*The Land in Our Hands - Burley-Demeritt Farm in Lee, NH: Its History* - Martha Butterfield 2016-02-16

The story of the Burley-Demeritt Farm in Lee, NH spans over 250 years and is told in six sections with over 260 photos and illustrations. The farm was owned by seven generations of the Burley, Furber and Demeritt families before it was purchased by the University of New Hampshire in 1969 and is now operated by UNH as an organic dairy farm. Part I covers its history, dating back to the early 1700's. Parts II and III feature 86 short stories about Della Demeritt's memories of growing up on the Farm in the early 20th century and her children's remembrances of living there in the 1940's. Part IV covers UNH's continuing involvement with the Farm's operation and ongoing efforts by the surrounding community to restore the deteriorating farmhouse. Part V provides a brief section on the genealogy of the three families connected with the Farm's history. Part VI describes the history of the Burley-Demeritt Farmhouse, including a layout of its rooms with numerous photos of its interior as it existed in 2010.

[Explorer's Guide Connecticut](#) - Barnett D. Laschever 2009-05-18

A comprehensive guide to lodging, dining, shopping, crafts, resorts, outdoor recreation, and museums in Connecticut.

**Turn-of-the-Century Farm Tools and Implements** - Peter Henderson & Co 2002-08-26

Published in 1898, this abundantly illustrated trade catalog advertised tools, fertilizers, insecticides, and other essentials for the turn-of-the-century garden, farm, greenhouse, lawn, orchard, poultry yard, stable, and household. Includes butter printers, cast-iron field rollers, broadcast seeders, corn harvesters and huskers, root cutters, cider mills, veterinary remedies, and more. Approximately 680 black-and-white illustrations.

**Explorer's Guide Connecticut (Eighth Edition)** - Andi Marie Cantele 2012-03-05

"Comprehensive . . . well organized . . . should be carried in every glove compartment of every car that traverses Connecticut highways."—Journal Inquirer, Manchester, Connecticut Welcomed and praised by newspapers across the state, Explorer's Guide Connecticut gives visitors and residents alike detailed descriptions of attractions and little-known tips about the Nutmeg State. Veteran travel writers Barnett Laschever and Andi Marie Cantele again bring you authoritative advice on what to see, where to eat, and where to stay in the new edition of this trusted guide. Covering the state from the mountains in the north to the long and varied coastline in the south, from cities to backroads, this revised and expanded edition features extensive descriptions and detailed maps to guide readers effortlessly along many pleasant journeys for individual travelers and families. Historic and exciting Mystic Seaport, the rich collections of the Yale University museums, beach and skiing trips, and the many state forests and parks of Connecticut are just a handful of the attractions covered. Regional and downtown maps feature helpful icons and indicate places that are wheelchair-accessible, pet- and family-friendly, and of other special value. Features include: an alphabetical "What's Where" subject guide to aid in trip plan; regional

and downtown maps; handy icons that point out family-friendly attractions, wheelchair access, special value, and lodgings that accept pets.

[Forest cover changes and landscape sustainability - a retrospective study in cultural borderland](#) - Jan Marek Matuszkiewicz 2020-12-22

[Old Farm Tools and Machinery](#) - Percy W. Blandford 1976

Furnishes a detailed portrait of farm life from its beginnings to modern automation

*Turn-of-the-Century Farm Tools and Implements* - Henderson & Co. 2013-09-26

Nearly 700 illustrations advertise items for garden, farm, lawn, stable, household, and more, including butter printers, cast-iron field rollers, broadcast seeders, corn harvesters and huskers, root cutters, cider mills, veterinary remedies, and more.

**Farm Size and the Organization of U.S. Crop Farming** - James M MacDonald 2014-04-02

Cropland has been shifting to larger farms. The shifts have been large, centered on a doubling of farm size over 20-25 years, and they have been ubiquitous across States and commodities. But the shifts have also been complex, with land and production shifting primarily from mid-size commercial farming operations to larger farms, while the count of very small farms increases. Larger crop farms still realize better financial returns, on average, and they are able to make more intensive use of their labor and capital resources, indicating that the trends are likely to continue. The report relies on comprehensive farm-level data to detail changes in farm size and other attributes of farm structure, and to evaluate the key driving forces, including technologies, farm organization and business relationships, land attributes, and government policies.

**Handy Farm Equipment and How to Use It** - Harry C. Ramsower 2014-01-02

This classic guide presents practical information on virtually every aspect of farm equipment, machinery, and organization. Originally published in 1917, Handy Farm Equipment and How to Use It surveys every topic of importance to the challenge of equipping a successful and fully functional farm, including lighting the farm home, establishing sources of water, and arranging for sewage disposal for the farmhouse. Additional sections provide detailed discussions of such indispensable examples of farm equipment as tillage tools, seeding machinery, manure spreaders, grain binders, and corn harvesters. Fully illustrated throughout with drawings, diagrams, plans, and photographs, Handy Farm Equipment and How to Use It will prove as interesting to the current farmer for its still-prudent advice on the timeless problems of farm management as it will to the history buff who wishes to catch an image of what the American farm was like at the beginning of the twentieth century. It provides a lovely foray into the rich legacy of American agriculture and will appeal to anyone who has ever been interested in the nuts-and-bolts of farm life.

**The Agricultural Revolution of the 20th Century** - Don Paarlberg 2001-06-26

A book for a varied audience: college students of agriculture and sociology; high school students of vocation agriculture; members of the American Agricultural Economics Association; people with a long-standing background in agriculture; and other readers interested in 20th century agriculture. The book reads like a story and is supplemented with excellent photographs, contrasting past practices with modern technology.

**On the Causes of Economic Growth** - Carlos Sabillon 2008

In a sweeping review of economic history, the author presents the salient facts of booms and slowdowns in the major economies of the world, in

50-year intervals and demonstrates the weakness of orthodox theories. The only factor that consistently causes growth, he shows, is centralized support for manufacturing, which spurs the creation of new technologies, which lead to wealth creation. Since the earliest of times, human beings have endeavored to uncover the causes of prosperity. Step by step, Sabillon tests the principal theories on the causes of economic growth against the facts of history. Here, economic statistics of the world are presented in a rationalized format that allows for comparison across countries and through time, with a challenge to those who study them to determine, with an open mind, what the statistics show and what are the trends -- beyond cherished theories that suit various political purposes. Tested against the historical data, textbook ideas and theories consistently come up short. Such analyses are highly troubling because they reveal an absence of correlation between theory and reality. The data, statistics illustrating the development of the world economy during the last several centuries, were extracted from economic, history and economic history books, from publications of the World Bank, the Organization for Economic Cooperation and Development, the International Monetary Fund, the World Trade Organization, the United Nations specialized agencies, research institutes and country statistical publications, and other books and journals. Analyzing the data over geography and time, Sabillon concludes that contrary to contemporary wisdom, left to market forces alone the economy will not and does not flourish. Only decisive intervention in support of manufacturing and technological advancement can provide growth. This systematic review of history and test of accepted dogma challenges economic theorists to consider one part of the equation of economic policy that has been wiped off the blackboard in today's politically-correct debates.

**Careers in Focus** - Ferguson 2010-05-19

Careers in Focus: Mechanics, Third Edition covers 20 updated job profiles from this extensive field. Job profiles include: Aircraft mechanics Biomedical equipment technicians Diesel mechanics Instrumentat

*The Canadian Encyclopedia* - James H. Marsh 1999

This edition of "The Canadian Encyclopedia is the largest, most comprehensive book ever published in Canada for the general reader. It is COMPLETE: every aspect of Canada, from its rock formations to its rock bands, is represented here. It is UNABRIDGED: all of the information in the four red volumes of the famous 1988 edition is contained here in this single volume. It has been EXPANDED: since 1988 teams of researchers have been diligently fleshing out old entries and recording new ones; as a result, the text from 1988 has grown by 50% to over 4,000,000 words. It has been UPDATED: the researchers and contributors worked hard to make the information as current as possible. Other words apply to this extraordinary work of scholarship: AUTHORITATIVE, RELIABLE and READABLE. Every entry is compiled by an expert. Equally important, every entry is written for a Canadian reader, from the Canadian point of view. The finished work - many years in the making, and the equivalent of forty average-sized books - is an extraordinary storehouse of information about our country. This book deserves pride of place on the bookshelf in every Canadian Home. It is no accident that the cover of this book is based on the Canadian flag. For the proud truth is that this volume represents a great national achievement. From its formal inception in 1979, this encyclopedia has always represented a vote of faith in Canada; in Canada as a separate place whose natural worlds and whose peoples and their achievements deserve to be recorded and celebrated. At the start of a new century and a new millennium, in an increasingly borderless corporate world that seems ever more hostile to national distinctions and aspirations, this "Canadian Encyclopedia is offered in a spirit of defiance and of faith in our future. The statistics behind this volume are staggering. The opening sixty pages list the 250 Consultants, the roughly 4,000 Contributors (all experts in the field they describe) and the scores of researchers, editors, typesetters, proofreaders and others who contributed their skills to this massive project. The 2,640 pages incorporate over 10,000 articles and over 4,000,000 words, making it the largest - some might say the greatest - Canadian book ever published. There are, of course, many special features. These include a map of Canada, a special page comparing the key statistics of the 23 major Canadian cities, maps of our cities, a variety of tables and photographs, and finely detailed illustrations of our wildlife, not to mention the colourful, informative endpapers. But above all the book is "encyclopedic" - which the "Canadian Oxford Dictionary describes as "embracing all branches of learning." This means that (with rare exceptions) there is satisfaction for the reader who seeks information on any Canadian subject. From the

first entry "A mari usque ad mare - "from sea to sea" (which is Canada's motto, and a good description of this volume's range) to the "Zouaves (who mustered in Quebec to fight for the beleaguered Papacy) there is the required summary of information, clearly and accurately presented. For the browser the constant variety of entries and the lure of regular cross-references will provide hours of fascination. The word "encyclopedia" derives from Greek expressions alluding to a grand "circle of knowledge." Our knowledge has expanded immeasurably since the time that one mind could encompass all that was known. Yet now Canada's finest scientists, academics and specialists have distilled their knowledge of our country between the covers of one volume. The result is a book for every Canadian who values learning, and values Canada.

**Directory of Museums** - Kenneth Hudson 1975-06-18

**Travel Historic Rural America** - Sam Rosenberg 1982

The Archaeometallurgy of the Asian Old World - Vincent C. Pigott 1999  
Written by eminent scholars in the field, this edited volume is the first to treat in a comprehensive manner the archaeology of metallurgy's origins, focusing specifically on initial uses of copper and bronze, as well as the coming of iron across Asia from the Eastern Mediterranean to the Far East. It is a volume that should serve for some time to come as the source of the fundamental information upon which larger interpretations of metallurgical developments in Asia will be grounded. MASCA research papers, Vol. 16 University Museum Monograph, 89

*Problems of Plenty* - R. Douglas Hurt 2002

A compact narrative history of American agriculture over the last century, emphasizing the farmer's growing reliance on the federal government.

**Improving Data Collection and Measurement of Complex Farms** - National Academies of Sciences, Engineering, and Medicine 2019-02-21  
America's farms and farmers are integral to the U.S. economy and, more broadly, to the nation's social and cultural fabric. A healthy agricultural sector helps ensure a safe and reliable food supply, improves energy security, and contributes to employment and economic development, traditionally in small towns and rural areas where farming serves as a nexus for related sectors from farm machinery manufacturing to food processing. The agricultural sector also plays a role in the nation's overall economic growth by providing crucial raw inputs for the production of a wide range of goods and services, including many that generate substantial export value. If the agricultural sector is to be accurately understood and the policies that affect its functioning are to remain well informed, the statistical system's data collection programs must be periodically revisited to ensure they are keeping up with current realities. This report reviews current information and makes recommendations to the U.S. Department of Agriculture's (USDA's) National Agricultural Statistics Service (NASS) and Economic Research Service (ERS) to help identify effective methods for collecting data and reporting information about American agriculture, given increased complexity and other changes in farm business structure in recent decades.

*Steam Cultivating Machinery* - John Fowler & Company, Ltd 1909

Farm Tools & Implements Before 1850 - Robert C. Bailey 1973

**Mothers and Daughters of Invention** - Autumn Stanley 1995  
Stanley traces women's inventions in five vital areas of technology worldwide--agriculture, medicine, reproduction, machines, and computers.

Bloomingtondale's Illustrated 1886 Catalog - Bloomingtondale Brothers 2013-07-25

Famed merchants' extremely rare catalog depicting about 1,700 products: clothing, housewares, firearms, dry goods, jewelry, and more. Invaluable for dating and identifying vintage items. Also, royalty-free graphics for artists and designers. Co-published with Henry Ford Museum & Greenfield Village.

**Bodmin Moor: An archaeological survey: Volume 2** - Peter Herring 2014-06-30

Bodmin Moor is an upland landscape, heavily protected, farmed extensively and with an increasingly light touch, and enjoyed by many as a retreat from busier modern worlds. But it is also a place of industry and the home of busy agricultural communities. Well-preserved remains of streamworking, mining, quarrying, clay working, turf cutting and more intensive farming were subjected to archaeological survey and historical research as part of the wider-ranging survey partly covered in the first

volume (on prehistoric and medieval landscapes). Supplementing the survey text are aerial photographs and detailed line drawings, mainly plans and elevations, but also reconstructions of sites and schematic representations of processes as well as large-scale maps of key areas

**Handbook of Energy for World Agriculture** - B.A. Stout 2012-12-02

Adequate food supplies and a reasonable quality of life require energy - both in commercial and non-commercial forms. This handbook is intended as a reference for individuals who want a comprehensive overview of energy for agriculture, many of whom are located in remote areas with limited library resources. The purpose is to put energy for agriculture in perspective by presenting numerous national and regional examples of energy usage. Since the early 1970s, world petroleum prices have fluctuated from US&dollar;3/barrel to more than US&dollar;40/barrel in 1981, and then back to one-third of the peak price today. Consequently, the rural sector depends heavily on non-commercial energy sources. Availability of such energy is highly site-specific. This handbook deals extensively with non-commercial energy - its sources, the technologies for converting energy to more useful gaseous and liquid forms, and its ultimate end-uses. Photographs, tables, line drawings and graphs are used extensively. Over 600 references are listed along with agency names and addresses for obtaining further information.

**Farm Implement News** - 1885

*American Farm Tools* - R. Douglas Hurt 1982

**Directory of Historic House Museums in the United States** -

Patricia Chambers Walker 2000

The Directory of Historic House Museums in the United States is the first comprehensive guide to America's historic house museums. This directory moves beyond merely listing institutions to provide information about interpretive themes, historical and architectural significance, collections, and cultural and social importance, along with programming events and facility information. Useful cross-reference guides provide quick and easy ways of locating information. This multi-functional reference is a useful tool to find information about and for contacting historic house museums.

*Historical Atlas of Canada: The land transformed, 1800-1891* - Geoffrey J. Matthews 1987-01-01

Uses maps to illustrate the development of Canada from the last ice sheet to the end of the eighteenth century

**The Encyclopedia of New York State** - Peter Eisenstadt 2005-05-19

The Encyclopedia of New York State is one of the most complete works on the Empire State to be published in a half-century. In nearly 2,000 pages and 4,000 signed entries, this single volume captures the impressive complexity of New York State as a historic crossroads of people and ideas, as a cradle of abolitionism and feminism, and as an apex of modern urban, suburban, and rural life. The Encyclopedia is packed with fascinating details from fields ranging from sociology and geography to history. Did you know that Manhattan's Lower East Side was once the most populated neighborhood in the world, but Hamilton County in the Adirondacks is the least densely populated county east of the Mississippi; New York is the only state to border both the Great Lakes and the Atlantic Ocean; the Erie Canal opened New York City to rich farmland upstate . . . and to the west. Entries by experts chronicle New York's varied areas, politics, and persuasions with a cornucopia of subjects from environmentalism to higher education to railroads, weaving the state's diverse regions and peoples into one idea of New York State. Lavishly illustrated with 500 photographs and figures, 120 maps, and 140 tables, the Encyclopedia is key to understanding the state's past, present, and future. It is a crucial reference for students, teachers, historians, and business people, for New Yorkers of all persuasions, and for anyone interested in finding out more about New York State.

**Farm Tools Through the Ages** - 1973

*Medieval Farming and Technology* - Grenville G. Astill 1997

This is the first of three planned volumes which deal with the techniques and technology of agriculture in Europe in the period from 600 A.D. down to the 17th century. The focus of this first volume is Scandinavia, the British Isles, Northern Germany, the Low Countries and Northern France. The volume discusses methodological approaches and their limitations, the development of medieval agriculture in terms of the transmission of technological ideas, improvements in productivity, regional variations, social responses to agricultural technology, and

those common trends that unite the Northwest European region. The volume integrates material derived from the great advances made in medieval archaeology and the historical study of landscapes during the past 30 years and has a supranational character. It will be of interest to all those working on the social, economic and political history of Northwest Europe in the medieval and early modern periods as well as to those undertaking research in the specific field of the history of technology. Technology and Change in History This new series of scholarly surveys is intended to offer an updating of the discussion of questions regarding the nature of technology and technological change first broached in the nine-volume survey by R. Forbes: *Studies in Ancient Technology*. The series will however take in not only the original scope of Forbes' work, namely the Ancient Near East and the Greco-Roman world, but will extend beyond this to cover the medieval and early modern periods. The volumes in the series will be in English, of 300-800 pp., divided into 10-15 topical chapters and aim to present to scholars, graduate students and to non-specialist scholars the current state of knowledge in the various fields in the history of technology. They collect, assimilate and present facts, opinion, sources, and literature in the accessible way that Forbes did, but will also identify issues that have not been plainly addressed and will in doing so indicate where the field might profitably be going. Including notes and numerous illustrations, the volumes address questions of a primarily historical nature, such as: 1. what technological options were open to peoples at different times and different places? 2. what options did they choose and why? 3. what impact did this have on their contemporaries and successors (and on their technological choices)? Questions and problems more proper to political, social and economic history will also be touched upon, but the starting point and focus of this new series is the history of technology. Volumes planned in the series include: R.J. Curtis: *Food Technology in Antiquity* (1999) M.-C. Deprez-Masson and N.J. Mayhew (eds.): *Metal Technology: 600-1800 A.D.* (2001) P. Squatriti (ed.): *Medieval Hydrotechnology* (2001) O. Wikander (ed.): *Ancient Water Technology* (1998) G.R.H. Wright: *Ancient Building Technology* (1999) J. Langdon and G. Astill (eds.): *Agrarian Technology in the Middle Ages: Northwest Europe* (1996)

*Agricultural Equipment Financing* - Howard Gustaf Diesslin 1955

19th Century Innovations: Paving the Way - Matthew McArdle

2017-01-30

The 19th Century Innovations: Paving the Way primary source reader builds literacy skills while offering engaging content across social studies subject areas. Primary source documents provide an intimate glimpse into what life was like during the 1800s. This nonfiction reader can be purposefully differentiated for various reading levels and learning styles. It contains text features to increase academic vocabulary and comprehension, from captions and bold print to index and glossary. The "Your Turn!" activity will continue to challenge students as they extend their learning. This text aligns to state standards as well as McREL, WIDA/TESOL, and the NCSS/C3 Framework.

*The Lean Farm* - Ben Hartman 2015

A practical, systems-based approach for a more sustainable farming operation To many people today, using the words "factory" and "farm" in the same sentence is nothing short of sacrilege. In many cases, though, the same sound business practices apply whether you are producing cars or carrots. Author Ben Hartman and other young farmers are increasingly finding that incorporating the best new ideas from business into their farming can drastically cut their wastes and increase their profits, making their farms more environmentally and economically sustainable. By explaining the lean system for identifying and eliminating waste and introducing efficiency in every aspect of the farm operation, The Lean Farm makes the case that small-scale farming can be an attractive career option for young people who are interested in growing food for their community. Working smarter, not harder, also prevents the kind of burnout that start-up farmers often encounter in the face of long, hard, backbreaking labor. Lean principles grew out of the Japanese automotive industry, but they are now being followed on progressive farms around the world. Using examples from his own family's one-acre community-supported farm in Indiana, Hartman clearly instructs other small farmers in how to incorporate lean practices in each step of their production chain, from starting a farm and harvesting crops to training employees and selling goods. While the intended audience for this book is small-scale farmers who are part of the growing local food movement, Hartman's prescriptions for high-value, low-cost production apply to farms and businesses of almost any size or scale that hope to harness the

power of lean in their production processes.  
**Agricultural Implements and Machines in the Collection of the**

**National Museum of History and Technology** - National Museum of  
History and Technology 1972
