

# Reproduction Chapter 12th Science

Recognizing the artifice ways to acquire this books **Reproduction Chapter 12th Science** is additionally useful. You have remained in right site to begin getting this info. get the Reproduction Chapter 12th Science join that we find the money for here and check out the link.

You could buy guide Reproduction Chapter 12th Science or acquire it as soon as feasible. You could speedily download this Reproduction Chapter 12th Science after getting deal. So, gone you require the book swiftly, you can straight acquire it. Its for that reason extremely easy and therefore fats, isnt it? You have to favor to in this broadcast

## **Oswaal 35 Year's NEET UG Solved Papers 1988-2022 + NCERT Textbook Exemplar Biology (Set of 2 Books) (For 2023 Exam) -**

Oswaal Editorial Board 2022-09-12

Latest NEET Question Paper 2022- Fully solved Chapter-wise & Topic-wise Previous Questions to enable quick revision Previous Years' (1988-2022) Exam Questions to facilitate focused study Mind Map: A single page snapshot of the entire chapter for longer retention Mnemonics to boost memory and confidence Revision Notes: Concept based study material Oswaal QR Codes: Easy to scan QR codes for online content Analytical Report: Unit-wise questions distribution in each subject Two SQPs based on the latest pattern Tips to crack NEET Top 50 Medical Institutes Ranks Trend Analysis: Chapter-wise

**The Ovary** - Giovan Battista Serra 1983

*Sexual Reproduction in Animals and Plants* - Hitoshi Sawada 2014-02-07

This book contains the proceedings of the International Symposium on the Mechanisms of Sexual Reproduction in Animals and Plants, where many plant and animal reproductive biologists gathered to discuss their recent progress in investigating the shared mechanisms and factors involved in sexual reproduction. This now is the first book that reviews recent progress in almost all fields of plant and animal fertilization. It was recently reported that the self-sterile mechanism of a

hermaphroditic marine invertebrate (ascidian) is very similar to the self-incompatibility system in flowering plants. It was also found that a male factor expressed in the sperm cells of flowering plants is involved in gamete fusion not only of plants but also of animals and parasites. These discoveries have led to the consideration that the core mechanisms or factors involved in sexual reproduction may be shared by animals, plants and unicellular organisms. This valuable book is highly useful for reproductive biologists as well as for biological scientists outside this field in understanding the current progress of reproductive biology.

**The Bottled Ocean of Biology** - Nisarg Desai 2017-02-28

The author of this handbook, Nisarg Desai, has created a guide that will assist 11th and 12th grade students in India prepare for premedical tests such as the NEET, AIIMS, and JIPMER. The work is based upon the authors own notes on a broad range of biology topics taken while preparing for PMTs himself. Key chapters include Classification, Cell, Human Physiology, Plant Physiology, Genetics & Evolution, Biotechnology and well organized sections on each chapter of high school biology. This timely and useful handbook features a collection of over 150 mnemonics, important statements and diagrams from NCERT textbooks, For Your Information material. Included are abundant tables and flowcharts designed to help students quickly grasp key concepts. There is ample room at the end of each chapter for students own notes.

Detailed concepts are presented concisely in the way students make their notes, hence the name Bottled Ocean.

*101 Questions about Reproduction (Revised Edition)* - Faith Hickman Brynie 2013-01-01

How do living things reproduce? How do twins, triplets, and other multiple births happen? How does fertilization occur? Find out in this frank and accessible look at reproduction. Set up in a straightforward question and answer format, this informative title asks and answers questions about the basic scientific and social aspects of reproduction. Written in a conversational tone that draws readers in, 101 Questions about Reproduction is the perfect resource for biology and health classes, reference libraries, and more.

*NCERT Exemplar Problems-Solutions BIOLOGY class 12th* - Arihant Experts 2014-11-03

Questions are the root cause of success. The more new & authentic questions you will have, the more new & authentic knowledge you will have. Considering this fact, the Department of Education in Biology & Mathematics (DESM) with an aim to improve the quality of teaching/learning process in schools has made an attempt to develop resource books of Exemplar Problems in different subjects at secondary and higher-secondary stage. These specialized resource books named NCERT Exemplars are not meant to serve merely as question banks for examinations but are primarily meant to discourage rote learning. The first and the only books of its kind by Arihant Publications is an attempt at providing comprehensive guide to NCERT Exemplar Problems-Solutions for Class IX to XII. The present book for Class XII Biology contains different types of questions of varying difficulty level. Also detailed explanation for comprehensive understanding has been given for all objective and subjective problems. Some questions covered in the book would require the students to apply simultaneous understanding of more than one chapters/units. The book has been divided into 16 chapters namely Reproduction in Organisms, Sexual Reproduction in Flowering Plants, Human Reproduction, Reproductive Health, Principle of Inheritance & Variation, Molecular Basis of Inheritance, Evolution,

Human Health & Diseases, Strategies for Enhancement in Food Production, Microbes in Human Welfare, Biotechnology: Principles & Processes, Biotechnology & Its Applications, Organisms & Populations, Ecosystem, Biodiversity & Conservation and Environmental Issues. The problems covered in the book will encourage teachers to design quality questions on their own. The questions provided in the book will test comprehension, information recall, analytical thinking and problem-solving ability, creativity and speculative ability. The book will also be highly useful for school examinations and to build foundation for engineering & medical entrance examinations. As the book contains detailed and comprehensive solutions for NCERT Exemplar problems for Class XII Biology, it for sure will help in discouraging rote learning.

**The Leydig Cell** - Anita H. Payne 1996

*Experiments in Plant-hybridisation* - Gregor Mendel 1925

*Scientific and Medical Aspects of Human Reproductive Cloning* - National Research Council 2002-06-17

Human reproductive cloning is an assisted reproductive technology that would be carried out with the goal of creating a newborn genetically identical to another human being. It is currently the subject of much debate around the world, involving a variety of ethical, religious, societal, scientific, and medical issues. *Scientific and Medical Aspects of Human Reproductive Cloning* considers the scientific and medical sides of this issue, plus ethical issues that pertain to human-subjects research. Based on experience with reproductive cloning in animals, the report concludes that human reproductive cloning would be dangerous for the woman, fetus, and newborn, and is likely to fail. The study panel did not address the issue of whether human reproductive cloning, even if it were found to be medically safe, would be "or would not be" acceptable to individuals or society.

**The Evolution of Sex** - John Maynard Smith 1978-08-24

The question of why organisms reproduce sexually is still a matter of controversy. In this account, Professor Maynard Smith considers the

selective forces responsible for the origin and evolution of sexual reproduction and genetic recombination, using quantitative population genetics arguments to support his ideas. The relative importance of individual and group selection processes are also considered. The aim is to give a clear statement of the theoretical issues, and present enough of the evidence to show what kinds of facts are relevant. It is hoped that where crucial evidence is missing, experimentalists and field workers may be encouraged to collect the relevant data. The author does not claim to solve all the problems he raises, but this clear and well-argued account should provide stimulating reading for advanced undergraduate students and research workers in evolutionary theory.

**Concepts of Biology** - Samantha Fowler 2018-01-07

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

**Invertebrate Embryology and Reproduction** - Fatma El-Bawab

2020-01-18

Invertebrate Embryology and Reproduction deals with the practical and theoretical objectives of the descriptive embryology of invertebrates, along with discussions on reproduction in these groups of animals. It explains several morphological and anatomical expressions in the field and covers the embryology of invertebrate animals, starting from the Protozoa, to the Echinodermata, the Protochordate and Tunicates. These groups include economically important aquatic invertebrates, such as crustaceans, as well as medically important invertebrates and economic arthropods. Each chapter is preceded by the taxonomy of the discussed phylum and/or the species to enable the reader to locate the systematic position. Covers phylum definition, general characteristics, classification, reproduction, asexual reproduction, gametic reproduction, spawning, fertilization, development and embryogenesis. Includes recent findings in the area, along with detailed figures and photos that illustrate important concepts. Brings together difficult-to-obtain research data from the field, not only in Egyptian libraries, but globally, and previously only found through specialized references not widely available. Clarifies descriptions with striking photos and electron microscopical studies of different species.

**Biology for AP® Courses** - Julianne Zedalis 2017-10-16

Biology for AP® courses covers the scope and sequence requirements of a typical two-semester Advanced Placement® biology course. The text provides comprehensive coverage of foundational research and core biology concepts through an evolutionary lens. Biology for AP® Courses was designed to meet and exceed the requirements of the College Board's AP® Biology framework while allowing significant flexibility for instructors. Each section of the book includes an introduction based on the AP® curriculum and includes rich features that engage students in scientific practice and AP® test preparation; it also highlights careers and research opportunities in biological sciences.

*S.Chand' S Biology -XII - CBSE* - Dr. P.S. Verma & Dr. B.P. Pandey

*S.Chand' S Biology -XII - CBSE*

**Xam Idea Biology for CBSE Class 12- 2021** - Editorial Board

2020-07-02

The new Xam Idea for Class XII Biology 2020-21 has been thoroughly revised, diligently designed and uniquely formatted in accordance with CBSE Examination requirements and NEW CBSE guidelines for the session 2020-2021. The features of the new Xam Idea are as follows: 1. The book has been thoroughly revised as per the new CBSE Syllabus 2020-2021. 2. The book is divided into two Sections: Part-A and Part-B. 3. Part-A includes the following: (a) Each Chapter is summarised in the form of precise notes under the heading 'Basic Concepts'. (b) All NCERT Textbook questions and important NCERT Exemplar questions have been incorporated. (c) Previous 10 Years' Questions have been added under different sections according to their marks. (d) Objective Type Questions have been included as per new CBSE guidelines. These include Multiple Choice Questions, Very Short answer questions and Assertion-Reason questions carrying 1 mark each. (e) Short Answer Questions carrying 2 marks each and Long Answer Questions carrying 3 marks and 5 marks have also been added. (f) A new section 'Case-based questions' has been added as per CBSE guidelines and Examination papers. (g) At the end of every chapter, Self-Assessment Test has been given to test the extent the grasp of the student. 4. Part-B includes the following: (a) CBSE Sample Question Paper 2020 with complete solution. (b) Blueprint as per latest CBSE Syllabus 2020-2021. (c) Unsolved Model Question Papers for ample practice by the student. (d) Solved CBSE Examination Papers 2020 (57/1/1), (57/1/2) and (57/1/3). (e) Solved sets of remaining four regions' CBSE Examination Papers are given in QR code.

**Nucleic Acid Polymerases** - Katsuhiko S. Murakami 2013-10-22

This book provides a review of the multitude of nucleic acid polymerases, including DNA and RNA polymerases from Archea, Bacteria and Eukaryota, mitochondrial and viral polymerases, and other specialized polymerases such as telomerase, template-independent terminal nucleotidyl transferase and RNA self-replication ribozyme. Although many books cover several different types of polymerases, no book so far has attempted to catalog all nucleic acid polymerases. The goal of this book is to be the top reference work for postgraduate students, postdocs,

and principle investigators who study polymerases of all varieties. In other words, this book is for polymerase fans by polymerase fans. Nucleic acid polymerases play a fundamental role in genome replication, maintenance, gene expression and regulation. Throughout evolution these enzymes have been pivotal in transforming life towards RNA self-replicating systems as well as into more stable DNA genomes. These enzymes are generally extremely efficient and accurate in RNA transcription and DNA replication and share common kinetic and structural features. How catalysis can be so amazingly fast without loss of specificity is a question that has intrigued researchers for over 60 years. Certain specialized polymerases that play a critical role in cellular metabolism are used for diverse biotechnological applications and are therefore an essential tool for research.

*Biology 2e* - Mary Ann Clark 2018-04

Molecular Biology of the Cell - Bruce Alberts 2004

**Reproduction in Farm Animals** - E. S. E. Hafez 2013-05-13

When you're looking for a comprehensive and reliable text on large animal reproduction, look no further! the seventh edition of this classic text is geared for the undergraduate student in Agricultural Sciences and Veterinary Medicine. In response to reader feedback, Dr. Hafez has streamlined and edited the entire text to remove all repetitious and nonessential material. That means you'll learn more in fewer pages. Plus the seventh editing is filled with features that help you grasp the concepts of reproduction in farm animals so you'll perform better on exams and in practice: condensed and simplified tables, so they're easier to consult an easy-to-scan glossary at the end of the book an expanded appendix, which includes graphic illustrations of assisted reproduction technology Plus, you'll find valuable NEW COVERAGE on all these topics: Equine Reproduction: expanded information reflecting today's knowledge Llamas (NEW CHAPTER) Micromanipulation of Gametes and In Vitro Fertilization (NEW CHAPTER!) Reach for the text that's revised with the undergraduate in mind: the seventh edition of Hafez's

Reproduction in Farm Animals.

*Science for Tenth Class Part 2 Biology* - Lakhmir Singh & Manjit Kaur  
A series of books for Classes IX and X according to the CBSE syllabus and CCE Pattern

**Genetics and Biotechnology** - Ulrich Kück 2013-03-09

Mycology, the study of fungi, originated as a subdiscipline of botany and was a descriptive discipline, largely neglected as an experimental science until the early years of this century. A seminal paper by Blakeslee in 1904 provided evidence for self incompatibility, termed "heterothallism", and stimulated interest in studies related to the control of sexual reproduction in fungi by mating-type specificities. Soon to follow was the demonstration that sexually reproducing fungi exhibit Mendelian inheritance and that it was possible to conduct formal genetic analysis with fungi. The names Burgeff, Kniep and Lindegren are all associated with this early period of fungal genetics research. These studies and the discovery of penicillin by Fleming, who shared a Nobel Prize in 1945, provided further impetus for experimental research with fungi. Thus began a period of interest in mutation induction and analysis of mutants for biochemical traits. Such fundamental research, conducted largely with *Neurospora crassa*, led to the one gene: one enzyme hypothesis and to a second Nobel Prize for fungal research awarded to Beadle and Tatum in 1958. Fundamental research in biochemical genetics was extended to other fungi, especially to *Saccharomyces cerevisiae*, and by the mid-1960s fungal systems were much favored for studies in eukaryotic molecular biology and were soon able to compete with bacterial systems in the molecular arena.

**Cell Organelles** - Reinhold G. Herrmann 2012-12-06

The compartmentation of genetic information is a fundamental feature of the eukaryotic cell. The metabolic capacity of a eukaryotic (plant) cell and the steps leading to it are overwhelmingly an endeavour of a joint genetic cooperation between nucleus/cytosol, plastids, and mitochondria. Alteration of the genetic material in anyone of these compartments or exchange of organelles between species can seriously affect harmoniously balanced growth of an organism. Although the biological

significance of this genetic design has been vividly evident since the discovery of non-Mendelian inheritance by Baur and Correns at the beginning of this century, and became indisputable in principle after Renner's work on interspecific nuclear/plastid hybrids (summarized in his classical article in 1934), studies on the genetics of organelles have long suffered from the lack of respectability. Non-Mendelian inheritance was considered a research sideline~if not a freak~by most geneticists, which becomes evident when one consults common textbooks. For instance, these have usually impeccable accounts of photosynthetic and respiratory energy conversion in chloroplasts and mitochondria, of metabolism and global circulation of the biological key elements C, N, and S, as well as of the organization, maintenance, and function of nuclear genetic information. In contrast, the heredity and molecular biology of organelles are generally treated as an adjunct, and neither goes as far as to describe the impact of the integrated genetic system.

**Arthur's Veterinary Reproduction and Obstetrics E-Book** - David E. Noakes 2009-04-23

"Veterinary Reproduction and Obstetrics has been the standard reference textbook for veterinary students for many years, as well as for students of animal science and related disciplines; in addition it has also been a useful reference source for the practicing veterinary surgeon. The new edition builds on the success of the previous edition covering normal reproduction and reproductive disorders and diseases in the common and less common domesticated species (llamas, alpacas, camels). The book has been completely revised with full colour throughout to include recent developments in reproductive biology and endocrinology, as well as the new knowledge on the causes and treatment of reproductive disease." "This is a reference text that has been refreshed well and warrants a place on practice bookshelves." - Veterinary Record, Feb 2011 Classic text reference Covering all aspects of reproduction and obstetrics in all common and less common domestic species Only book covering full range of domestic animals Practical clinical approach throughout Thorough updating throughout to reflect changes in practice since the last edition New authors and contributors to ensure

contemporary and international approach (contributors from Finland, the Netherlands, USA, Denmark and New Zealand) Full colour throughout

**Assisted Reproductive Technology Surveillance** - Dmitry M. Kissin

2019-07-04

Offers a comprehensive guide to assisted reproductive technology surveillance, describing its history, global variations, and best practices.

*Lakhmir Singh's Science for Class 7* - Lakhmir Singh & Manjit Kaur

Lakhmir Singh's Science is a series of books which conforms to the NCERT syllabus. The main aim of writing this series is to help students understand difficult scientific concepts in a simple manner in easy language. The ebook version does not contain CD.

**Campbell Biology** - Lisa A. Urry 2016-10-05

Note: You are purchasing a standalone product; MyLab™ & Mastering™ does not come packaged with this content. Students, if interested in purchasing this title with MyLab & Mastering, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the physical text and MyLab & Mastering, search for: 0134082311 / 9780134082318 Campbell Biology Plus MasteringBiology with eText -- Access Card Package Package consists of: 0134093410 / 9780134093413 Campbell Biology 0134472942 / 9780134472942 MasteringBiology with Pearson eText -- ValuePack Access Card -- for Campbell Biology The World's Most Successful Majors Biology Text and Media Program are Better than Ever The Eleventh Edition of the best-selling Campbell BIOLOGY sets students on the path to success in biology through its clear and engaging narrative, superior skills instruction, innovative use of art and photos, and fully integrated media resources to enhance teaching and learning. To engage learners in developing a deeper understanding of biology, the Eleventh Edition challenges them to apply their knowledge and skills to a variety of new hands-on activities and exercises in the text and online. Content updates throughout the text reflect rapidly evolving research, and new learning tools include Problem-Solving Exercises, Visualizing Figures, Visual Skills Questions, and more. Also Available with MasteringBiology™ MasteringBiology is an

online homework, tutorial, and assessment product designed to improve results by helping students quickly master concepts. Features in the text are supported and integrated with MasteringBiology assignments, including new Figure Walkthroughs, Galapagos Evolution Video Activities, Get Ready for This Chapter questions, Visualizing Figure Tutorials, Problem-Solving Exercises, and more.

**22 years AIIMS Chapter-wise Solved Papers (1997-2018) 12th Edition** - Disha Experts

AIIMS 22 years Chapter-wise Solved Papers consists of past years (memory based) solved papers from 1997 onwards till date, distributed in 29, 31, 38 & 6 topics in Physics, Chemistry, Biology & General Knowledge respectively. The book contains around 4380 straight MCQs - 3060 MCQs and 1320 Assertion-Reason type questions.

*International Review of Cytology* - 1992-12-02

International Review of Cytology

Reproductive Technologies in Animals - Giorgio Presicce 2020-05-28

Reproductive Technologies in Animals provides the most updated and comprehensive knowledge on the various aspects and applications of reproductive technologies in production animals as well as companion, wild, exotic, and laboratory animals and birds. The text synthesizes historical information and recent discoveries, while dealing with economical and geographical issues related to the implementation of the same technologies. It also presents the effects of reproductive technology implementation on animal welfare and the possible threat of pathogen transmission. Reproductive Technologies in Animals is an important resource for academics, researchers, professionals in public and private animal business, and students at the undergraduate and graduate levels, as it gives a full and detailed first-hand analysis of all species subjected to the use of reproductive technologies. Provides research from a team of scientists and researchers whose expertise spans all aspects of animal reproductive technologies Addresses the use of reproductive technologies in a wide range of animal species Offers a complete description and historical background for each species described Discusses successes and failure as well as future challenges in

reproductive technologies

*Principles of Biotechnology* - Colin Davenport 2018-05-17

Biotechnology is an interdisciplinary field of study which focuses on the development of specified products using living systems or organisms. The recent developments made in the field of biotechnology help our society in developing better health care products and vaccines. Apart from using this technology in the health care sector, it also helps in generating fuel which is less harmful for our environment. In this book, constant effort has been made to make the understanding of the difficult concepts of biotechnology as easy and informative as possible, for the readers. It aims to serve as a resource guide for students and experts alike and contribute to the growth of the discipline.

**AWARENESS SCIENCE FOR 8 CLASS WITH CD ON REQUEST - LAKHMIR SINGH**

Awareness Science is a series of science books for classes 1-8 for the schools following CBSE Syllabus.

**Cancer, HIV and AIDS** - Valerie Beral 1991

Published for the Imperial Cancer Research Fund (UK), each issue of the Cancer surveys series provides a comprehensive survey of the present state and future developments in a well-defined area in oncology in which there is current scientific or clinical interest. The invited papers are from leaders

**Meiosis and Gametogenesis** - 1997-11-24

In spite of the fact that the process of meiosis is fundamental to inheritance, surprisingly little is understood about how it actually occurs. There has recently been a flurry of research activity in this area and this volume summarizes the advances coming from this work. All authors are recognized and respected research scientists at the forefront of research in meiosis. Of particular interest is the emphasis in this volume on meiosis in the context of gametogenesis in higher eukaryotic organisms, backed up by chapters on meiotic mechanisms in other model organisms. The focus is on modern molecular and cytological techniques and how these have elucidated fundamental mechanisms of meiosis. Authors provide easy access to the literature for those who want to pursue topics

in greater depth, but reviews are comprehensive so that this book may become a standard reference. Key Features \* Comprehensive reviews that, taken together, provide up-to-date coverage of a rapidly moving field \* Features new and unpublished information \* Integrates research in diverse organisms to present an overview of common threads in mechanisms of meiosis \* Includes thoughtful consideration of areas for future investigation

**What is Pollination?** - Bobbie Kalman 2010-08-01

Introduces pollination, describing how it is carried out, the insects and other types of animals who act as pollinators, and the threats to the survival of these pollinators, including diseases and pesticides.

*Moderns Abc of Biology* - B. B. Arora 2016

*S. Chand's Biology For Class XII* - Dr. P.S. Verma & Dr. B.P. Pandey 2018  
S.Chand S Biology -XII - CBSE

**Official SAT Study Guide 2020 Edition** - College Board 2019

"Includes 8 real tests and official answer explanations"--Cover.

*Lakhmir Singh's Science for Class 8* - Lakhmir Singh & Manjit Kaur

Lakhmir Singh's Science is a series of books which conforms to the NCERT syllabus. The main aim of writing this series is to help students understand difficult scientific concepts in a simple manner in easy language. The ebook version does not contain CD.

**Reproductive and Developmental Toxicology** - Ramesh C. Gupta 2022-03-31

Reproductive and Developmental Toxicology, Third Edition is a comprehensive and authoritative resource, providing the latest literature on this complex subject by focusing on three core components - parent, placenta and fetus - and the continuous changes that occur in each. Enriched with relevant references describing every aspect of reproductive toxicology, this revised and updated resource addresses the totality of the subject, discussing a broad range of topics including nanoparticles and radiation, gases and solvents, smoking, alcohol and drugs of abuse, and metals, among others. In addition, it is the only resource to include reproductive and developmental toxicity in domestic

animals, fish and wildlife With a special focus on placental toxicity, this book is the only available reference to connect the three key risk stages. Completely revised and updated to include the most recent developments in the field, this book is an essential resource for advanced students and researchers in toxicology, as well as biologists, pharmacologists and teratologists from academia, industry and regulatory agencies. Provides a complete, up-to-date, integrated source of information on the key risk stages during reproduction and development Offers diverse and unique in vitro and in vivo toxicity models for reproductive and developmental toxicity testing in a user-friendly format that assists in comparative analysis Includes new chapters on developments in systems toxicology

and predictive modeling of male developmental toxicity, adverse outcome pathways in reproductive and developmental toxicology, ovarian and endometrial toxicity, developmental neurotoxicity of air pollution, and more

*Contraception and Reproduction* - National Research Council 1989-02-01  
This book examines how changes in reproductive patterns (such as the number and timing of births and spacing between births) have affected the health of women and children in the developing world. It reviews the relationships between contraceptive use, reproductive patterns, and health; the effects of differences and changes in reproductive patterns; as well as the role of family planning in women's fertility and health.
