Terrace VI - Sarah L Johnson 2021-07-07

Welcome to the Sixth Terrace of Dante's tower of Purgatory, serving up sins of gluttony in an eternal banquet. On this carefully curated menu you'll find children stuffing themselves to death, a forgotten saviour gorging on cheeseburgers between bareknuckle rounds on the roadhouse circuit, wealthy socialites revel in an orgiastic alien feast, and the end of days as seen through an apocalyptic carnival of indulgence. Excessive consumption also manifests in darker hungers, for cruelty, for distraction, or possession. A pair of grifters bent on having it all chase a Scottish leprechaun across the English countryside, a newly deceased addict vies for the attention of Heavenly Higher Ups, degenerate poker players gamble with unforeseen currency, and when an old lady swallows a fly, it's just the beginning... Featuring nine stories of grotesque appetite and glorious excess from a gory gaggle of creators, they say too much of anything is poison, yet these condemned swallow each piece of forbidden fruit while reaching for the next, never to be sated. They can't help themselves. Can you? Stories and art by: Mike Thorn (Darkest Hours, Shelter for the Damned) Robin van Eck (Rough) Eddie Generous (Camp Summit, What Lurks Beneath, Behemoth Rising) Julie Hiner (Final Track) Konn Lavery (Mental Damnation Series, Rutherford Manor Series) Cam Hayden (Futility, Red Flag) Sarah L. Johnson (Suicide Stitch, Infractus) Robert Bose (Fishing with the Devil)

Cherry Seed - Derya Edis 2021-08-11

It all started with Ayşe adopting the seed from one of the cherries she ate. Ayşe named it Seed Lili. The cherry seed was overjoyed and felt special when she got the name Lili. Now everyone would call her Lili, she

would be known everywhere by that name. Ayşe kissed and loved her seed every day, and when the time came, she entrusted it to the bosom of the earth... As Seed Lili went from state to state to transform into a tree; loving, caring, and patience were necessary. This wonderful story of Mümine Yıldız and her little daughter Ayşe fills the hearts with crimson cherries... It invites us to a wonderful journey of discovery on endeavor, patience, love, friendship, fidelity and love of nature...

Kern's Process Heat Transfer - Ann Marie Flynn 2019-05-16

This book insures the legacy of the original 1950 classic, Process Heat Transfer, by Donald Q. Kern. This second edition book is divided into three parts: Fundamental Principles; Heat Exchangers; and Other Heat Transfer Equipment/ Considerations. - Part I provides a series of chapters concerned with introductory topics that are required when solving heat transfer problems. This part of the book deals with topics such as steady-state heat conduction, unsteady-state conduction, forced convection, free convection, and radiation. - Part II is considered by the authors to be the "meat" of the book - addressing heat transfer equipment design procedures and applications. In addition to providing a more meaningful treatment of the various types of heat exchangers, this part also examines the impact of entropy calculations on exchanger design. - Part III of the book examines other related topics of interest, including boiling and condensation, refrigeration and cryogenics, boilers, cooling towers and quenchers, batch and unsteady-state processes, health & safety and the accompanying topic of risk. An Appendix is also included. What is new in the 2nd edition Changes that are addressed in the 2nd edition so that Kern's original work continues to remain relevant in 21st century process engineering include: - Updated Heat Exchanger Design - Increased Number of Illustrative Examples - Energy Conservation/ Entropy Considerations - Environmental Considerations - Health & Safety - Risk Assessment - Refrigeration and Cryogenics - Inclusion of SI Units

Democratization of Expertise - Ron Fulbright 2020-10-27

We create technology enabling us to do things never before possible and it ultimately changes the way we live, work, play, and interact with each other. Throughout human history, the democratization of technology making a technology available to the masses, has brought about sweeping cultural, social, political, and societal changes. In the last half-century, the democratization of computers, information, the Internet, and social media have revolutionized and transformed our lives. We now stand at the beginning of a new era sure to bring about waves of new revolutions, the cognitive systems era. Until now, humans have done all of the thinking. However, our lives are about to be infused with artificial entities capable of performing high-level cognitive processing previously possible only in the human mind. Systems capable of this kind of "synthetic cognition" will achieve and surpass the level of human experts in almost every field of endeavor. Far from replacing humans, these cognitive systems will be our collaborators, teachers, confidants, colleagues, and companions. The future will belong to those who can better partner with these cognitive systems. Made available to the average person via the Internet, handheld devices, and through ordinary objects all around us, expertise will become democratized. Everything

will change when anyone has access to expertise in any field and new things will be possible. The democratization of expertise is the foundation on which our society's revolutions will be built over the next half-century. This book discusses societal and cultural revolutions throughout history brought about by the adoption of new technology and gives brief histories of human cognitive augmentation and artificial intelligence. In the coming cognitive systems era, humans, by collaboratively partnering with cognitive systems, will together achieve expert-level performance—synthetic expertise—with humans performing some of the cognitive processing and cognitive systems performing some. As the capabilities of cognitive systems improve over time, the balance of thinking will shift from being mostly human to mostly artificial. This book introduces the Levels of Cognitive Augmentation to describe this shift. Drawing from previous research in cognitive systems and intelligent agent theory, the knowledge stores required for expertise are identified in a Knowledge Level description of expertise. This book introduces a new abstract level, called the Expertise Level to describe the skills needed for expertise. Combining the knowledge-level and expertise-level descriptions, this book introduces the Model of Expertise. This book demonstrates use of the Model of Expertise by presenting several synthetic expert architectures: a synthetic teacher (Synthia), a synthetic friend/therapist (Sy), a synthetic elderly companion (Lois), a synthetic research companion (Synclair), and an automated scientific hypothesis explorer (Ashe). This book is intended for anyone interested in the fields of cognitive systems, cognitive computing, cognitive augmentation, or artificial intelligence or the impact of technologies from these fields on society. Anyone doing research and development in the area of cognitive systems or artificial intelligence will find this book particularly useful.

Marginalised Communities in Higher Education - Neil Harrison 2021

"Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--

Estimating Market Value and Establishing Market Rent at Small Airports - Aviation Management Consulting Group, Inc 2020

"Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development."--Foreword.
