The Biotechnology Act in Norway, one of the most restrictive in Europe, forbids egg donation and surrogacy and has rescinded the anonymity clause with respect to donor insemination. Thus, it limits people's choice as to how they can procreate within the boundaries of the nation state. The author pursues this significant datum ethnographically and addresses the issues surrounding contemporary biopolitics in Norway. This involves investigating such fundamental questions as the relation between individual and society, meanings of kinship and relatedness, the moral status of the embryo and the role of science, religion and ethics in state policies. Even though the book takes reproductive technologies as its focus, it reveals much about vital processes that are central to contemporary Norwegian society.

A Language Management Approach to Language Problems - Goro Christoph Kimura 2020-05-20

In recent years there has been increased interest in examining the treatment of language problems across different levels of society, ranging from individual interactional issues to language policy and planning at the national or supra-national level. Among the various approaches to tackle this issue, Language Management Theory (LMT) provides a framework to address behaviour towards language problems on different levels explicitly and comprehensively. Using LMT as a unifying theoretical concept, the chapters in this volume examine the links between micro and macro dimensions in their analyses of a variety of language problems in Asian and European contexts. This body of work illustrates that the LMT framework is able to show the characteristics of different dimensions clearly, especially when combined with a conceptualization of the micro and macro as a continuum of intertwining elements. This volume will appeal both to those interested in language policy and planning as well as those interested in interaction between speakers from different language backgrounds.

Banking on Failure - Richard S Collier 2020-09-01

Banks seem all too often involved in cases of misconduct, particularly involving the exploitation of tax systems. *Banking on Failure* explains why and how banks "game the system", accounting for these misconduct cases and analysing the wider implications for financial markets and tax systems. *Banking on Failure: Cum-Ex and Why and How Banks Game the System* explains why banks design and use structured products to exploit tax systems. It describes one of the biggest and most complex cases - the "cum-ex" scandal - in which hundreds of banks and funds from across the globe participated in the raid on the public exchequers of a number of countries, with losses in the tens of billions of euros. The book then draws on the significance of this case study, and what this tells us about modern banks and their interactions with tax systems. *Banking on Failure* demonstrates why the exploitation of tax systems by banks is an inevitable feature of the financial markets landscape, and suggests possible responses.

Criminal Law - Markus Dubber 2014-03-28

Criminal Law: A Comparative Approach presents a systematic and comprehensive analysis of the substantive criminal law of two major jurisdictions: the United States and Germany. Presupposing no familiarity with either U.S. or German criminal law, the book will provide criminal law scholars and students with a rich comparative understanding of criminal law's foundations and central doctrines. All foreign-language sources have been translated into English; cases and materials are accompanied by heavily cross-referenced introductions and notes that place them within the framework of each country's criminal law system and highlight issues ripe for comparative analysis. Divided into three parts, the book covers foundational issues - such as constitutional limits on the criminal law - before tackling the major features of the general part of the criminal law and a selection of offences in the special part. Throughout, readers are exposed to alternative approaches to familiar problems in criminal law, and as a result will have a chance to see a given country's criminal law doctrine, on specific issues and in general, from the critical distance of comparative analysis.

Institutional Banking for Emerging Markets - Wei-Xin Huang 2007-04-04

In today's competitive banking industry, institutional banking is attracting greater interest. Under the globalization umbrella, inter-bank business is undergoing dynamic change and is transcending the boundaries of traditional correspondent banking. In today's climate, no bank, regardless of size, can grow without the cooperation of other banks and no bank can hope to survive and prosper without utilizing emerging markets. Institutional banking in emerging countries has some unique functions: for example, problem solving is heavier and more crucial in emerging markets than in developed countries, given the irregularity of the market and non-transparency of the financial/legal systems. Moreover, it is particularly necessary to forge good relationships, day-to-day contact and personal communication, to provide better chances for product marketing and risk management. Products are therefore tailor-made and adapted as the situation dictates, a successful lesson for one case in one country cannot necessarily be repeated in another. Huang provides a systematic framework for the subject combining both principles and practice. The direct experience of the author, allows him to write authoritatively about the subject with academic vigour as well as a large amount of practical knowledge which only a practitioner can provide. The book contains numerous real life examples and case studies to allow the reader an insight into how Institutional Banking actually works in the real world. The book also contains a supplementary CD which includes chapter summary's and further information. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.
