*Motocross Saved My Life* - Brent Worrall  
2019-10-18

In 2011, former Canadian national champion motocross racer Brent (Airmail) Worrall, who had recently returned to the sport after a lengthy absence due to struggles with alcohol, gambling, and depression, was again in a fight to save his own life. His shot at redemption and making peace with the sport he loves was cut short by a near-fatal crash. A mechanical malfunction in mid-flight over the track's largest jump sent him spiralling into a nose dive. He had just enough time while airborne to say, "Survive, survive, survive." He broke his back and neck in six places, fractured his clavicle, sternum, and multiple ribs and collapsed his lungs. After flat-lining on the operating table four times, Brent's doctors finally managed to stabilize him. He required two blood transfusions, and his doctors

feared the worst. He emerged from hospital a paraplegic, given only five to ten years to live due to various complications from his accident. After losing the sport he loved many years before to the seedy underworld of depression, alcoholism, drugs, and compulsive gambling, he vowed never to let go of his lifeline passion again. Brent meticulously takes us through his troubled journey to the eventual promised land where he now sits. Along the way, he recounts his many inspirational interactions with those who helped mould his character, including Rick Hansen on his Man in Motion tour as well as looking into Terry Fox's eyes on his Marathon of Hope. In keeping with his character as an avid sports and history enthusiast, Brent takes us back through many pertinent historical events that shaped his life and society as a whole. Two years after his accident, Brent was back at the track, this time to announce races rather than participate in them. Shortly after that, he launched the Canadian Moto Show, a live online

talk-radio show, as well as a magazine, with his good friend Kevin Lefebvre. Throughout the process of giving back to the motocross community while also reinventing himself, he maintained a position as a senior writer at Motocross Performance Magazine. In 2016, he was nominated for a Coast Mental Health Courage to Come Back award. He continues to reshape his life within the sport he loves, refusing to let any of the formidable obstacles he has faced slow him down. This book is Brent's firsthand account of his journey, written in all five senses, with the hope that his story will motivate and inspire others to see that any seemingly insurmountable obstacles can be overcome.

**Race Tech's Motorcycle Suspension Bible -**

Paul Thede 2010-06-19

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides

detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Maintenance, Safety, Risk, Management and Life-Cycle Performance of Bridges - Nigel

Powers 2018-07-04

Maintenance, Safety, Risk, Management and Life-Cycle Performance of Bridges contains lectures and papers presented at the Ninth International Conference on Bridge Maintenance, Safety and Management (IABMAS 2018), held in Melbourne, Australia, 9-13 July 2018. This volume consists of a book of extended abstracts and a USB card containing the full papers of 393 contributions presented at IABMAS 2018, including the T.Y. Lin Lecture, 10 Keynote Lectures, and 382 technical papers from 40 countries. The contributions presented at IABMAS 2018 deal with the state of the art as

well as emerging concepts and innovative applications related to the main aspects of bridge maintenance, safety, risk, management and life-cycle performance. Major topics include: new design methods, bridge codes, heavy vehicle and load models, bridge management systems, prediction of future traffic models, service life prediction, residual service life, sustainability and life-cycle assessments, maintenance strategies, bridge diagnostics, health monitoring, non-destructive testing, field testing, safety and serviceability, assessment and evaluation, damage identification, deterioration modelling, repair and retrofitting strategies, bridge reliability, fatigue and corrosion, extreme loads, advanced experimental simulations, and advanced computer simulations, among others. This volume provides both an up-to-date overview of the field of bridge engineering and significant contributions to the process of more rational decision-making on bridge maintenance, safety, risk, management

and life-cycle performance of bridges for the purpose of enhancing the welfare of society. The Editors hope that these Proceedings will serve as a valuable reference to all concerned with bridge structure and infrastructure systems, including students, researchers and engineers from all areas of bridge engineering.

*Rotator Cuff Across the Life Span* - Andreas B. Imhoff 2019-04-27

This book presents the consensus findings of the ISAKOS Shoulder Committee regarding the treatment options in patients suffering from shoulder pain and reduced function or dead arm syndrome as a consequence of rotator cuff injuries. The aim is twofold: to equip readers with a precise knowledge of the presenting characteristics of these injuries in different age groups and to describe in detail the initial management and surgical and non-surgical approaches, taking into account the age-specific features. Readers will find clear descriptions of

all the latest arthroscopic techniques, which allow repair of even the largest tears. The indications for and performance of tendon transfer procedures, biceps tenotomy, tenodesis, hemiarthroplasty, anatomic shoulder arthroplasty, reverse total shoulder arthroplasty, and revision surgery are explained. Helpful guidance is also provided on the use of strategies to promote rotator cuff healing, including stem cell therapy and scaffolds. The authors are leading experts in the field, and the book will be of value for all shoulder surgeons and orthopaedic trainees and consultants, as well as sports medicine specialists.
