The Cambridge History of French Thought - Michael Moriarty 2019-05-30

French thinkers have revolutionized European thought about knowledge, religion, politics, and society. Delivering a comprehensive history of thought in France from the Middle Ages to the present, this book follows themes and developments of thought across the centuries. It provides readers with studies of both systematic

thinkers and those who operate less systematically, through essays or fragments, and places them all in their many contexts. Informed by up-to-date research, these accessible chapters are written by prominent experts in their fields who investigate key concepts in non-technical language. Chapters feature treatments of specific thinkers as individuals including Voltaire, Rousseau, Descartes and Derrida, but also more general movements and schools of thought from humanism to liberalism, via the Enlightenment, Romanticism, Marxism, and feminism. Furthermore, the influence of gender, race, empire and slavery are investigated to offer a broad and fulfilling account of French thought throughout the ages.

Within each section, individual aircraft types are listed in alphabetical order by manufacturer or builder, with historical background, technical specifications, drawings, and one or more photographs. Appendices cover lesser known flying boat and amphibian types as well as various design concepts that never achieved the flying stage.

Social Psychology of Inclusion and Exclusion - Dominic Abrams 2004-06-02

This book is about the social psychological dynamics and phenomenology of social inclusion and exclusion. The editors take as their starting point the assumption that social life is conducted in a framework of relationships in which individuals seek inclusion and belongingness.

Relationships necessarily include others, but equally they have boundaries that exclude. Frequently these boundaries are challenged or crossed. The book will draw together research on individual motivation, small group processes, stigmatization and intergroup relations, to provide a comprehensive social psychological account of social inclusion and exclusion.

The Forest of the Lacandon Maya - Suzanne

Cook 2016-03-15

The Forest of the Lacandon Maya: An Ethnobotanical Guide, with active links to audio-video recordings, serves as a comprehensive guide to the botanical heritage of the northern Lacandones. Numbering fewer than 300 men, women, and children, this community is the most culturally conservative of the Mayan groups. Protected by their hostile environment, over many centuries they maintain autonomy from the outside forces of church and state, while they continue to draw on the forest for spiritual inspiration and sustenance. In The Forest of the Lacandon Maya: An Ethnobotanical Guide, linguist Suzanne Cook presents a bilingual Lacandon-English ethnobotanical guide to more than 450 plants in a tripartite organization: a botanical inventory in which main entries are headed by Lacandon names followed by common English and botanical names, and which includes plant descriptions and uses; an ethnographic inventory, which expands the descriptions given

in the botanical inventory, providing the socio-historical, dietary, mythological, and spiritual significance of most plants; and chapters that discuss the relevant cultural applications of the plants in more detail provide a description of the area's geography, and give an ethnographic overview of the Lacandones. Active links throughout the text to original audio-video recordings demonstrate the use and preparation of the most significant plants.
