The Trachtenberg Speed System of Basic

Mathematics - Jakow

Trachtenberg 2011-03-01

Ever find yourself struggling to check a bill or tax on a payslip? The Trachtenberg Speed System provides a course in refining basic mathematics skills to tackle large sums before simplifying to increase concentration and ability in day-to-day arithmetic. The Trachtenberg system has been described as the 'shorthand of mathematics' and only requires the ability to count from one to eleven. Using a series of simplified keys, it allows anyone to master numbers and calculations giving greater speed, ease in handling numbers and increasing accuracy. Jakow Trachtenberg believed that everyone is born with phenomenal abilities to calculate. He devised a set of rules that allows every child to make multiplication, division, addition, subtraction and square-root calculations with unerring accuracy and at

remarkable speed. A perfect entry into gaining confidence with numbers.

Curriculum-based

Measurement - Mark R. Shinn
1989-03-17

Developed specifically to overcome problems with traditional standardized instruments, curriculum-based measurement (CBM) has steadily increased in educational use. These brief assessment probes of reading, spelling, written expression, and mathematics serve to quantify student performance as well as to enhance academic achievement. Their widening use as a means of evaluation and ultimately of instruction, has created a corresponding need to expand the applications of this methodology to diverse populations. This new volume addresses that need by focusing on the broader application of CBM, providing practical new measures, as well as detailing their use with specific student groups.

4,500 Multiplication Problems With Answers Practice Workbook - Chris McMullen
2011-12-12

This practice book is designed to help students develop proficiency with their multiplication skills by offering ample practice. Computer-generated answers have been included at the back of the workbook so that students, parents, or teachers may quickly check the results of their solutions. There is plenty of space for students to write their solutions. This book is conveniently divided up into six parts: Part 1 reviews the fundamental multiplication facts between single-digit factors since swift knowledge of these is critical toward multiplication mastery. Parts 2 and 3 are limited to single-digit numbers times multi-digit numbers. This way students are not challenged with too much too soon. Part 4 involves double-digit numbers times double-digit numbers. Part 5

involves double-digit numbers times triple-digit numbers. Part 6 involves triple-digit multiplication. A multiplication table is provided for students who are not yet fluent with their division facts.

Five Times Five Is Not Ten - Susan R. Greenwald 2008
Designed for any age student, this workbook focuses on teaching children strategies to learn the multiplication facts. In addition to 148 worksheets for written practice and review, the reproducible pages include a guide to introducing the facts, record-keeping pages, answers, and a certificate.

RTI Applications, Volume 2 - T. Chris Riley-Tillman 2013-01-16

Once a response-to-intervention (RTI) framework is in place, how can educators determine whether or not interventions are working? This volume focuses on the "response" component of RTI, providing crucial knowledge and hands-on techniques for assessing the effectiveness of RTI practices in grades K-12. The authors show how to select suitable assessment measures, analyze data about academic and behavioral interventions, and make defensible decisions about groups, individual students, and special education eligibility. Professional development strategies are also addressed. Useful reproducible tools are included; the large-size format and lay-flat binding facilitate photocopying. Human Information Processing

- Peter H. Lindsay 2013-09-11

Human Information

Processing: An Introduction to Psychology aims to convey the excitement of modern experimental psychology to the beginning student. The book discusses the organization of auditory perceptions; neural information processing; and the theories of pattern recognition. The text also describes the visual system; the dimensions of vision; the auditory system; and the dimensions of sound. The neural basis of memory; transient memories; the structure of memory; and memory processes are also considered. The book further

tackles language acquisition; the process of learning and cognitive development; problem solving; and decision making. The text also looks into motivation and the biochemical responses to stress.

Psychologists and students taking psychology and related courses will find the book useful."

Meeting the Psychoeducational Needs of Minority Students -

Craig L. Frisby 2013-02-06

"Dr. Frisby focuses a bright light on issues that often remain obscured in a fog of polemics, deeply held convictions, and genuine concern for the plight of minority students. *Meeting the Psychoeducational Needs of Minority Students* cuts through this fog with intense, sharp, clear thinking and data-driven conclusions." —Jeffrey P. Braden, PhD, Professor of Psychology and Dean of the College of Humanities and Social Sciences, North Carolina State University "Going beyond superficial 'feel good' or 'feel bad' ideologies to probe what really makes a difference in meeting the needs of often underserved populations, Craig Frisby provides

acomprehensive, rigorous, well-written, and entertaining (honest!) work that addresses the intersection of race, ethnicity, and education." —Betty Henry, PhD, School Psychologist, California School for the Blind "Dr. Frisby makes a perceptive and incisive assessment of much of the multicultural ideology currently propagated in professional psychology and education and directly confronts some of the major issues surrounding multiculturalism. Unlike many other critiques that have been proffered over the last few decades, however, *Meeting the Psychoeducational Needs of Minority Students* also provides many concrete solutions for how to begin changing the current milieu." —A. Alexander Beaujean, PhD, Associate Professor, Baylor University A practical, research-based guide to facilitating positive educational outcomes for racial, ethnic, and language minority students This timely book is written from the perspective of

contemporary school psychology for a variety of school personnel, including school psychologists, teachers, guidance counselors, and administrators, with coverage of: The problem of quack multiculturalism Home and family Context for school learning General cognitive ability, learning, and instruction Testing and assessment School discipline and behavior management Crime, delinquency, and gangs School district resources *Intelligent Tutoring Systems* - Vincent Aleven 2010-06-01 The 10th International Conference on Intelligent Tutoring Systems, ITS 2010, continued the bi-annual series of top-flight international conferences on the use of advanced educational technologies that are adaptive to users or groups of users. These highly interdisciplinary conferences bring together researchers in the learning sciences, computer science, cognitive or educational psychology, cognitive science, artificial intelligence, machine

learning, and linguistics. The theme of the ITS 2010 conference was Bridges to Learning, a theme that connects the scientific content of the conference and the geography of Pittsburgh, the host city. The conference addressed the use of advanced technologies as bridges for learners and facilitators of robust learning outcomes. We received a total of 186 submissions from 26 countries on 5 continents: Australia, Brazil, Canada, China, Estonia, France, Georgia, Germany, Greece, India, Italy, Japan, Korea, Mexico, The Netherlands, New Zealand, Pakistan, Philippines, Saudi Arabia, Singapore, Slovakia, Spain, Thailand, Turkey, the UK and USA. We accepted 61 full papers (38%) and 58 short papers. The diversity of the field is reflected in the range of topics represented by the papers submitted, selected by the authors.

relationship among the educational system, the political economy, and the prison industrial system in the United States. Working within the tradition of critical theory, this critical ethnography posits a more than accidental connection among these phenomena, and engages in a debate with existing literature within critical theory related to structure and agency. The life stories of the participants and their perspectives on their social circumstances provide a tool for deepening and questioning our understandings of these matters. In addition to its substantive findings, this book allows us to see in human terms how structures and forces in society contribute to the outcomes of school failure and incarceration that are usually measured in percentages and correlations. It suggests ways of improving classroom experiences and improving the life chances of young people.

Transforming Education Outcomes in Africa - Johannes

Hoogeveen 2019-04-25
Good education changes lives. It is therefore unsurprising that improved schooling plays a central part in most development strategies. At the same time, the expansion of school attainment alone is not sufficient to guarantee improved welfare. This open access book focuses on one country in West Africa, Togo, to explore what a country that has successfully increased enrollment rates can do to enhance learning outcomes. The authors explore different avenues for improvement, including enhancing the efficiency with which resources are used; increasing the qualifications of teachers; and through greater community involvement in school management. There is scope for improvement along all these dimensions, yet changes at the margin are insufficient to bring about the transformation needed to bring about acceptable levels of learning. Important reading for anyone interested in understanding the pathways to
