Cosmos and Image in the Renaissance - Kathryn Banks 2008

Renaissance images could be real as well as linguistic. Human beings were often believed to be an image of the cosmos, and the sun an image of God. With *Cosmos and Image in the Renaissance*, Kathryn Banks explores the implications of this for poetic language and argues that linguistic images were a powerful tool for rethinking cosmic conceptions. She reassesses the role of natural-philosophical poetry in France, focusing upon its most well-known and widely-read exponent, Guillaume de Saluste Du Bartas. Through a sustained analysis of Maurice Sceve's *delie*, Banks also rethinks love lyric's oft-noted use of the beloved as image of the poet. *Cosmos and Image* makes an original contribution to our understanding of Renaissance thinking about the cosmic, the human, and the divine. It also proposes a mode of reading other Renaissance texts, and reflects at length upon the relation of 'literature' to history, to the history of science, and to political turmoil.

Christians in Conversation - Alberto Rigolio 2019-02-13

This book addresses a particular and little-known form of writing, the prose dialogue, during the Late Antique period, when Christian authors adopted and transformed the dialogue

form to suit the new needs of religious debate. Connected to, but departing from, the dialogues of Classical Antiquity, these new forms staged encounters between Christians and pagans, Jews, Manichaeans, and "heretical" fellow Christians. At times fiction, at others records of, or scripts for, actual debates, the dialogues give us a glimpse of Late Antique rhetoric as it was practiced and tell us about the theological arguments underpinning religious differences. By offering the first comprehensive analysis of Christian dialogues in Greek and Syriac from the earliest examples to the end of the sixth century CE, the present volume shows that Christian authors saw the dialogue form as a suitable vehicle for argument and apologetic in the context of religious controversy and argues that dialogues were intended as effective tools of opinion formation in Late Antique society. Most Christian dialogues are little studied, and often in isolation, but they vividly evoke the religious debates of the time and they embody the cultural

conventions and refinements that Late Antique men and women expected from such debates.

Dreamtimes and Thoughtforms - Richard Grossinger 2022-06-07

- Examines animal intelligences within a greater evolutionary context, detailing in particular the remarkable intelligence of crows and octopuses
- Looks at the Australian Aborigine Dreamtime as an attempt to understand the combined geological and geomantic landscape •

Investigates a range of ideas as they relate to the intersections of consciousness and reality, including reincarnation, past-life memories, ghosts, and UFOs From the origins of the cosmos to the microbiome, COVID-19 pandemic, UFOs, and the shapeshifting of octopuses and language of crows, Richard Grossinger traverses the mysteries and enigmas that define our universe and personal reality. Beginning his narrative with the Big Bang, origin of the Milky Way, and birth of our solar system, Grossinger offers a chronology of Earth's geological,

climatological, biological, and sociological evolution, leading to the current environmental and psychospiritual crisis. He explores the origin of cell life, RNA-DNA, and larger biomes, detailing in particular the remarkable intelligence of crows and octopuses. He uses the Australian Aborigine Dreamtime to understand landscapes as thoughtforms. He then offers reimagingings, from the perspective of "dreamings," of a wide variety of animals, including tardigrades, llamas, sea turtles, pigeons, bees, and coyotes. Examining the scientific dilemmas and paradoxes of consciousness, time, and quantum entanglement, Grossinger carries these into the range of issues around reincarnation, past-life memories, messages from the afterlife, and ghosts. Sharing exercises from his personal practice, Grossinger makes a distinction between the Buddhist description of reality and how Buddhist practitioners create an operating manual for the universe and an assured path of

salvation. The author then examines UFOs and their connections to elementals, fairies, and cryptids in terms of psychoids, Jung's term for transconscious processes that enter our world as autonomous entities. Taking the reader on a journey through the seen and unseen universe, from the Big Bang to the imaginal landscape of Dreamtime, Grossinger shows that matter is infused with spirit from its very beginning.

Cahokia - Sally A. Kitt Chappell 2002-02-15

At the turn of the last millennium, a powerful Native American civilization emerged and flourished in the American Midwest. By A.D. 1050 the population of its capital city, Cahokia, was larger than that of London. Without the use of the wheel, beasts of burden, or metallurgy, its technology was of the Stone Age, yet its culture fostered widespread commerce, refined artistic expression, and monumental architecture. The model for this urbane world was nothing less than the cosmos itself. The climax of their ritual center was a four-tiered pyramid covering fourteen acre rising a hundred feet into the sky—the tallest structure in the United States until 1867. This beautifully illustrated book traces the history of this six-square-mile area in the central Mississippi Valley from the Big Bang

to the present. Chappell seeks to answer fundamental questions about this unique, yet still relatively unknown space, which was designated a UNESCO World Heritage Site in 1982. How did this swampy land become so amenable to human life? Who were the remarkable people who lived here before the Europeans came? Why did the whole civilization disappear so rapidly? What became of the land in the centuries after the Mississippians abandoned it? And finally, what can we learn about ourselves as we look into the changing meaning of Cahokia through the ages? To explore these questions, Chappell probes a wide range of sources, including the work of astronomers, geographers, geologists, anthropologists, and archaeologists. Archival photographs and newspaper accounts, as well as interviews with those who work at the site and Native Americans on their annual pilgrimage to the site, bring the story up to the present. Tying together these many threads, Chappell weaves a

rich tale of how different people conferred their values on the same piece of land and how the transformed landscape, in turn, inspired different values in them-cultural, spiritual, agricultural, economic, and humanistic.
