**Advanced Problems in Mathematics: Preparing for University** - Stephen Siklos 2016-01-25

This book is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge colleges as the basis for conditional offers. They are also used by Warwick University, and many other mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics is recommended as preparation for any undergraduate mathematics course, even for students who do not plan to take the Sixth Term Examination Paper. The questions analysed in this book are all based on recent STEP questions selected to address the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. Each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anybody interested in advanced mathematics.

**Feminine Gospels** - Carol Ann Duffy 2012-12-13

In *Feminine Gospels*, Carol Ann Duffy draws on the historical, the archetypal, the biblical and the fantastical to create various visions – and revisions – of female identity. Simultaneously stripping women bare and revealing them in all their guises and disguises, these poems tell tall stories as though they were true confessions, and spin modern myths from real women seen in every aspect – as bodies and corpses, writers and workers, shoppers and slimmers, fairytale royals or girls-next-door. ‘Part of Duffy’s talent – besides her ear for ordinary eloquence, her gorgeous, powerful, throwaway lines, her subtlety – is her ventriloquism . . . From verbal nuances to mind-expanding imaginative leaps, her words seem freshly plucked from the minds of non-poets – that is, she makes it look easy’ Charlotte Mendelson, *Observer*
