris L. Murray 2011-09
In the English language, there are six vowels (fifteen sounds) and twenty-one double vowels and their sounds (known as 'hyper-vowels'). That means there are at least thirty-six vowel sounds! American iTalk with Hyper-Vowels deals with this by teaching a few simple rules that enable students to recognize and properly pronounce these sounds, greatly reducing accent and increasing English proficiency. All of the methods included in the text have been tried, tested, and found to be successful. American iTalk is the work of many years and is now being made available for those interested in using it as a text to effectively teach or learn English.

Cochrane Handbook for Systematic Reviews of Interventions - Julian P. T. Higgins 2008-11-24 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.
