Humour Translation in the Age of Multimedia - Margherita Dore 2020-11-03
This volume seeks to investigate how humour translation has developed since the beginning of the 21st century, focusing in particular on new ways of communication. The authors, drawn from a range of countries, cultures and academic traditions, address and debate how today's globalised communication, media and new technologies are influencing and shaping the translation of humour. Examining both how humour translation exploits new means of communication and how the processes of humour translation may be challenged and enhanced by technologies, the chapters cover theoretical foundations and implications, and methodological practices and challenges. They include a description of current research or practice, and comments on possible future developments. The contributions interconnect around the issue of humour creation and

translation in the 21st century, which can truly be labelled as the age of multimedia. Accessible and engaging, this is essential reading for advanced students and researchers in Translation Studies and Humour Studies.

[Psychological Perspectives on Radicalization](#) - Allard R. Feddes 2020-06-18

This innovative book examines radicalization from new psychological perspectives by examining the different typologies of radicalizing individuals, what makes individuals resilient against radicalization, and events that can trigger individuals to radicalize or to deradicalize. What is radicalization? Which psychological processes or events in a person's life play a role in radicalization? What determines whether a person is resilient against radicalization, and is deradicalization something that we can achieve? This book goes beyond previous publications on this topic by identifying concrete key events in the process of radicalization, providing a useful theoretical framework that summarizes the current state-of-the-art research on radicalization and deradicalization. A model is presented in which a distinction is made between different levels of radicalization and deradicalization, with key underlying psychological needs discussed: the need for identity, justice, significance, and sensation. The authors also describe what makes people resilient against messages from "the outside world" when they belong to an extremist group and discuss observable events which may "trigger" a person to radicalize (further) or to deradicalize. Including real-world examples and

clear guidelines for interventions aimed at prevention of radicalization and stimulation of deradicalization, this is essential reading for policy makers, researchers, practitioners, and students interested in this crucial societal issue.

Sustainable Automobile Transport - L. Ryan 2008-01-01

Transport, and in particular road transport, represents a significant global threat to long-term sustainable development, and is one of the fastest-growing consumers of final energy and sources of greenhouse gas emissions. In this book, long-term energy economy environment scenarios are used to identify the key technological developments required to address the challenges passenger car transport poses to climate change mitigation and energy security. It also considers possible targets for policy support and examines some of the elements that contribute to the significant levels of uncertainty particularly social and political conditions. The book then builds on this long-term scenario analysis with a broad review of recent empirical examples of relevant policy implementation to identify near-term options for the passenger transportation sector, which may promote a shift towards a more sustainable transport system over the longer term. Sustainable Automobile Transport will be of particular interest to those in the policy process who are striving to address the automobile-derived challenges associated with climate change a growing rather than declining problem. It will have a worldwide audience as every developed and rapidly growing society struggles to address the dynamic growth in greenhouse gas emissions from automobiles.

New Latin Grammar (Illustrated) - Charles E. Bennett 1963

Latin grammar is very different from English grammar in that Latin uses inflected words (words with the same root but different suffixes) to give a phrase or sentence meaning. English relies much more on word order. Latin grammar, like that of other ancient Indo-European languages, is highly inflected and so allows for a large degree of flexibility in choosing word order. For example, (omitting capitals and punctuation for simplicity), the sentence *femina togam texuit* meaning "the woman wove a toga", represents the preferred word order. However, the meaning could be, still correctly, as *texuit togam femina* or *togam texuit femina*. Each word's suffix (-a, -am and -uit) indicates the word's grammatical function as a subject, object and verb, respectively. The suffixes provide the sentence with its particular meaning. Charles Edwin Bennett (April 6, 1858 - May 2, 1921) was an American classical scholar and the Goldwin Smith Professor of Latin at Cornell University. He is best remembered for his book *New Latin Grammar*, first published in 1895

University on the Border - Lis Lange

2021-08-27

The volume explores and thinks through the process of decolonising the South African higher education system by examining #MustFall. The text offers theoretical insights from a historical, contemporary and multidisciplinary lens, while examining the embedded meanings of the university as an institution, idea and set of practices to show the shifts and changes that were inaugurated by #MustFall along with the historicities that define the university both locally and globally. The retro- and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity, which is framed in the book as the 'border'. The volume proposes the concept of the 'border' (recognising its conceptual and analytical dynamism) as a generative space that can facilitate new imaginaries and articulations of this social institution: the university.

A Metahistory of the Clash of Civilisations - Arshin Adib-Moghaddam 2011

"This book seeks to dispel the myth that we have ever been embroiled in some 'clash of civilisations'. Adib-Moghaddam traverses various intellectual disciplines in order to find a pathway through the conceptual maze that has conditioned us to think in 'tribal' categories.

Accompanying the reader on this journey from the wars between ancient Persia and Greece, the Crusades, Colonialism and the Enlightenment to the contemporary 'wars on terror' are thinkers from 'East' and 'West': Adorno, Derrida, Farabi, Foucault, Hegel, Khayyam, Marcuse, Marx, Said, Ibn Sina, and Weber. In asking where ideas such as the 'clash of civilisations' come from, and by whom they are perpetuated, Adib-Moghaddam engages with both western and Islamic representations of the 'other'. He demonstrates first the discontinuities between 'Islamism' and the canon of classical Islamic philosophy, distinguishing between 'Avicennian' and 'Qutbian' debates, and second how the violence inscribed in ideas of the 'West', especially from the Enlightenment, casts a shadow on politics to this day. Expanding the geography of critical theory to include the canons of Islamic philosophy and poetry, 'A Metahistory of the Clash of Civilisations' refuses to divorce Muslims from Europeans, Americans from Arabs, the Orient from the Occident. As such this book

presents a frontal attack on our current cultural reality and Islamist-western agitation against each other"--Publisher's description, p. [2] of dust jacket.
